THE CATALOG

The catalog is designed as a guide to the programs, policies, and procedures of Oglala Lakota College. The student or community member has the responsibility of becoming knowledgeable about the requirements and behavior expected of people who utilize the college.

The Oglala Lakota College catalog opens with an introduction that includes the Board of Trustees, maps of South Dakota, the Pine Ridge Reservation and the locations of the district college centers, Mission and Philosophy of the college, a note from the President, and general information about the history of Oglala Lakota College.

Subsequent sections of the catalog outline instructional programs, policies and procedures, community and student services, district centers, and course descriptions.

While providing information to students about the curricula and policies of Oglala Lakota College, the provisions of this catalog are not intended to be a contract between the college and the student. Oglala Lakota College reserves the right to withdraw or change any provision or requirement at any time.

OGLALA LAKOTA COLLEGE

VISION, MISSION AND PURPOSES

VISION

Rebuilding the Lakota Nation through Education

MISSION

The mission which emanates from the charter of the Oglala Sioux Tribe is to educate students for professional and vocational employment opportunities in Lakota country. The College will graduate well-rounded students grounded in Wolakolkiciyapi-learning Lakota ways of life in the community—by teaching Lakota culture and language as part of preparing students to participate in a multicultural world.

PURPOSES

-Tribal-

- * Provides the Lakota with outstanding graduates.
- * Promotes the study and practice of tribal sovereignty.
- * Works with tribal entities toward building our nation.
- * Helps students to gain meaningful employment and live healthy lifestyles.

-Cultural-

- * Utilizes Lakota cultural values in all learning frameworks.
- * Celebrates Lakota culture including sacred songs and ceremonies.
- * Research, study, facilitate, and disseminate Lakota language, culture and philosophy.
- * Provide leadership to maintain and revitalize Lakota culture and philosophy

-Academic-

- * Encourages high student learning expectations through active and collaborative learning, which will be measured through assessment standards.
- * Maintains a supportive campus environment through advising, counseling, tutoring, scheduling, and providing financial assistance.
- * Practices open enrollment and students will acquire relevant knowledge, skills, and values to make a living in a diverse world, and to be a self-fulfilled person who is a contributing member of their family, community and tribe.
- * Pursues the creation of Oglala Lakota University

-Community-

- * Supports local communities in educational and other development.
- * Engages people as active, productive members of their tiiospaye and communities.
- * Offers frameworks for leadership development in the context of communities and organizations.
- * Provides lifelong learning through continuing education and community activities.

PRESIDENT'S MESSAGE

It is with great pleasure to welcome you to another exciting academic year at Oglala Lakota College. From its inception, Oglala Lakota College's mission continues to provide educational opportunities for professional and vocational employment. To achieve this mission, OLC follows four general purposes to meet tribal needs; Tribal - provide outstanding graduates that promote and practice tribal sovereignty and gain meaningful employment. Cultural - Integrate our Lakota ways of life, language, and understanding in all learning frameworks and environments. Academics - Encourage high student learning expectations through active and collaborative learning and, finally, through community engagement and support.

This catalog serves as a guide, offering a comprehensive overview of our programs, courses, and opportunities available to each college community member. At Oglala Lakota College, we believe in the power of education to shape lives and change communities. Our staff and faculty members are dedicated to nurturing your intellectual ability, challenging your perspectives, and fostering critical thinking. They are committed to creating an inclusive and supportive environment where you can thrive and unlock your full potential.

Beyond the classroom, our college is rooted in the tribal community, where students can engage in our co-curricular activities, student organizations, and activities. These opportunities provide a platform for personal growth, leadership development, additional academic support, and strengthened relations. We encourage you to explore these avenues, as they will enrich your college experience and contribute to your holistic development.

I warmly welcome all new students and express my gratitude to our returning students, dedicated faculty, and staff who make Oglala Lakota College a genuinely exceptional institution.

On behalf of the Board of Trustees, local boards, and administration, I wish you all a successful and fulfilling academic year!

Shawn Fast Horse, Maintenance Assistant

COLLEGE HISTORY AND ACCREDITATION

Since the creation of the Pine Ridge Indian Reservation, Oglala leaders have pressed the federal government to meet the educational obligations it promised in treaties and agreements. With the advent of efforts to extend tribal sovereignty by American Indians throughout the United States came a recognition by the Lakota that control of education is also control of its destiny. On March 4, 1971, the Oglala Sioux Tribal Council exercised its sovereignty by chartering the Lakota Higher Education Center. This marked the commencement of a vision's realization, which continues to evolve in the history of the Oglala Lakota.

During its non-accredited years, the college entered into agreements with Black Hills State College (now Black Hills State University), University of South Dakota, and University of Colorado to "borrow" their accreditation for various associate degree programs. Students were taught on the reservation by faculty chosen by the college, but approved by the state institutions, who taught the same courses offered by South Dakota's colleges. It was a complicated system, which met the needs of our students. The college awarded its first associate degrees in 1974. In 1978, the name of the college was changed to Oglala Sioux Community College to reflect its status as a community college.

In 1979, Oglala Sioux Community College became a candidate for North Central Association accreditation. The college settled into its dispersed, decentralized campus system, which features college centers in each of the nine reservation districts.

In 1980, the Oglala Sioux Tribal Council allowed the college to occupy its present administrative center. Piya Wiconi is the most visible symbol of the college, but the district centers are where the mission is being fulfilled.

At the 1983 annual retreat, OSCC underwent another name change to Oglala Lakota College to reflect its status as a four-year degree-granting institution and to replace the word Sioux with Lakota. Since Sioux is not a word in our language, the proper word to describe our people is Lakota.

A 13-member Board of Trustees governs Oglala Lakota College with membership coming from nine reservation districts, one designee from the Oglala Tribal Council, one designee from the Oglala Sioux Tribe President's Office, one designee from the Council of Elders, and a student representative.

Oglala Lakota College has maintained accreditation by the Higher Learning Commission (HLC)-previously called North Central Association-since June 20, 1983. The Higher Learning Commission (www.hlcommission.org) is located at 230 S LaSalle Street, Suite 7-500, Chicago, IL 60604-1413, and can be reached at 800-621-7440.

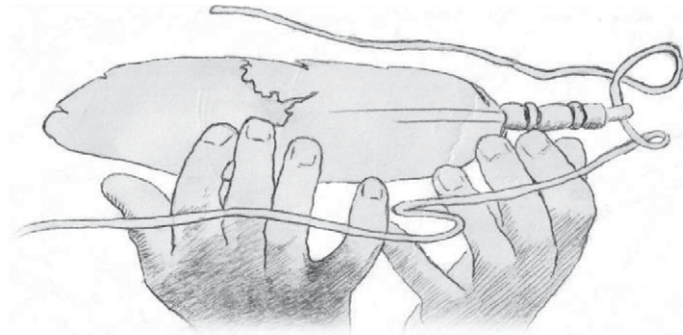

When accreditation was granted in 1983, the degree offerings were a bachelor's degree in Elementary Education and Associate Degrees in Business, Education, General Studies, Lakota Studies, Nursing and vocation fields. OLC is currently approved to offer programs at the Associate, Bachelor's, and master's level (the latter is limited to the M.A. in Lakota Leadership/Management with an emphasis in Education Administration). In 2022, HLC expanded approval of distance education from courses to programs.

HLC most recently reaffirmed OLC's accreditation in 2023-24. OLC is scheduled to complete the mid-cycle review with embedded monitoring in 2027-28, and the next reaffirmation of accreditation in 2033-34.

Oglala Lakota College maintains specialized accreditation in Education, Nursing, and Social Work. The B.A. in Early Childhood Education, B.S. in K-8 Elementary Education, B.S. in K-12 Lakota Studies, B.S. in Secondary Science, K-12 Special Education Preparation, and the M.A. in Lakota Leadership and

Administration – Education Administration Emphasis are approved by the South Dakota Department of Education (good standing; next review in 2026). The A.A. in Nursing is approved by the South Dakota State Board of Nursing (good standing; next review in 2026), allowing graduates to take the national licensure exam and become registered nurses in South Dakota. Lastly, the Bachelor of Social Work program is accredited by the Council of Social Work Education (good standing; next reaffirmation in 2030).

Oglala Lakota College stands ready to meet the education challenges of the 21st Century and will continue to assume a vital role in the development of this reservation's resources, people, and land.

FACILITIES

PIYA WICONI (located six miles southwest of Kyle)

- **Administration Building:** President, Vice President, Business Office, Faculty Offices, Financial Aid, Maintenance Office, Registrar
- **Woksape Tipi:** Library-Archives, Faculty Offices, Studio
- **Applied Science Building:** Agriculture Education Office, Headstart Office, Vocational Education Dept., Community/Continuing Education, Student Support Services
- **Math & Science Building:** Chemistry Lab, Dirt & Water Labs, GIS labs, Math & Science Faculty Offices, Meeting Rooms, Native Science Field Center, SEMAA-AEL Classroom
- **Historial Center:** Historical photographs and artwork displays chronicling the history of the Oglala Lakota from the early 1800s to the Wounded Knee Massacre in 1890. Graduates Studies and Lakota Studies Departments
- **Multi-Purpose Building:** Athletics Department, Faculty Offices

District Centers (located in the nine major reservation towns-see map on page 1)
 1) Offices for Center Directors, Assistant Center Director, Counselors, Classrooms, Computer Labs, Library Room, Tutors. Most classes are held at these centers.

He Sapa College Center (located in Rapid City)

Offices for Center Director, Assistant Center Director, Counselor, Classrooms, Computer Labs, Library Room, Tutor

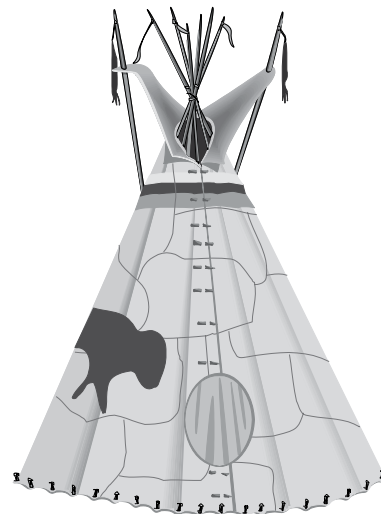

Nursing Building (located in Pine Ridge Village)

Offices of Nursing Program Faculty and Staff, Classrooms

Classes also facilitated at Pine Ridge Hospital and off reservation hospitals.

Cheyenne River College Center (located in Eagle Butte, SD)

Extension college center with Art Studio, Classrooms and offices for Academic Dean, Center Director, Faculty and Staff.

Oglala Lakota College Administration Building

GOVERNANCE

OVERVIEW OF THE STRUCTURE

Governance consists of the Board of Trustees, the President, the Piya Wiconi Okolakiciye (all College Senate), the local District College Center Boards and the Student Government Organizations.

The Board of Trustees is the only governing body which can make policy for the College. Nine board members are elected from the districts; two members represent the Oglala Sioux Tribe which are designees of the President, and OST Council, also one Student Representative from our Student Senate and a Council of Elder. The Board does receive many recommendations from many sources, and the above process provides an orderly means for all college inquiries and constituents to channel policy recommendations to the Board of Trustees.

Although only the BOT can make policy decisions, they have shared responsibilities with constituent organizations in its desire to assure influence and participation by students, staff, the president and local communities.

The District College Center Boards have delegated authority from the BOT as their actions pertain to the district college centers. There are nine (9) District College Center Boards: Eagle Nest, East Wakpamni, LaCreek, Pahin Sinte, Pass Creek, Pejuta Haka, Pine Ridge Village, Oglala, and Wounded Knee. Each of these centers make programmatic and personnel recommendations to the Board of Trustees. District Boards can approve community and other activities for their respective districts.

The President of Oglala Lakota College is the chief administrator for the college. The line and supervisory staff of the college implement BOT policy, make policy recommendations and develop procedures for implementing Board policy. The administrative structure follows a delineated table of organization for providing governance and operational decisions to the President who is responsible to the BOT. The organization of the college includes the Division of Instructional Affairs, the Division of Student and Community Services, the Institutional Development, and the Office of Fiscal Management.

The student governments are elected at the district level and represent the students from each district. Student input into the governance of the college flows through the District College Center Boards. Student representation is included in the Piya Wiconi Okolakiciye.

PIYA WICONI OKOLAKICIYE

Rationale

The Piya Wiconi Okolakiciye provides the internal means by which all staff and students are assured their ideas and efforts will be considered. Individuals are elected to PWO as representatives of their constituency, not as a result of their position in the table of organization or their relationship to the district boards and district student government/organizations.

Institutions of higher education are unique organizations in that they are comprised of several distinctive constituencies. Each of these constituencies is served by the college and each has important knowledge to contribute to the services provided by the college. Oglala Lakota College recognizes the need for input from each constituency in the determination of policy and procedures.

The college constituencies are: The Board of Trustees, Administration, District College Centers, Students, Faculty and Staff. The Oglala Sioux Tribe is represented through their constituencies. Prior to the creation of PWO, input from each of the college's constituencies worked its way through the levels of the college

structure. Piya Wiconi Okolakiciye was created to assure participation in the governance of the college by members who did not have direct access. This organization within the college is specifically for students, faculty, and staff. It provides a forum for addressing college-wide concerns and making consensus policy and procedure recommendations to the President and Board of Trustees.

Standing Committees

Standing committees are the primary working subdivisions of PWO and transact business assigned by either PWO or the President of the college. Committees of the college include Activities, Institutional Development, Instructional Affairs, and Student Services.

POLICIES & PROCEDURES

Oglala Lakota College is unique. The college is planned and operated to meet the specific needs of the people on this reservation. This means an emphasis on Lakota culture and content in its programs meeting students' needs from the very basics of study skills and high school equivalency tutoring and testing to college programs designed to prepare its graduates to enter the workforce. There are also workshops on specialized subjects ranging from horseshoeing to women's rights to Indian law. Finally, there are cultural events such as movies, film festivals, nationally known guest speakers on Indian literature, art and history and our own arts and crafts shows.

We feel Oglala Lakota College is an exciting and stimulating environment in which to learn and teach. We hope you will adopt this enthusiasm. Examine it critically -- then pitch in to make the college even better for your having been there.

STUDENT INFORMATION

Students at Oglala Lakota College have the right to the highest quality education possible and to fair and equitable treatment by all departments of the college. The college is obligated to provide students with the best possible environment, instruction, curriculum and resources. However, the responsibility for the quality of learning is that of the student. Quality education happens when learning is balanced interaction between students and staff.

In the event of a perceived unfair ruling made against a student, Oglala Lakota College has established a grievance policy and procedures for fair and equitable resolution of the issue. The grievance policy and procedures are detailed in the OLC Student Handbook.

DRUG-FREE ENVIRONMENT

Oglala Lakota College requires a drug-free work environment. All employees and students are required to comply with this policy. This policy is published in the OLC Policy and Procedure Manual and the Student and Employee Handbooks. Disciplinary measures may be necessary for violations of this policy will be referred to the appropriate professionals and officials. The College maintains an Employee Assistance Program and student assistance program to provide aid to individuals who may be experiencing problems.

GUN-FREE/WEAPON-FREE CAMPUS

Oglala Lakota College adheres to its Gun-Free/Weapon-Free campus policy (refer to #52-500). All dangerous weapons, (defined as any firearm, knife, or device, instruments, materials, or substances, whether animate or inanimate which is calculated to inflict death or serious bodily harm) are banned from the Oglala Lakota College campus and properties. Weapons brought onto or carried on Oglala Lakota College property must have prior approval and conform to the safety regulations identified in the procedures. Weapons carried by authorized law enforcement personnel or used in military activities are exempt.

ACADEMIC HONESTY AND INTEGRITY

Academic honesty is at the heart of the pursuit of higher education. **Integrity** contributes to the credibility of coursework and degree programs. Academic dishonesty, whether it occurs intentionally or unintentionally, is a violation of trust. Academic dishonesty may take many forms, including but not limited to plagiarism, fabrication or falsification of information and cheating.

Students who fail to maintain academic honesty and integration will face sanctions for confirmed violations will be commensurate with the nature of the violation which could include a student being expelled and barred from further classes. Definitions and sanctions for addressing academic dishonesty are outlined in the procedures for this policy.

STUDENT MISCONDUCT

1. Misconduct refers to any actual or threatened physical violence, gross disorderly conduct, interruption of classes or college business, repeated verbal abuse or harassment, vandalism to OLC college premises or property, attending college classes or under the influence of alcohol or drugs, failure to properly supervise children on college premises, and any other student conduct causing a disruption in college classes or any transaction of college business.
2. A student may be expelled or barred from further classes for misconduct toward a college staff member, community member, another student, or a board member when this misconduct stems from college business or on college premises.
3. A student may also be expelled or barred for student misconduct occurring on the college premises or when occurring during college classes or events.

CONTINUOUS IMPROVEMENT AND INSTITUTIONAL EFFECTIVENESS

Oglala Lakota College is committed to a comprehensive, deliberative, and continuous process of self-reflection and examination by using the results to enhance and improve all aspects of life at the college. Institutional effectiveness at Oglala Lakota College is defined as a process in which all members of the college community examine *the extent to which an institution achieves its mission and goals*. The college's institutional effectiveness process is an on-going, college-wide process of planning and assessment for the purpose of documenting the college's achievement of its mission and goals while continuously improving its programs and services.

The institutional effectiveness process starts with the College's Mission Statement, Vision Statement and Strategic Goals. The process devolves down to individual administrative and academic units and includes

- (a) developing a unit purpose statement and annual objectives and/or student learning outcomes supporting the college's mission and goals (b) developing procedures/assessment methods and criteria for measuring the success of the unit's objectives/learning outcomes and (c) documenting results and using results to show that the unit is continuously improving its programs and/or services. The institutional effectiveness process at Oglala Lakota College is a continuous planning-implementing-evaluating-improving cycle and is applied at every level of the institution.

REGISTRAR'S OFFICE

Anthony Barajas, Registrar
Kacena One Horn, Deputy Registrar
Carrie Sitting Up, Assistant Registrar
Summer Last Horse, Filing Clerk
Phone: (605) 455-6033; Email: registrar@olc.edu

The primary purpose of the Registrar's Office is to provide service. Through our service, we not only derive professional satisfaction, but students have a right to expect this from us. Counselors are available at each district college center to assist students with tutoring, attendance, personal and financial aid counseling. Counselors may also refer students to other resources if they are unable to assist students in their needs.

The college is interested in the welfare of its students. Students should work closely with their local district college center counselor. The personal contact of students with each district college center counselor begins within the community, during registration and continues throughout the year.

COLLEGE ADMISSION POLICY

Oglala Lakota College pursues an open-door policy in which all qualified students will be admitted without regard to race, religion, origin or political belief. Enrollment in the college does not guarantee admission to any specific program, nor to any and all courses of study. To qualify for full access to college level courses, students must demonstrate minimum 10.1 grade level of reading comprehension as indicated by college readiness assessment (see policy 70-300).

General Admission

All applicants seeking admission to Oglala Lakota College must send each of the items listed below BEFORE, being admitted:

1. Complete Admission Application and declare a major.
2. Furnish a signed official copy of your high school transcript, or official General Education Development (GED) transcripts MANDATORY.
3. Social Security Card
4. A student with a bachelor's degree or higher will be required to submit documentation verifying the degree awarded.
5. Transfer students must send official college transcripts from all college/universities previously attended.
6. Verification of Tribal Enrollment if the student is a tribal member of a Federally Recognized Tribe.
7. Complete College Readiness Assessment (see policy 70-300).
8. Submit a copy of one of the following: **current state driver's license** or **ID, Tribal ID with two** pieces of mail matching address on Tribal ID, or **Affidavit of Residence**. (see policy 80-070)

Any student falsifying information is subject to being dropped from all classes. Oglala Lakota College does not admit under the "Ability to Benefit" criteria.

ADMISSION (PROCEDURE)

A. Non-Degree Seeking Students

Non-degree seeking students are students who are taking classes for professional development, certification renewal, or personal fulfillment and do not qualify for financial aid.

- A non-degree seeking student with a baccalaureate degree must provide a copy of their unofficial college transcripts indicating the degree and year awarded.
- A non-degree seeking student with no baccalaureate degree must meet all admission requirements including any pre-requisites in order to receive credit.
- Tribal members wishing to visit the class may do so with instructor and center director approval (see policy 81-950). This is for non-credit.

B. New Entering Freshman Students

New entering freshman students are students who have never attended a college or university must:

- Attend mandatory institutional student orientation.
- Review the student handbook.
- Meet with the academic department advisor.
- Complete the course readiness assessment (see policy 70-300).
- Review the department handbook.

C. Transfer Students

Transfer students are students who have attended another college/university and wish to transfer courses to OLC, students must provide:

- OFFICIAL copy of all college transcripts to the Registrar's office.
- Adhere to the general admission criteria.
- Transfer students who do not have approved transfer college credit for Composition and College Algebra must complete the college readiness assessment (see policy 70-300).

D. Degree Specific Admissions

Students who are completing the general education requirements of the declared major must apply for admission into the professional degree area as specified in the Department Specific handbook; students must meet all degree entrance requirements and complete the following:

- Attend departmental specific orientation.
- Meet general admission criteria.

E. Early Entry

- Junior or senior high school students with a GPA of 2.00 or higher may enroll in college level courses (see Policy 80-200-1).
- An early entry letter (must be typed and signed by high school principal or counselor).
- Early Entry students must complete the college readiness assessment and meet the 10.1 reading level.

F. Readmission

- Former students of Oglala Lakota College who have not enrolled for two semesters or longer must apply for readmission to the Registrar by submitting a returning student application.
- Official transcripts of additional work completed at any other college must be submitted.
- If a student has dropped out for more than two semesters and has not successfully completed Engl 103 or Math 103 he/she must complete the college readiness assessment.

G. Admission of Veterans

- Veterans wishing to attend the college may use their veteran's educational benefits. Applications may be found on the GI Bill website, <http://www.benefits.va.gov/gibill>.
- Continuing, students should notify the Registrar to fill out an enrollment certification for the semester (s) he/she will be attending OLC.
- The spouse or child of a former or current service member may also qualify for VA educational benefits.
- The veteran will need to stop at the Registrar's Office and sign the enrollment certification a month before classes begin to receive certification and authorization prior to registration in order to receive monthly subsistence without delay.

H. General Education Development Classes (GED)

- Students who have not completed high school and who do not have a G.E.D. may enroll for free G.E.D. classes at any of the college centers throughout the reservation.
- For further information, contact the college center director or tutor in your local district.

STUDENT RIGHTS AND RESPONSIBILITIES

Rights

Students at Oglala Lakota College have the right to the highest quality education possible and to fair and just treatment by all departments of this college. Student's records and transcripts are confidential. Students have the right to a timely and accurate financial statement and billing.

Students are to be treated with respect and to be fairly graded. Students can participate in the governance of OLC by active involvement in their local student organization and boards, Piya Wiconi Okolakiciye and may visit any College Board meetings. Students have the right to appeal any actions against them through the grievance procedures outlined in the policy manual.

Responsibilities

Oglala Lakota College is obligated to provide students with the best possible environment, instructors, curriculum and resources for your education. However, the responsibility for the quality of learning is that of the students. It is the student's responsibility to be in class, or to make arrangements for obtaining the information if he/she must miss a class.

It is the student's responsibility to attend class prepared. This constitutes having the needed materials, completing required assignments, and being ready to learn. It is the student's responsibility to drop a class if they can no longer continue. It is the responsibility of the student to let the instructor/counselor know when information is not clearly understood or extra help is needed. It is the student's responsibility to study course material outside the classroom. Learning is an active process which cannot be obtained by passively listening to a lecture.

At OLC, the student has a wide range of rights which are stated and protected by the policy manual. Quality learning is only possible when the student accepts his/her responsibilities. Learning is the role of the student. The college's role is to assist the student in the process of learning. Together, we can build a great future for you and the Lakota people.

REGISTRATION (POLICY)

Registration is held at each of the nine district college centers throughout the reservation and at the Rapid City Extension and Cheyenne River College Center. Registration for Fall semester begins in April and registration for Spring semester begins in November.

To be considered for registration, the applicant must meet all admission requirements.

STANDARDS OF CONDUCT

OLC students will abide by the standards of conduct while on college premises. Every student has the right to a safe learning environment. To ensure this safety, OLC applies the following as acts of misconduct subject to disciplinary action:

- Any actual or threatened physical violence.
- Gross disorderly conduct.
- Verbal abuse or harassment.
- Vandalism of OLC premises.
- Attending classes under the influence of alcohol or drugs.
- Failure to properly supervise children on college premises.
- Any other student conducts that cause a disruption in classes or business transactions on college premises.
- Failure to abide by the College's Gun-free/Weapon-free Policy.

Oglala Lakota College shall have a zero tolerance for student confrontations that result in a violent act by one student against another student or any employee of Oglala Lakota College. A violent act shall include but not be limited to hitting or shoving another student.

EARLY ENTRY PROGRAM

Oglala Lakota College provides opportunities for high school students to achieve college credit under specific criteria called early entry. This program is offered to junior and senior high school students who would like to enroll in college courses for up to seven credit hours a semester. They must have a written statement from their high school Principal or Counselor stating they are prepared for college level work, approving the students' enrolment at OLC, and verification the student maintains a G.P.A. of 2.0 or above. An official transcript from the high school must be submitted with the statement. Early entry students must complete the college readiness assessments and meet the 10.1 reading level.

VISITING CLASSES

Tribal members are invited to visit, with the approval of the instructor and center director, all classes taught at Oglala Lakota College. Those who wish to pursue a course throughout the semester are invited to do so. There is no fee for "visiting" and no record will be kept. Those taking courses on a "visiting" basis must purchase their own books.

STUDENT ADVISING

The district staff will advise the students on which classes to register for from the CORE courses, including General Education and Lakota Studies courses that are offered. It is expected that a student will complete the CORE component of the curriculum before beginning study in the major. A student who has already decided on a major should consult the admission requirements of the department of his/her major.

The students must satisfy all admission requirements for the major department and, in conjunction with the department chair and staff to determine a plan of study.

PELL will only be applied to those courses that relate to the declared degree and students can only work towards one degree at a time. Students may make their first change of major at this time without question. Once a student is admitted to a baccalaureate program, a second plan of study will be developed with the Department Chair.

Students whose plans of study changes for a second or third time must submit their reasons in writing. The reasons for a change in majors must be approved by the Registrar and the academic departments involved. Academic advising can be requested at any time by contacting center staff or the department chair to set up an appointment.

STATUS SHEETS

Once a student enters a degree area, the student must obtain a status sheet/degree audit for that degree program from their official record on the Jenzabar website by going to advisor tab and degree audit, please review this with your counselor or academic advisor to ensure that it is correct. When thirty (30) credit hours have been completed, a student must review his/her progress with the department chairperson. This status sheet/degree audit should always be consulted when making course requests and enrolling for classes. (If a student fails to maintain continuing enrollment for one (1) semester, the student will come back in on the current status sheet.) All students in the education degree department move to the new status sheet, if any changes occur, due to state requirements.

STUDENT COURSE LOAD

During the fall, spring and summer semesters, 12 credit hours per semester is considered a full-time course load. Students may enroll for up to 18 credit hours per semester. In special cases, upon the approval of the Department Chairperson(s), this maximum load may be increased. In all cases, a half-time load is one-half a normal full-time load.

HOURS OF RESIDENCE

A minimum of thirty (30) resident hours must be earned from Oglala Lakota College for consideration of awarding an associate degree or a bachelor's degree. To receive an associate degree from OLC, 11 semester hours of the last 24 must be earned during the last year. To earn a bachelor's degree from OLC, the last semester credit hours must be earned from OLC.

ENROLLMENT LIMITS

Oglala Lakota College reserves the right to cancel any class which does not have an enrollment of six or more students. The college will make every effort to offer the courses requested and in a sequence which permits most students to obtain a degree in a two of four-year cycle. To avoid class cancellations, each student should meet regularly with his/her district college center counselor in order to plan schedules for each semester.

The class size at Oglala Lakota College is limited to 30 students. If the need exceeds 30 students, the same course will be offered the next semester. Foundational Studies class sizes are limited to the size of the computer lab at the college center.

ATTENDANCE

The purpose of the attendance policy is to ensure student success and support the financial aid office in Pell disbursement. Students are required to attend classes regularly. A student will be dropped from a course after three consecutive or five scattered absences by the instructor. OLC understands special circumstances of their students. At the discretion of the instructor, up to two absences can be made up (see Attendance procedure 81-350-1). If the student is not dropped this may result in a failing grade and impact their financial aid and in-house scholarships. Absences not made up within one week will remain an absence.

Students' Responsibility:

- Notify the instructor of an absence prior to the start of class.
- Work with the instructor to make up an absence.
- Comply with the course expectations to make up the class within one week.
- Monitor attendance to ensure that attendance is correct.
- Follow add/drop policy 80-300 and process 80-300-1.
- Work with faculty and OLC College center staff when an early alert is submitted.

Instructor's Responsibility:

- Attend faculty/adjunct faculty orientation
- Seek assistance with recording attendance in Jenzabar.
- Record attendance after each class for 15 weeks
- Enter attendance in Jenzabar.
- Monitor attendance to ensure that attendance is correct.
- Notify students and center staff of cancelled and rescheduled class dates.
- Make up all cancelled classes prior to the end of the semester.
- Reschedule class in Jenzabar.
- Follow add/drop policy 80-300 and process 80-300-1.
- Determine and document special circumstances.
- Work with students who demonstrate a special circumstance.
- Ensure that students make up missed class within one week of approved absence.
- Submit early alerts and follow the early alert policy and procedures
- Drop student from a course after three consecutive or five scattered absences.
- Weekly submission of attendance will be monitored by the Vice President for Instruction office: Administrative Assistant.
- It is the Department chair's responsibility for corrective action of faculty.
- It is the Vice President for Instruction's office responsibility for corrective action of adjunct faculty.

*See procedures in the student handbook.

DROP/ADD PROCEDURE

During registration and the first week of classes, all students who meet the registration deadline may change their enrollment by the following: Log on the Jenzabar website exweb.olc.edu/ics using your username and password that you acquire from the Registrar's Office. If a student discontinues a subject and fails to follow the prescribed procedure for dropping a course, it may be recorded on his/her permanent record as an "F". It is the student's responsibility to verify that their schedule shows that the course is officially dropped. If a class is dropped after the third week, the student will be liable for the total cost of the tuition.

INCOMPLETES

An incomplete grade is given only when the instructor feels that special circumstances warrant it. In addition, the faculty providing all information necessary to determine an appropriate grade for the student, instructor, and Department Chairperson must sign a contract. Unless stated in the contract, all incomplete grades must be made up within one calendar year.

GRADE POINT AVERAGE

Graduating with an Associate of Arts or bachelor's degree from OLC requires twice as many grade points as credit hours attempted (A cumulative GPA of 2.0). Grade points are as follows:

A-4 grade points	F-0 grade points	W-not applicable
B-3 grade points	I-not applicable	AU-not applicable
C-2 grade points	NP-No Progress, not applicable	
D-1 grade point	SP-Satisfactory Progress, not applicable	

(Note! Some programs of study require a higher GPA above 2.0)

CLASSIFICATION OF STUDENTS

Freshmen students must maintain a cumulative GPA of 1.50 up to 30 credit hours completed. Thereafter, the student must maintain a cumulative GPA of 2.00. This is consistent with the minimum graduation requirements at Oglala Lakota College.

TRANSFER STUDENTS

Transfer students will be responsible for maintaining a GPA of 2.00, if their transfer total applied and Oglala Lakota College credits equal to more than 30 semester hours. They will be responsible for a GPA of 1.50, if the total applied credits equal less than 30 hours. All credits are not transferable to every education institution.

DEGREE OR CURRICULUM CHANGES

When a student changes degree objectives, he/she will be subject to the maximum time frame of the new degree without regard to time spent pursuing the previous degree. The student must realize that federal financial aid will be calculated according to the original time frame.

GRADUATION REQUIREMENT COURSE

The purpose of a Graduation Requirement Course is to assist the student with continued persistence and timely completion of his/her degree. Graduation Requirement courses are intended for degree seeking students only. Non degree seeking students or students in special programs do not qualify for a GRC. Not all courses can be taught through this mode of delivery. All courses suitable for a GRC are designated by the Department Chair and approved by the Vice President for Instruction and Registrar. All GRC requests must be approved by the Department Chairperson and the Vice President for Instruction.

A GRC will not be allowed if the same course is offered online or within fifty (50) miles of the student's home center. However, if there is a scheduling conflict, a student may still apply. Students are allowed two graduation requirements courses per semester. Students who successfully complete 45 hours towards their first AA/AAS or 96 hours towards their first bachelor's degree are eligible to apply for a GRC. Students must have an overall Grade Point Average of at least 2.75 and be in good standing, or 3.00 for the previous

24 credit hours, verified by the Registrar's Office. Students must have demonstrated the ability to work independently, utilize technology and be familiar with the current student information system.

Faculty will be required to utilize the approved student information system throughout the semester to enter attendance equivalent to the amount of work required by the course, midterm and final grades. The faculty must have the GRC syllabi that outlines the expectations of the student. Faculty must fully inform the student of what is expected from the GRC. Faculty must keep a record of this course orientation through sign in sheet and approved syllabi signed by both the faculty and the student.

Department Chairs must ensure that the course is appropriate to be delivered in the GRC format, the syllabus is appropriate for GRC and will meet the student learning outcomes and the departmental requirements for student success and assessment.

Remuneration and Mileage

Faculty will be paid at the rate of \$100.00 per credit hour for each GRC. Mileage will be paid to instructors for travel associated with GRC as per OLC mileage policy.

TRANSCRIPT REQUEST

Any student requiring a transcript must put their request in writing or submit the online form to the Registrar's Office. Any student requesting a transcript from the Registrar needs a complete file (High School Transcripts, GED Certificate, Degree of Indian Blood, no outstanding bills to OLC). The initial request will cost \$7.00 and \$2.00 for each additional copy with the same day request. These fees are Non-Refundable, and the request may take 3 business days to process. Requests shall be kept on file for one semester due to limited filing space.

APPLICATIONS FOR GRADUATION

Oglala Lakota College officially certifies graduates at the end of each semester and awards all degrees/certificates in the spring term. Students must apply for graduation to their counselor and/or faculty advisor who submit the application, fee, and typed status sheet to the Registrar's office by the Fall Deadline is October 1st and the spring Deadline is March 1st.

It is the responsibility of the student to complete an application form for graduation and forward it to the Registrar with the non-refundable graduation fee of \$10.00. The district counselor and/or advisor will make every effort to assist the student in this process. All students must have a minimum cumulative G.P.A. of a 2.00 to graduate.

Note: If a student fails to complete the requirements for graduation on the faculty's last day in the spring semester in which he/she applies, the student must reapply for graduation.

GRADUATION ASSISTANCE PROGRAM

Students who graduate from Oglala Lakota College shall be eligible for assistance to pay outstanding tuition, fees and bookstore bills, or any outstanding debt.

Students who have graduated with an equivalent degree or higher degree are not eligible to receive assistance for additional lower or equivalent degrees or certificates at a later date. (i.e.: A student received a bachelor's degree in 2013 and then received an AA Degree in 2014, the student is not eligible for the

assistance in 2014 because he/she received a higher degree in the previous year.)

REGISTRATION FOR STUDENTS WITH MORE THAN SIXTY HOURS

Students with 60 or more credit hours should know that only the courses for their AA Degree may transfer to another institution four-year program.

ACADEMIC PROBATION/SUSPENSION

Academic Probation Policy

Any student who does not earn a grade point average of 2.0 (1.5 for students with 30 earned hours or less) in any enrolled semester or any student who has withdrawn from all of their credit hours in the past semester will be placed on academic probation.

ACADEMIC PROBATION/SUSPENSION (POLICY AND PROCEDURE)

While Oglala Lakota College (OLC) is dedicated to helping every student achieve their educational endeavors, we recognize that situations or personal issues arise that will jeopardize a student's ability to succeed. Failure to progress will prompt serious consequences. Students attending OLC are required to meet minimum progression standards and maintain a term grade point average requirement in order to remain in good standing. A Student who meets or exceeds the term grade point average requirement listed below is considered to be in good standing.

<u>Class</u>	<u>Credit Hour Range</u>	<u>GPA Standard</u>
Freshman	0-30	1.8
Sophomore	31-60	1.8
Junior	61-90	2.0
Senior	91+	2.0

ACADEMIC WARNING POLICY

Any student who does not earn a term grade point average of 2.00 (1.80 for students with 60 earned hours or less) in any enrolled semester or any student who has withdrawn from all of their credit hours in the past semester will be placed on academic warning.

ACADEMIC WARNING PROCEDURE

1. A student on Academic warning can enroll for 12 or more credit hours in the subsequent semester and shall be removed from academic warning if the term GPA requirement is met.
2. The Registrar shall initiate warning proceedings by informing the student and district center staff in writing (where the student has claimed to be his or her "Home Center").
3. Academic warning serves notice to the student of unsatisfactory progress. Students who receive an academic warning notice will be required to meet with their center director and academic advisor to develop an approved personalized plan before registering next semester.
4. Students will attend tutoring sessions each week, unless excused by the instructor in writing.
5. Students will meet with the academic advisor on a schedule set by the academic advisor, no less than, every five weeks to do a check in.
6. The decision shall be binding and final for all courses offered by Oglala Lakota College.
7. The Registrar will maintain a current list of all students on academic warning status.

ACADEMIC PROBATION POLICY

If a student does not earn a term grade point average of 2.00 (1.80 for students with 60 earned hours or less) during subsequent semesters, the probation process will be initiated.

ACADEMIC PROBATION PROCEDURE

Academic Probation means that the student has not met the term GPA requirement for two semesters. Any extenuating circumstances need to be documented for the second advising meeting.

1. Students will meet the Enrollment Management Director and provide sufficient evidence to warrant continued enrollment before registering the next semester.
2. Students can enroll up to 12 hours in the subsequent semester after meeting with the Enrollment Management Director and Center Director.
3. Students will meet all conditions determined by the Enrollment Management Director.

ACADEMIC SUSPENSION PROCEDURE

Suspension means that the student has not met the term GPA requirement for three semesters. Whether a student has met any of the prior plans for success will be a factor in determining whether academic suspension will be imposed. The third and final advising meeting is with the VP of Instruction to determine if they are prepared to return or go on suspension.

1. Students will sit out for one semester with no appeal.
2. Students will meet with the Vice President for Instruction before they register in their next semester.

**Note: 86-000 Students Right and Responsibilities and the overall mission and vision of Oglala Lakota College defines what we are striving for as an institution. Depending on the student's circumstances and documented history of poor academic performance, anything beyond academic suspension shall fall under the following policies, 86-200 Student Grievance, 21-002 Powers of Local Boards and 86-300 Standards of Conduct.*

FINANCIAL AID

Yolanda Garcia, Financial Aid Director
Cindy Iron Cloud, Financial Aid Officer
Faith Moves Camp, Financial Aid Officer
Phone: (605) 455-6037; Email: ygarcia@olc.edu
Staff email: financial-aid@olc.edu

MISSION STATEMENT

To help those students who need assistance to further their education. Priority will be given to those people with the greatest need. Aid is administered in accordance with the applicable laws of the United States regulations and policies of the Board of Trustees and the Oglala Lakota College, regulations of the college stated in the Oglala Lakota College catalog and the policies and procedures in this manual.

Free Application for Federal Student Aid (FAFSA) should be completed as soon as possible once it is available in the Spring. The application may be filed by going to fafsa.ed.gov.

Financial Aid is available at Oglala Lakota College in the form of Grants, Work Study, and Scholarships. Due to the limited amount of funds available through these aid programs, students who meet Satisfactory Academic Progress toward their declared major and who can demonstrate a need will be given priority.

Freshman students (up to 30 hours attempted) must maintain a cumulative GPA of 1.50. Thereafter, the student must maintain a cumulative GPA of 2.00. This is consistent with the graduation requirements at Oglala Lakota College.

GRANTS

Pell Grant Entitlement Program

Students must have filed the Free Application for Student Aid (FAFSA) on file. This is a federal program that offers assistance to any eligible student who needs it to attend a post-secondary educational institution. The value of the award may vary from \$400 to \$7,395, depending on the estimated family contribution (EFC) calculated by the Department of Education. This award helps eligible students work toward an undergraduate degree. Once a student has earned a first bachelor's degree, they are no longer eligible to receive PELL.

OST Higher Education Grant

Presently administered by the Oglala Sioux Tribe. Students must file the OST Higher Education Grants application with the OST Higher Education office. Students must also have a Free Application for Federal Student Aid (FAFSA) Pell Grant Application on file before a needs analysis can be completed and submitted to Higher Education.

FSEOG

The Federal Supplemental Opportunity Grant Program provides grants to undergraduate students who demonstrate a financial need. The average award varies per semester and if a student receives it one semester does not mean they will get it the next semester.

Federal Work Study

Students employed under the Federal Work Study (FWS) Program can work a maximum of twenty hours a week, depending on the amount of the award. Students will be compensated at an hourly rate of \$14.48 per hour. The average award is \$2,896 per student per semester but varies based on need and funding amount.

Eligibility of Student:

- A. Preference to students with greatest aid eligibility, who have indicated on their FAFSA that they are interested in work.
- B. At least half-time students (except during the summer session).
- C. U.S. Citizen, permanent resident, or in the United States for other than a temporary purpose.
- D. Not in Default/or owe a refund to any Title IV programs.
- E. Have not already received a bachelor's degree and/or above.
- E. At least two work-study students will be hired in each district college center.
- F. Assignment of FWS to district centers is contingent on satisfactory compliance by the center in developing job descriptions, recruitment, supervision and evaluation.
- G. Complete application on file in the Financial Aid Office.

SCHOLARSHIPS

The Student Services Committee reviews and approves all institutional scholarships at OLC. Only complete applications submitted online will be considered for selection. The web site is:

https://webportalapp.com/sp/login/aicf_scholarships

where a student fills out personal information, lists all extra-curricular activities, volunteer work, honors, distinctions and a personal essay. The student then contacts the college center staff to take a digital photo.

- Students with complete submitted applications will be considered for selection. This includes the application, essay and photograph.
- All photographs will be screened by the Financial Aid Office for appropriateness. Examples of inappropriate pictures are baby pictures, students wearing sunglasses, bandanas, unclear pictures, filters, etc. Any repugnant or obscene photos will not be considered for a scholarship award.
- Students must complete a FAFSA to be considered for selection to determine the financial need of each student.
- All scholarships require a minimum of 2.0 cumulative G.P.A.
- Students may receive up to two scholarship sources per semester, the scholarships total will not exceed the student's financial need which includes all funding.
- Native American students are to be considered first preference for all scholarships.
- Students must be enrolled in at least 3 credit hours to qualify.

Richtmyer Scholarship

In 1980, Dr. Robert Richtmyer presented Oglala Lakota College with a gift in memory of his late wife, Jane. Scholarship amounts vary depending on the amount of interest earned from the Richtmyer Endowment fund during the year. Students must present evidence of creative ability in Native American arts and crafts.

Crazy Horse Scholarship

Students must be of Lakota ancestry, must be in good standing academically, demonstrates a need and must submit a letter stating their educational goals.

Wilms Scholarship

Established for the purpose of financially assisting "young Indian males" to achieve a college education. This award is also based on the interest accrued from the Wilms Scholarship Endowment fund per academic year. Criteria to be considered will be: academics, school and community activities, leadership, potential for completing college and financial need. \$500.00 will be awarded per student, in good standings, per semester. Males to be considered must be 35 years or younger.

McAlpine Scholarship

This scholarship is open to Indians and non-Indians. The applicant must be an incoming freshman student; enrolled full-time; and an essay of her/his dream, vision, or something that pertains to achieving her/his goals.

Fund Exchange Scholarship

Applicants must be an enrolled member of a Federally recognized tribe, must be a potential graduate for the current academic year, have an unmet need for financial assistance, be enrolled in at least 6 credit hours, have demonstrated academic achievement and have a cumulative semester GPA of 2.0 or better.

Edith Kooyumjian

Applicant must be an O.S.T. member, enrolled in at least 6 hours, 23 years of age or older, an undergraduate student, a need to support a family, and a financial need.

Davis

This is for students with a Voc-Education major, enrolled members of a federally recognized tribe and a full-time student.

Lawlor

This scholarship is for students with a Lakota Studies Major, full-time enrollment, an Oglala Sioux Tribal member and an unmet financial need.

Long Wolf Memorial

This is for two undergraduate students who have demonstrated potential and sincere desire to perform college level academic work. Must be a member of a federally recognized tribe, at least part-time enrollment, and demonstrate financial need.

American Indian College Fund

This is not a single scholarship but is a number of scholarships we receive from the AICF with their own criteria and change every semester. Selections are to be decided by the Scholarship Committee.

Board of Trustees Scholarship

This scholarship has many different criteria. Scholarships are awarded to students with Perfect Attendance, Outstanding Community Involvement, and by Dept.: Applied Science, Humanities & Social Sciences, Education, Social Work, Lakota Studies, Agriculture, Math & Science, & Nursing. All students must have a minimum 3.0 overall GPA and Financial Need to be considered.

FINANCIAL AID REQUIREMENTS

All students must be aware of the following when applying for financial aid:

- A. The student must apply for all financial aid in a timely manner to determine if he/she will receive Financial Aid to help pay for his/her educational costs. The general rule is if you plan to attend OLC, your financial aid application should be completed the semester prior to registering for classes.
- B. Students are required to declare a major in order to receive any type of financial aid.
- C. Selected students must verify the information reported on the FAFSA. If a tax return was filed, an IRS Tax Return transcript and verification worksheet must be in the students file in the Financial Aid Office.
- D. Students must not be in default on a federal student loan or owe any type of federal student aid repayment.
- E. All applications should include Oglala Lakota College school code, which is **014659**. Students who need financial aid, are urged to contact the local District College center staff or the Financial Aid Office for general information. All Federal Financial Aid funding regulations state that a student receiving Federal Financial Aid must maintain satisfactory progress.

SATISFACTORY ACADEMIC PROGRESS POLICY

In order to qualify and receive Federal Student Aid, the U.S. Department of Education requires that students maintain satisfactory academic progress in a program of study that leads to a degree. Federal Student Aid includes Federal Pell Grant, Federal Supplemental Educational Opportunity Grant (FSEOG), and Federal Work-Study. Also, other agencies including tribal and scholarship programs may require students to maintain Satisfactory Academic Progress for their aid programs.

The entire academic record of all students will be monitored at the end of each semester to ensure compliance with the requirements specified below. Therefore, even the academic record of those who have not received Federal Student Aid in the past will impact future eligibility. Failure to meet the following standards will result in financial aid ineligibility for students who may have otherwise qualified for Federal Student Aid.

Satisfactory academic progress has both a qualitative and quantitative measure to monitor a student's progress toward a degree or certificate:

- A. Qualitative Requirement: Students must maintain a cumulative grade point average.
 - 1. Freshman (1-30 attempted credit hours) - 1.50
 - 2. Sophomore (31-60 attempted credit hours) – 2.00
 - 3. Junior (61-90 attempted credit hours) – 2.00
 - 4. Senior (91 or more attempted credit hours) - 2.00

- B. Quantitative Requirements: The students must demonstrate their pace of progression through their program of study. The pace is measured at the end of each term. The students must satisfactorily complete at least 67% of their attempted courses.

Examples:

Term 1	Term Pace	Cumulative Pace
9 hours completed	75%	$9/12=75\%$
12 hours attempted		
Term 2	Term Pace	Cumulative Pace
6 hours completed	50%	$15/24=62.5\%$
12 hours attempted		
Term 3	Term Pace	Cumulative Pace
12 hours completed	100%	$27/36=75\%$
12 hours attempted		

"Satisfactory Completion" means earning a passing grade of A, B, C, D, or P. Grades of I, W, or F are not considered passing grades.

If a student withdraws during the first three weeks of the term, it is not considered credit hours attempted. All courses withdrawn from the fourth week of the term to the end will be counted as credit hours attempted.

Incomplete grades are considered as attempted credit hours.

* Please see the Credit Hour Maximum Policy for the required completion rate to receive a degree at OLC.

Remedial Courses

Remedial courses (RW083A/B, RW093, Math083A/B, Math093) will be counted towards the students' overall pace of progression and the cumulative hours attempted.

Repeats

Courses that are failed or withdrawn from, then repeated, are considered in the hours attempted. Title IV funding can only pay a student one time for repeating a course that the student has passed with at least a D. In accordance with Title IV (PELL, FSEOG, FWS) regulations, test-out courses will not be paid for by Title IV aid.

Review

Following each semester, the Grade Point Average and number of credits attempted and completed for each Financial Aid recipient will be reviewed. All attempted classes are calculated to find the pace of progression, including those classes that were repeated. Students will be notified if they do not meet the minimum SAP requirements.

NON-SATISFACTORY ACADEMIC PROGRESS

Financial Aid Warning

If a Financial Aid recipient fails to meet the Satisfactory Progress Rule in a particular semester, the recipient will be placed on a Financial Aid Warning during the succeeding semester of enrollment. Students are still eligible to receive Financial Aid during the warning period, but they must satisfactorily complete 67% of their courses with a cumulative Grade Point Average of 1.50 for Freshmen and 2.0 for Sophomores, Junior and Seniors.

Financial Aid Suspension

If a Financial Aid recipient fails to comply with the SAP policy during the warning period, the student will be placed on Financial Aid Suspension status for Title IV Funding and OLC In-house Funding, with the exception of the “Books, Tuition, and Fees Scholarship”. The Suspension Status, however, would allow the student to receive outside funding at the discretion of the funder.

Appeal of Financial Aid Suspension

A student may appeal Non-Satisfactory Progress by completing the Financial Aid Appeal Form and submitting it with supporting documents to the Financial Aid Office by the 4th week of the next attending semester for an appeal of suspension status. Students who are applying simultaneously for OLC In-house Scholarships must also have their Appeal complete and submitted by the 3rd week of class during the Semester they plan to attend, in order for their appeal to be processed in a timely manner by Financial Aid Appeals Committee.

The student must provide:

- a. Reasons why he/she did not achieve minimum academic requirements which should include any type of extenuating circumstances they may have been experiencing at the time. Extenuating circumstances that will be considered include but are not limited to illness, death in the family, injury, casualty losses due to weather (blizzards, floods, tornado, mudslide, ground subsidence and other natural disasters), fire, theft, acts of God, or terrorism.
- b. An explanation of what has changed that will allow the student to make Satisfactory Academic Progress at the end of the next term.
- c. The appeal request will include an academic plan showing how the students will make SAP by the end of the next term.
- d. Students may have up to three appeals – but must be for different reasons.

The Appeal Committee will review the appeal and determine whether the Financial Aid appeal is accepted. The Appeal Committee’s decision is final. The student will be notified in writing of the decision for approval or reason of denial of his/her appeal no later than five days after receipt of such appeal.

- a. If the appeal is approved and the student **can** demonstrate that they can make Satisfactory Academic Progress in one term, they will be placed on **Financial Aid Probation** for one term.
- b. If the appeal is approved and the student **cannot** demonstrate that they can make Satisfactory Academic Progress in one term, they will be required to submit an academic plan. This plan has to show how they are going to get back on track in a reasonable time. The plan will demonstrate the students map to graduation. The academic plan will then replace the SAP standards. At the end of each term, the students’ Satisfactory Academic Progress will be measured against their plan. The students will have to follow the plan in order to receive financial aid. If the student fails or withdraws from any courses

on their plan, the student will again be required to meet the minimum SAP requirements in order to be eligible for any type of financial aid:

1. 67% overall completion rate
 2. 1.5 (Freshman) 2.0 (All other students) overall grade point average
- c. If the student's appeal is not approved, the student will not be eligible for financial aid until they meet the minimum SAP requirements and is able to complete their degree within the maximum timeframe policy.

Credit Hour Maximums (MaxPell)

The U.S. Department of Education has established a limit on the number of credit hours a student can attempt and still remain eligible for Federal Student Aid. This limit is based on 150% of the credit hours needed to complete the degree which the student is pursuing. This will allow for curriculum changes, repeats, and enrichment course work that may be required for the field of a degree.

Examples:

- A Two-Year Associate may be $60 \text{ credit hours} \times 150\% = 90$
- A Four-Year Bachelor may be $128 \text{ credit hours} \times 150\% = 192$
- A Two-Year Master may be $36 \text{ credit hours} \times 150\% = 54$

This includes all attempted Oglala Lakota College courses, with or without financial assistance, as well as all transfer credit hours that apply to the degree.

Academic Progress toward the degree program will be measured at the end of each semester. The student will receive an update on the amount of financial aid left with the satisfactory progress letter at the end of each semester.

If at any time it becomes mathematically impossible for a student to complete their program with the number of credits left in their 150% timeframe – the student is no longer making Satisfactory Academic Progress and not eligible for Title IV aid.

Pell Grant Lifetime Eligibility Used (LEU)

The amount of Federal Pell Grant funds a student may receive over his or her lifetime is limited by federal law to be the equivalent of six years of Pell Grant funding. Since the maximum amount of Pell Grant academic year funding a student can receive is 100% (amount can increase to 150% if attending full time summer courses that pertain to declared degree), the six-year equivalent is 600%. This is in effect as of the academic year 2012-2013. This includes all past Pell Grant awards each student receives.

Change of Major

Students wishing to change their major should notify the Registrar's Office in writing, who will then notify the Financial Aid Office so that a determination of eligibility for the new program of study can be made. Determination shall be based on credits attempted and earned that can be transferred into the new major.

Dual Majors

Students can only declare one major. Each semester, courses will be verified that they are on the students' current degree plan. All Title IV funding will only pay for courses that are on each student's degree plan or required pre-requisites. If a student chooses to take classes not on their status sheet, they will be liable for tuition and fees of the course(s) not on their degree plan.

Transfer Credits

Transfer credits earned at another institution that are accepted at Oglala Lakota College toward the degree a student is currently pursuing shall be used in computing the total credits attempted and earned.

Once a student earns a bachelor's degree, they are no longer eligible for a Federal Pell Grant.

RETURN OF TITLE IV FUNDS (POLICY)

Return of Title IV Funds occurs when a student withdraws from all classes without completing 60% of the semester. Upon the student's withdrawal, the amount of financial aid that has been "earned" by the student is based on the number of days of attendance. Students who withdraw unofficially will also be subject to the Federal Return of Title IV Funds Policy (R2T4). According to federal guidelines of R2T4, students who receive financial aid and then withdraw from all course work before 60% completion of the semester may have to pay back a portion of the grants received. The amount is determined by using a federal formula and the date the student has totally withdrawn from classes.

If Oglala Lakota College finds that the student's expected Cost of Attendance incurred up to the time of withdrawal exceeds the amount of funds disbursed, the student does not owe a repayment. However, if the disbursement was greater than the student's Cost of Attendance up to the withdrawal date, the student must repay the excess amount to Oglala Lakota College. It is the policy of Oglala Lakota College to reimburse the Federal Student Aid Program and collect repayment from the student. Thus, the student will be in a repayment situation with OLC rather than the Department of Education. OLC will collect the funds from students.

The date of withdrawal is based on the date indicated on the drop card (official withdrawal) or the last day of attendance according to student attendance records (unofficial withdrawal).

It is Oglala Lakota College's policy for our faculty to take attendance.

Post Withdrawal Disbursements

If the student received less federal aid than they earned, a post-withdrawal disbursement will be made to the student's account for direct costs. If further post-withdrawal disbursement is due, notification will be sent to the student if any grant amounts will be directly disbursed. The post withdrawal disbursement of Pell Grant funds must be completed within 45 days of the date the school determined the student withdrew.

All Refund Distributions are returned in this order as prescribed by Law and Regulations:

1. PELL Grant
2. FSEOG
3. Private, or Institutional Aid
4. The Student

Federal Work Study (FWS) wages are excluded because they have been earned.

Oglala Lakota College Student Accounts Office is responsible for notifying the student of the amount owed, for billing the student and for collecting the repayment.

The Director of Financial Aid will use the R2T4 PowerFAIDs Software for determining both the student's and institution's refunds.

BOOKS

Students who have completed the financial aid process and have been determined eligible and have enough financial aid may be allowed to charge their books. All others must pay for their books and supplies when they receive them. All previous accounts must be settled prior to the purchase of books for the current semester.

Books will be available at the district centers only on assigned days during the one week before classes begin and/or the first week of class. Students who do not get their books during this time period will have to pick up their books at the OLC Bookstore.

Students should call the bookstore with questions regarding returns and exchanges.

TUITION

A. Tuition

1. Undergraduate tuition at Oglala Lakota College is \$84.00 per credit hour for students whose attendance results in “per pupil funding”. *
2. Undergraduate tuition at Oglala Lakota College for any student whose attendance does not result in “per pupil funding” is \$103.00 per credit hour. *
3. Graduate tuition is \$115.00 per credit hour.

B. Documentation that results in Per Pupil Funding

1. Tribal Enrollment document that is received from the student or the Tribal Enrollment Office. A student can sign a release that allows the Registrar’s Office to obtain the tribal enrollment document from the Tribal Enrollment Office.
2. Tribal Lineage record that establishes that the student is a biological child of a member of a tribe, living or deceased, and this record is received from the student or Tribal Enrollment Office. A student can fill out a tribal lineage form that is accompanied with a birth certificate, and this form can be submitted by the student or the Registrar’s Office to the Tribal Enrollment Office.

*Students who have their tribal enrollment documentation on file with Oglala Lakota College Registrar’s Office does result in “Per pupil funding” and will not be affected by the higher tuition. Why is this documentation required? Simply, the College’s primary source of funding is a Public Law known as the

“Tribally Controlled Community College Assistance Act.” This law requires all who claim to be Native American to provide proof that they are an enrolled member of a Federally recognized tribe or have proof of tribal lineage from their biological parent(s). Any student who does not provide the Registrar’s Office with this information will result in “non-per pupil funding” and will not have the major portion of the cost of their education reimbursed to the College. Tuition and fees only cover a small fraction of the actual cost of a student’s education.

C. Tuition Assistance

1. Financial Assistance, scholarships and grants are available for those students who qualify.
2. Refunds will be made according to the refund policy.

D. Tuition Waiver for Veterans

Veterans may be granted tuition waivers. The tuition waiver is good for undergraduate courses only. To qualify, the Veteran must meet the following criteria:

1. Must have used all entitlement to, or not be eligible for, educational benefits, (Veterans benefits, Pell grants, Higher Education grants, Scholarships.)
2. Must have honorable discharge.
3. Must have served more than 181 days in the Military. (Proof of Military Service is DD-214).
4. Must be a first-generation college student.
5. Tuition waivers will be granted until the first bachelor’s degree is completed.

E. Veteran Debt Waiver

All Veterans that qualify for the tuition waiver and have debts with Oglala Lakota College will have these debts waived.

F. Members of Local Boards and Board of Trustees will be granted tuition cost waivers when no other financial aid is available or when sufficient financial aid is not available.

G. Withdrawal Refund

Students who withdraw voluntarily from Oglala Lakota College, after classes start, may be eligible for a refund of the tuition upon the approval of the Registrar and Financial Aid Officer. Refunds will be made in accordance with the following schedule:

Through the 3rd week: 100% refund

Starting the 4th week: 0% refund

H. Fees

1. The registration fee is \$40.00 per semester.
2. Lab fees vary in courses.
3. The technology fee is \$16.00 per credit hour.
4. These fees are non-refundable starting the 3rd week.

I. Review of Tuition and Fees Schedule

The Oglala Lakota College schedule of tuition will be reviewed annually.

LAB AND MATERIALS FEE

Policy

Fees for consumable materials and rented equipment are required in some courses. In these courses, the student is responsible for these fees at registration. The cost is normally covered for students on financial assistance. There are no refunds.

Procedure

1. Lab fees are defined as those fees for consumable materials and rental equipment required in a course. The students enrolled in such courses are responsible for these fees.
2. Instructors must prepare a generalized consumer list of anticipated materials and rental fees for any class which requires a lab fee. These lists must be attached to the course syllabus.
3. A student who believes that the class has received no benefits from their lab fees may submit a written complaint to the appropriate department chair and the Vice President for Instruction. If the department cannot document expenditures of 75% of the lab fees for that course to the satisfaction of the V.P. for Instructional Affairs, then the student shall be entitled to a pro-rated refund of those fees.
4. Lab fees will be assessed starting the second week of classes (50% refund week). Students withdrawing after the first week of classes or later shall not be entitled to any refund on lab fees.
5. Instructors will be able to draw down 50% of their initial lab fee money during registration week based on tentative class lists at that time.
6. Instructors shall base their lab fee's budget upon official class enrollment at the beginning of the second week of the semester. Subsequent change in enrollment figures for those classes will not result in lab fee budgets.
7. Monies collected as lab fees but not allocated by the last day of the semester shall be transferred to the college's general fund.

STUDENT ACTIVITY FEE

General Statement

It is the policy of Oglala Lakota College to collect a pro-rated activity fee based on enrollment per semester.

12 credits	\$50.00
9-11 credits.....	\$40.00
6-8 credits.....	\$30.00
1-5 credits.....	\$20.00

Authorization

The Oglala Lakota College Fiscal Office, specifically the Student Accounts Office, shall have the authority to collect the activity fee.

Procedure

Distribution

A. Formula

1. 10% Recreation Department
2. 20% graduation
3. 20% scholarships
4. 50% local student organizations
Beginning academic year 1984.

B. Criteria

1. Formal approval of student organization by-laws and officer election by local boards.
2. Budget approval by local boards of student organizations fees annually including changes.

TECHNOLOGY FEE

Based on the growth of the Oglala Lakota College in the area of technology, the demand has come from different departments to supplement more in the classroom, a technology fee improvement is needed. The fee is \$16.00 per credit hour. This fee will ensure the college will be able to meet its mission to the students to continue to assist in their education.

REGISTRATION FEE

All students are charged a registration fee of \$40.00 per semester.

STUDENT BILLING

Tuition, Fees, and Textbook Bill Collection

The Student Accounts Office at Oglala Lakota College will have the authority to make collections on all outstanding tuition, fees and book bills.

Any student whose attendance result in “per pupil funding” for Oglala Lakota College and who is not eligible for the full financial aid to cover all costs will have the amount of their tuition not paid recorded as student debt.

For these “per pupil funding” students who has a student debt, any OLC scholarship will have 50% of the scholarship support applied to their current semester’s student debt.

Any student whose attendance does not result in “per pupil funding” for Oglala Lakota College and who is not eligible for the full financial aid to cover all costs must pay their full tuition and fees by the end of the third week of classes. Failure to pay the full tuition and fees by the fifth week of classes will result in an automatic administrative withdrawal from classes at Oglala Lakota College.

If the student still wants to receive college credit for the courses, he/she has been taking, the student must adhere to the following requirements:

1. Pay your tuition bill at the end of the semester.
2. Continue attending classes and complete your coursework.

By the end of the semester, if paid in full, the student will be reinstated and receive the grade(s) earned. If the balance is not paid by the end of the semester, the student will have an outstanding debt with the college, and withdrawals will show on his/her transcript. Until the outstanding tuition and fees are paid in full, the student will not be allowed to register at Oglala Lakota College.

Students must apply for financial aid and sign an agreement for future financial aid to cover the cost of the semester that the deferred tuition and fees payment request is granted.

AUTHORIZATION

The Oglala Lakota College, specifically the Student Accounts Office, shall have the authority to collect the activity fees.

COMPUTER ACCOUNT AND NETWORK POLICY

Oglala Lakota College provides network access, including internet to students and staff to promote educational excellence. Network access provides resource sharing, innovation and communication to the Pine Ridge Reservation. Network users are responsible for their actions in accessing available resources. The user is responsible for making sure any information received does not contain pornographic material, inappropriate information, inappropriate language, or files that are potentially dangerous to the integrity of the hardware/software within school premises. Use of any information obtained via the network is at the user's own risk. Oglala Lakota College makes no warranties of any kind, whether expressed or implied, for the network facilities it is providing. Users must complete the User's Request Form to use college computers.

INSTRUCTIONAL DIVISION

Karla Witt., M.S., Vice President for Instruction
 Susanne Auer-Osborn, M.A., Director of Institutional Research/Assessment
 Vacant, General Education Director, Faculty
 Jonalynn Clifford, B.S., Assistant to the Vice President for Instruction
 Jonathan Derby, Administrative Assistant
 Phone: (605) 455-6035; Email: kwitt@olc.edu

The Instructional Division supervises all degrees and courses which grant college credit. These degrees and courses are offered through the academic departments.

OGLALA LAKOTA COLLEGE ACADEMIC PROGRAMS

<u>DEGREE</u>	<u>DEPARTMENT RESPONSIBLE</u>
---------------	-------------------------------

Master of Arts:

Lakota Leadership/Management	Graduate Studies
Secondary/Middle/Elementary Educational Administration Emphasis	Graduate Studies

Bachelor of Arts:

Early Childhood Education	Education
Lakota Studies	Lakota Studies
Leadership and Communications	Humanities & Social Science

Bachelor of Science:

Business Administration	Business
Information Technology	Math & Science
K-8 Elementary Education	Education
K-12 Lakota Studies Education	Education
Natural Science	Math & Science
Secondary Education Physical Science	Education
Social Work - BSW	Social Work

Associate of Arts:

Early Childhood Education	Education
Elementary Education	Education
General Business	Business
Graphic Arts	Humanities & Social Science
Lakota Studies	Lakota Studies
Life Science	Math & Science
Nursing	Nursing
Pre-Engineering	Math & Science
Tribal Law	Lakota Studies

Associate of Science:

Information Technology	Math & Science
------------------------	----------------

Associate of Applied Science: Automotive Technology, General Construction, Electrical Technology, and Office Technology.

Additional Programs: Secondary Education Certification (Business, Lakota Studies), Lakota Language Certification, Graduate Courses - offered through all departments. Education Endorsement certificates in Indian Studies, K-12 Special Education, and others based on course offerings that align with SD DOE requirements. Alternative certification coursework is available for individuals who have a bachelor's degree and have been hired by a school district to teach at the secondary level.

ATTENTION ALL NEW STUDENTS

Oglala Lakota College requires all new students to take the “OLC Placement” assessment (Reading Comprehension & Sentence Skills and Mathematics) to determine placement. The institution accepts the 10.1 equivalency in reading comprehension. The OLC Placement range for reading 10.1 includes the “Reading Comprehension” cut score of 65 on the classic Accuplacer or 241 on the Next Generation Accuplacer.

To be eligible for the Foundational Studies Scholarship, must meet the following cut scores:

- 241 for Reading Comprehension
- 234 for Elementary Algebra

Entering students whose scores do not meet the listed cut scores for 093 level placement will register in the College Academy of Readiness Fall/Spring (CARF) courses that will prepare them for college courses.

Students whose scores require Foundational Studies placement into RW093 Basic English II may concurrently enroll ONLY in the following college-level courses for two semesters. The following list of courses is recommended as these courses fulfill degree requirements and supplemental core learning abilities.

- Math 093 Basic Math II
- Lak 103 Lakota Language I
- Lak 233 Lakota Language II
- LArt 103 Lakota Traditional Art I
- LArt 113 Lakota Traditional Art II
- Art 103 Drawing I
- Art 133 Introduction to Watercolor
- Hum 143 Art Appreciation
- OED 103 Computer Basics (Vocational Education)
- CS 103 Ethics in the Workplace (Vocational Education)

Students placed in Foundational Studies courses may enroll in no more than 12 total credit hours, including the Foundational Studies courses.

All new students who are placed into RW 093 must achieve the required benchmark within two semesters.

Students who do not achieve the benchmark at each level after the second attempt at each course level will not be allowed to register for classes until they meet the 15-hour tutoring requirement or enrollment into the Summer Academy. Students must log in for 15 hours of tutoring time before they can return to the same course level. Students are responsible for documenting the required 15 hours of tutoring. Students will obtain the Foundational Studies tutoring log at each college center. The completed form can be turned into the Foundational Studies Director during registration in order to register for courses each semester.

These students may be at risk for not being able to continue and will be placed on Remedial Warning status and can only test one additional time prior to registering again. Referral to Voc-Education may be needed.

Transfer Students

Transfer students who do not have approved transfer college credit for Composition I and Elementary Algebra must complete the college readiness assessment.

Readmission Students

If a student has dropped out for more than two semesters and has not taken Engl103 or Math103, the student must complete the college readiness assessment.

OLC Placement Assessment Procedure

Students must complete the following:

- admission application,
- complete foundational studies review packet,
- receive their OLC student ID,
- schedule appointment to meet with proctor for assessment,
- must utilize their Student ID

Foundational Studies courses do not count toward total credit hour requirements for graduation.

COURSE NUMBERING SYSTEM

The course numbering system for OLC is designed to indicate the level of difficulty of courses offered at the College.

1. The prefixes indicate the subject area of a particular course. For example: Lak - Lakota Studies.
2. The first number indicates the academic level of the course:
 - 0 - developmental courses
 - 1 - freshman courses
 - 2 - sophomore courses
 - 3 - junior courses
 - 4 - senior courses
 - 5-7 - master's level courses
3. The second number indicates the sequence of courses.
4. The third number indicates the number of credits for the course. Zero (0) is used for courses which have variable credit.
5. L is the first letter of all Lakota Studies Department courses. The letters which follow indicate the academic discipline. For example: LSoc indicates a Lakota Studies course which is also a sociology course.

NEW STUDENT ENTRANCE PROCESS

1. All new students (including transfer students) must fill out an admission form for the registrar. Then the student will be issued an ID number. The ID number will be used to register the student for classes. Students must submit complete applications with supporting documents prior to admission (see OLC Policy 80-300). All new students must provide copies of their high school diploma or General Education Diploma (GED) and Degree of Indian Blood (DIB) to the registrar. Those students who are transferring from another institution must provide college transcripts as well as a diploma and DIB.
2. All new students (including transfer students without English or Reading credits) must complete the computerized Placement test. The results of these placement tests will determine if they will be referred to the College Academy of Readiness Summer program (CARS) or the College Academy of Readiness fall and spring program (CARF), are eligible for the Foundational Studies program-level courses (093) or can take college level courses without restrictions (see Foundational Studies, page 41 of the catalog).
3. Point of entry for Oglala Lakota College is in 093 level or higher courses. Students whose scores indicated a need for Foundational Studies instruction prior to entering college level courses shall register

in the appropriate Foundational Studies course. Students may enroll in no more than 12 credit hours, including the Foundational Studies courses. A student may not register for college level courses (except as indicated below) until he/she has attained a 10.1 grade reading comprehension level, as measured by the approved test. Developmental courses do not count toward total credit hour requirements. The following table illustrates what program the student's eligible after completion of the placement test.

4. Students are required to take the course in which they place within 2 semesters or subject to retest.
5. Engl 103 Composition I is a college-level core requirement which all students must take for any degree program. This course is designed to improve reading; study skills and writing needed for college success.
6. Math 103 is a required course for many Associate level degree programs. It is also the pre-requisite course for Math 134 Intermediate Algebra, the minimum core mathematics requirement for Baccalaureate programs.

Table 1. Program Placement

	CARS or CARFS	Foundational Studies	College Level courses
RW 083A Basic English I	X		
RW 083 B Basic English I	X		
RW 093 Basic English II		X	
Engl 103 Composition I			X
Math 083		X	
Math 093		X	
OMath or T MATH vocational ED only			X

College Academy of Readiness (CARS- Summer Program, CARF – Fall/Spring Program)

Students who are placed in RW 083A or B are referred to the college Academy of Readiness (CARS- Summer Program, CARF – Fall/Spring Program)

Students that place in the RW083 A or B sections will enter into a class structured to nurture and support them. If a student is placed in the RW083 A or B Foundational Studies courses the student is only permitted to register for that RW083 A or B course and/or the math 083 A and B courses if they have placed into that level. The Foundational Studies Department has partnered with the Community/Continuing Education Department to offer the 083 A/B levels. These courses will be offered in every center, and the courses are **Non-Pell eligible**. These courses do not count toward the students' overall pace of progression or cumulative hours attempted.

Foundational Studies Program –Point of Entry

If a student is placed in the RW 093 Foundational Studies courses, the student is only permitted to register for the following additional courses: Math 083 Basic Math I (Non-Credit), Math 093 Basic Math II, Lak 103 Lakota Language I, Lak 233 Lakota Language II , LArt 103 Traditional Lakota Art I, LArt 113 Traditional Lakota Art II, Art103 Drawing I, Art 133 Introduction to Watercolor, Hum 143 Art Appreciation, OEd 103 Computer Basics (Vocational Education), CS 103 Ethics in the Workplace

(Vocational Education), and may not register for more than 12 credit hours per semester. Upon successful completion of RW 093, the student is free to register for any courses in his/her program of study. Math course may be taken in sequence once placement is determined.

Students who do not achieve the 10.1 reading grade level after the second attempt at RW 093 level will not be allowed to register the following semester for classes until they meet the 15 hours tutoring requirement, or successful completion of the College Academy of Readiness Program - CARS. Students must log in 15 hours of tutoring before they can return to the same course level. Students are responsible for documenting the required 15 hours of tutoring time. Students can obtain the Foundational Studies tutoring log at each college center. The completed form can be turned into the Foundational Studies Director during registration in order to register for courses each semester by email or fax 455-2226.

Students, who cannot attain college readiness tests scores in reading comprehension after having taken developmental courses twice, will be referred to other services and cannot register for fully credited college courses. Foundational Studies Courses do not count toward total credit hour requirements for the degree program chosen by the student.

GENERAL EDUCATION FRAMEWORK

INTRODUCTION

Oglala Lakota College General Education refers to the teaching of knowledge, skills, and dispositions that the College envisions all its graduates to have, regardless of their degree. These characteristics are guided by OLC's unique mission and expressed in a general education goal and eleven general education student learning outcomes. The learning outcomes are grouped into six areas: Disposition, written and oral communication, quantitative reasoning, critical thinking, technology, and diversity. OLC's general education courses provide students with a foundation in these areas on which program-level courses expand.

GENERAL EDUCATION MISSION

Oglala Lakota College General Education provides opportunities for students to acquire and apply the skills and disposition necessary to become life-long learners and contribute to members of their diverse local and global communities through Wolakolkiciyapi.

GENERAL EDUCATION GOAL

Students will exemplify Wolakolkiciyapi – learning Lakota ways of life in community.

GENERAL EDUCATION OUTCOMES (GEO)

Upon completion of a degree program, the student should be able to:

Disposition

GEO 1: Apply cultural values in a learning atmosphere.

Written and Oral Communication

GEO 2: Communicate effectively in writing using both Lakota and English.

GEO 3: Demonstrate oral communication skills in both Lakota and English.

Quantitative Reasoning

GEO 4: Apply quantitative analytical skills.

Critical Thinking

GEO 5: Examine concepts and theories across multiple contexts and disciplines.

GEO 6: Critically review resource material.

GEO 7: Develop ideas to address contemporary issues.

GEO 8: Critically examine sovereignty

Technology

GEO 9: Demonstrate proficiency in the use of standard computer technologies.

Diversity

GEO 10: Examine the importance of diversity.

GEO 11: Examine the contexts of Lakota social organizations, communities and global networks.

Assessment Philosophy and Process

At Oglala Lakota College, assessment of student learning is an integral part of the institutional effectiveness process. The purpose of assessment is to enhance the opportunity for students to acquire and apply the knowledge, skills, and attitudes/values provided through all aspects of the teaching and learning process. Assessment takes place at the course, program, general education, and co-curricular level. Information obtained from the assessment of student learning is used to focus student development and learning, to promote growth among faculty and staff, to enhance the quality of academic programs, and to realize Oglala Lakota College's Mission and Vision in accordance with the strategic plan.

FOUNDATIONAL STUDIES PROGRAM DESIGN

PHILOSOPHY

All students are equipped to learn, but many come to us lacking the necessary building blocks and tools to succeed in college. Our open-admission college welcomes all students and provides them with the tools, support and advising through the Lakota Values of *Woc'ekiye* (Spirituality and Prayer), *Wa o'hola* (Respect), *Waun'sila* (Caring and Compassion), *Wowicake* (Honesty and Truth), *Wawokiye* (Generosity and Caring), *Wowahwala* (Humility), *Wowacintanka* (Fortitude), *Woksape* (Wisdom), *Wo ohitika* (Courage) that will prepare students for college and lifelong success within Lakota society and anywhere in the world.

"We believe we are measured by how well, or how little, we manifest virtue in our life's journey."
 -Joseph Marshall III, The Lakota Way.

VISION STATEMENT

To provide outstanding instruction, service, resources and support to students in the areas of developmental math, reading and writing within the context of best-practice, and research-based- methodology.

MISSION STATEMENT

Within the cultural context of Wolakolciciyapi and in a time efficient manner, the OLC Foundational Studies student will gain the abilities, strength and support to begin his/her college career, to persevere and succeed in his/her program of study, and to lead a fulfilling, productive life after college as a lifelong learner and contributing member of his/her society.

PURPOSE

The purpose of the Foundational Studies (FS) program is to recruit, welcome and nurture students, to correctly place them in courses that suit their abilities, and to support them emotionally as we teach them study skills, math, reading and writing so that they will be capable of doing high quality college level work as soon as possible.

Over 50% of entering students at OLC need remediation before they can enroll in 100 level Math or English classes. Even before they enroll in college, students are given the support (woawanyanke) necessary to help them succeed and develop into well-rounded, holistic, culturally rooted and contributing world citizens by the Foundational Studies Department.

The Official OLC Score-determined course placements are as follows as of May 2018

College Readiness Assessment Cut Scores		
Course	Entrance Score - Next Generation Accuplacer	Exit Score - Next Generation Accuplacer
RW 083A	Writing: 200 Reading Comprehension :200	Writing: 226 Reading Comprehension :226
RW 083B	Writing: 226 Reading Comprehension :226	Writing: 236 Reading Comprehension :236
RW 093	Writing: 236 Reading Comprehension : 236	Writing : 241 Reading Comprehension : 241
Math 083A	Arithmetic : 200	Arithmetic Score 220
Math 083B	Arithmetic : 220	Arithmetic 234
Math 093	Arithmetic score: 234 Quantitative Reasoning, Algebra, and Statistics (QAS): <234	Quantitative Reasoning, Algebra, and Statistics (QAS): 234

The Foundational Studies program works in concert with the Enrollment Management Department to coordinate recruitment, campus-wide student support, retention efforts, advising, cohort group development, extracurricular activity involvement and career/goal counseling. In addition, Foundational Studies is closely tied with the offices of Student Support, the Registrar, Financial Aid, and Assessment.

Curriculum alignments are ongoing with OLC's General Studies courses, especially Math and English, in order to promote student learning, a seamless and efficient course delivery system, sequential learning outcomes, and steady student progression through college, and attainment of goals.

PROGRAM GOALS (adapted from page 38 of the 2013-14 catalog...see page 38 for details)

1. Education and support of entering OLC students to ensure readiness for Math 103 and English 103, which are courses required in all OLC degree programs, as well as readiness for college life, and for all other General Education courses.
2. Outreach to future students who have not yet registered in OLC classes, and former students who did not yet complete all their developmental level courses.
3. Proper student placement and sequencing in pre-college courses.
4. Staff development for all developmental instructors with special emphasis on best-practices for in-class assessment, andragogy, attainment of learning outcomes and increasing student retention.

ROAD OBJECTIVE: OVERVIEW

The average student did not progress directly to college from high school, has not yet learned the skills necessary for college success, and is underprepared in one or all the following essential areas: Reading, Math, and Writing. The Foundational Studies Department provides a semester-long course for reading/writing, and a semester-long course pre-algebra. The department provides standardized placement testing to determine appropriate levels for students, differentiated instruction, college success guidance, and program of study advisement. A Reading Comprehension score of 10.1 and a Sentence Skill score 10.1 which correspond to the Lexile grade level of 10., and an Algebra score that is equivalent to the national 10.1 grade level are required for completion of the Foundational Studies program. (*Correlation Between Various Placement Instruments For Reading, Language/Writing Mathematics Elementary Algebra, Ellis, Sandra.*) Ideally a student will be fully prepared for English 103 and Math 103 within one year or less.

All new students (including transfer students without an approved transfer college credits for Composition I and Elementary Algebra) must complete the computerized Placement test. The results of these placement tests will determine if they will be referred to the College Academy of Readiness Summer program (CARS), the College Academy of Readiness fall and spring program (CARF), the Foundational Studies program level courses (093), or can take college level courses without restrictions. Foundational Studies courses, 093 levels, are offered campus-wide every semester. These courses are each 3-credit-hour courses, grades are A or F, no college credit is earned, yet the grades earned do apply to a student's G.P.A., and the courses are Pell eligible. These courses count toward the student's overall pace of progression and cumulative hours attempted. At least one 100 level course must be included in a Foundational Studies student's schedule, to receive Title IV funding. College Academy of Readiness fall/spring program courses are non-Pell eligible and are non-credit courses. Placement into Engl 103 Composition I does not limit the courses students may take; however, math courses must be taken in sequence determined by placement.

If a student is placed into the RW093 course of the Foundational Studies courses, he/she is only permitted to register for the following additional courses: Math 093 Basic Math II, Lak 103 Lakota Language I, Lak 233 Lakota Language II, LArt 103 Traditional Lakota Art I, LArt 113 Traditional Lakota Art II, Art103 Drawing I, Art 133 Introduction to Watercolor, Hum 143 Art Appreciation, OEd 103 Computer Basics (Vocational Education), CS 103 Ethics in the Workplace (Vocational Education), and may not register for more than 12 credit hours per semester. Upon successful completion of RW 093, the student is free to register without credit hours or course restrictions.

Students who do not achieve the 10.1 reading grade level after the second attempt at each course level will not be allowed to register for classes until they meet the 15-hour tutoring requirement. Students must log in 15 hours of tutoring before they can return to the same course level. Students are responsible for documenting the required 15 hours of tutoring time. Students can obtain the Foundational Studies tutoring log at each college center. The completed form can be turned into the Foundational Studies Director during registration in order to register for courses each semester by email or fax 455-2226.

Completion and progression are currently determined solely by the Accuplacer exit tests, but the Foundational Studies Department is in the process of developing our own exit tests, as well as other more holistic, culturally situated assessment tools, and a new grading system which will more accurately assess our learning outcomes and student progress.

Ideally, an entering student will begin their 093 levels in the fall. Students at the RW 093 level may take up to 9 additional credit hours, selected from the course choices above, for a total of 12 credit hours. When the student succeeds at the end of the second semester, he/she will proceed with strength to all college-level courses with no restrictions the following spring, summer or fall.

FACULTY

Foundational Studies faculty are experienced in, and knowledgeable about best practices in the field of Developmental Education, specifically at the post-secondary level so that they may serve the diverse needs of OLC developmental students. The faculty forms an important component of OLC's front lines in the field. These instructors work diligently to help rebuild the Lakota Nation through education.

FOUNDATIONAL STUDIES STUDENT LEARNING OUTCOMES:

RW 083A, Basic English 1 (Reading and Writing 1):

Students will learn how to develop sentences and correctly use basic grammatical structures. They will understand and apply Basic English grammar usage, capitalization, phrasing, and proper punctuation in their own writing. Through discussions and written assignments, they will demonstrate basic reading skills of comprehension, vocabulary and critical thinking. Students will demonstrate communication skills as they discuss and write about topics and readings. Students will learn basic word processing and study skills, as well as develop a familiarity with the college library and resources. Through culturally relevant reading materials, students will explore, embrace and discuss Lakota culture and society, which will in turn enhance self-esteem and motivation through traditional values.

RW 083B, Basic English 1 (Reading and Writing 1):

Students will apply their knowledge of sentences and correctly use basic grammatical structures to develop paragraphs and essays. They will apply Basic English grammar usage, capitalization, phrasing, and proper punctuation in their own writing. Through discussions and written assignments, they will demonstrate basic reading skills of comprehension, vocabulary and critical thinking. Students will demonstrate communication skills as they discuss and write about topics and readings. Students will apply their skills in word processing and study skills further their understanding of how to write effectively, as well as develop a familiarity with the college library and resources. Through culturally relevant reading materials, students will explore, embrace and discuss Lakota culture and society, which will in turn enhance self-esteem and motivation through traditional values.

RW 093, Basic English 2 (Reading and Writing 2):

Students will develop sentences, paragraphs, essays, and identify basic grammatical structures. They will understand and apply Basic English grammar usage, capitalization, phrasing, and proper punctuation in their own writing. Through discussions and written assignments, they will demonstrate reading skills of comprehension, vocabulary and critical thinking. Students will demonstrate communication skills as they discuss and write about topics and readings. They will begin to learn to respectfully critique the work of others. Students will learn basic word processing and study skills, as well as develop a familiarity with the college library and resources. Through culturally relevant reading materials, students will explore, embrace and discuss Lakota culture and society, which will in turn enhance self-esteem and motivation through traditional values. (*All RW 083 learning outcomes are reinforced in the RW 093 course.*)

MATH 083A, Basic Math 1: Arithmetic:

Students will understand basic arithmetic computations involving whole numbers, fractions and decimals. Students will use the symbols and properties of arithmetic and the correct order of operations. They will analyze and solve real world problems using arithmetic. Students will apply mathematical reasoning to everyday situations and clearly communicate their results. Students will demonstrate an awareness of mathematics within their own culture and in other disciplines.

MATH 083B, Basic Math 1: Arithmetic:

Students will understand basic arithmetic computations involving Ratios and proportions, percents, geometry, and integers. Students will use the symbols and properties of arithmetic and the correct order of operations. They will analyze and solve real world problems using arithmetic. Students will apply mathematical reasoning to everyday situations and clearly communicate their results. Students will demonstrate an awareness of mathematics within their own culture and in other disciplines.

MATH 093, Basic Math 2: Beginning Algebra:

Students will understand basic arithmetic computations involving whole numbers, integers, decimals, fractions and radicals. Students will use the symbols and properties of arithmetic, and the correct order of operations. They will analyze and solve real world problems using arithmetic and basic algebra.

Students will solve linear equations in one variable, identify and solve problems involving percents, ratios, proportions, measurement, unit analysis, conversions, and basic plane geometry. Students will apply mathematical reasoning to everyday situations and clearly communicate their results. Students will demonstrate awareness of mathematics within their own culture and in other disciplines. (*All Math 083 learning outcomes are reinforced in the Math 093 course.*)

All Foundational Studies Courses use the same syllabi, textbooks, supplemental readings, grading rubrics, worksheets, and computer-based learning tools. Computer software programs will be used no more than 50% of each class time period. Computer labs give immediate feedback and keep learning outcomes standardized across campus, enhancing instruction rather than replacing human interaction. For every three-hour Foundational Studies class, each student will be required to be present for an additional-hour on-campus study session each week.

Upon completion of the Foundational Studies program, a student is well informed and knowledgeable enough to fully participate in all courses requiring skills in arithmetic, basic algebra, reading comprehension, grammar usage, and writing, as well as successful study skills and mature behaviors for college success.

ADMISSION PROCEDURES

Please refer to the OLC catalog pages 11, 28, 30, 31 for admission requirements and procedures regarding placement testing and Foundational Studies placement.

Oglala Lakota College requires all new students to take the OLC Placement assessment (Policy 70-300). The institution accepts the 10.1 equivalence in math and reading comprehension.

PROGRESSION THROUGH FOUNDATIONAL STUDIES COURSES

College Readiness testing will only occur upon registration and at the end of each semester. Multiple attempts during the registration or completion periods are not permitted. Special exceptions must be approved by the Foundational Studies Department Chair.

Student course placement will be firm before the first day of classes each semester.

During the semester, instructors will develop and administer periodic assessments of student learning and progress. In addition, the course software has embedded assignments, quizzes and tests. The textbooks have problem sets and activities as well.

Student progress will be clearly communicated to students at all times, using the course software, Jenzabar, and orally with discretion. Midterms and final exams will be administered by instructors, and written assignments will be scored with a standardized rubric from the Humanities Department, to develop a holistic assessment of student progress. Currently the Accuplacer is used as the exit test and high stakes final grade at the end of the semester, but soon we will be using our own exit tests across all 11 college centers and will have a grading system in place that will be based on best practices for student reinforcement and engagement.

We have systems in place to support the students as they progress through the Foundational Studies courses and are developing more to support those students who do not progress so efficiently.

FS REGISTRATION WARNING

A student who fails or withdraws from a Foundational Studies course one time will be placed on a registration warning. They will be required to focus on their Foundational Studies courses and only be permitted to register for the courses listed in the College Readiness Assessment (Policy and Procedure) #70-300 until they complete their Foundational Studies course(s).

FS REGISTRATION HOLD

A student who fails or withdraws from a Foundational Studies RW course two times will be placed on a registration hold. They will not be permitted to register for any OLC college level courses until they meet the 15-hour tutoring requirement with documentation.

The above policies may be found on the OLC website. #70-300: College Readiness

ATTENDANCE

A Foundational Studies student who is absent/unexcused from three 3-hour classes in a row or five 3-hour classes overall may be withdrawn from the given class. Students must attend class until the last day of classes for the semester.

EARLY ALERT

The Foundational Studies Department will closely monitor student engagement, following up with early alert forms, conferences with students and counselors, referrals to Enrollment Management, tutoring services and support services.

SCHOLARSHIPS

Incentives can improve motivation and program completion rates so any registered student who scores 241 Next Generation Reading Comprehension test for the English scholarship and/or 245 on the Next Generation Quantitative Reasoning, Algebra, and Statistics test for the math scholarship will receive a one-time scholarship from the OLC Financial Aid office at the end of the given semester.

EXIT REQUIREMENTS

To complete the Foundational Studies program, students must demonstrate that they have the minimum sufficient skills to navigate college and succeed in college level courses. Students must be able to express themselves appropriately in writing with proper grammar, sentence structure, paragraphs, and essays. Students must have a working vocabulary and arithmetic/algebra skills equivalent to a 10.1 grade level. Assessments are embedded in the course curricula, the instructional activities, and the course lab software. A standardized assessment is currently in place.

Upon successful completion of the Foundational Studies program, a student will register for General Education classes and work toward their academic goals of a major program of study, a trade certification, etc. Students will be closely guided through this transition and process.

DATA GATHERING

Student retention, performance, test scores and completion data is systematically gathered by counselors, the Foundational Studies chairperson, the Registrar's office, and the Retention Director. The FS Department Chairperson organizes, analyzes and shares statistics with the FS department and the OLC Administration. This analysis informs future decision-making within the department and helps determine the effectiveness of the program. The full-time faculty members assist in data gathering, compilation and analysis. The information is also used to track student progress longitudinally through their college career. As the initial contact point for entering OLC students, the Foundational Studies Department plays a critical role in forming student relationships, scholarly habits and attitudes at OLC.

COMMUNICATION

At one time Foundational Studies offered over 40 sections of our courses per semester, across 11 college centers. Currently we offer 14 or more sections across the 11 centers. Communication of standard procedures, techniques and resources is a key component in the success of the Foundational Studies program. Counselors, center directors, part-time and full-time instructors, and administrative offices must be kept in close contact. The chairperson has an office at Piya Wiconi, teaches two or more courses per semester, regularly visits all college centers, meets with the FS Advisory Group, holds curriculum alignment meetings, and communicates regularly and openly with the OLC administrative offices. The full-time FS faculty are required to train and mentor part-time instructors and serve as crucial contacts with students and college center staff. In addition, they participate in and share developmental education research of best practices. They attend All-Staff, Instructional, departmental and committee meetings and share their experiences with colleagues. They are encouraged to attend national conferences to further develop their knowledge and skills.

Transparency of communication through all interest groups is essential to the success of the FS program. Placement test data is regularly compiled, analyzed and reported to the OLC Administration and Board of Trustees.

WOKSAPE TIPI
ACADEMIC & PUBLIC
Library and Archives
<http://library.olc.edu>

Sharon R. Janis, MLIS, Director
Taylor Janis, B.S., Circulation Clerk/Cataloger
Marilyn Frank, B.S., Branch Technology Librarian
Valerie Janis, MLIS, Archivist
Elena Cisneros, MFA, Assistant Archivist
Phone: 605-455-6069, Email: sharonrjanis@olc.edu

Woksape Tipi, *House of Wisdom*, is the academic and public library and archives located at the Piya Wiconi administrative campus. We serve twelve branch libraries located at the twelve college centers, including the Nursing Program, the He Sapa College Center in Rapid City, and the Cheyenne River College Center in Eagle Butte.

VISION AND MISSION STATEMENTS

Woksape Tipi is the foundation of resources and connection empowering the rebuilding of the Lakota Nation through education.

Woksape Tipi promotes, supports, and serves the students, staff, and faculty of Oglala Lakota College and community members of the Pine Ridge Reservation. Woksape Tipi cultivates and supports Lakota language learning, critical thinking skills, and lifelong learning among all Lakota people.

LIBRARY PROGRAM GOALS

TRIBAL: Woksape Tipi supports all students and graduates by promoting awareness, access, and use of the library and archival information resources that reinforce sovereignty and support a tribal workforce

CULTURAL: Woksape Tipi provides access to extensive Lakota linguistic, cultural, and historical resources

ACADEMIC: Woksape Tipi collaborates with department faculty to ensure a variety of source material available across the curriculum

COMMUNITY: Woksape Tipi ensures that community members have access to resources that support continuing education and community development needs with outreach services and public programming

LIBRARY PROGRAM SERVICES

Information Literacy Classes For Students, Staff, Faculty & Community Members

The Library Program centers on the Information Literacy Standards found on the OLC website under the Services Tab. The Program is assessed according to information literacy survey outcomes based on the knowledge practices of the Association of College and Research Libraries (ACRL) standards.

Students who are developing their information literacy abilities will be able to:

- **Identify topic and sources**
- **Find needed information**
- **Evaluate sources critically**
- **Apply their research sources in their work**
- **Acknowledge sources appropriately**

CO-CURRICULAR PROGRAMS

- Build Your Own Library is a donation driven partnership with Friends of the Pine Ridge Reservation and Little Free Libraries to make quality books accessible in each district
- Resource outreach and support to all college center libraries
- Lakota Arts and Humanities Series programming
- Archives *Ehanni etan takuku unkipi unpatanpi* (Gathering things from long ago that we are keeping) Introduction to Primary Sources

FREE LIBRARY SERVICES

- Grammarly Premium (Writing Tool)
- Interlibrary Loans (Print and online print materials, articles)
- Library Cards (No expiration, No late fees, fines or penalties)
- Print, Scan and Fax

ARCHIVES AND TRIBAL REPOSITORY

Purpose, Mission, and Goal Statements

The Oglala Lakota College Archives & Tribal Repository collects, preserves, makes available for research, and stores in trust the records and collections of historical, cultural, and scientific value to Oglala Lakota College and the Oglala Sioux Tribe.

The Archives and Tribal Repository collects, preserves, manages, and makes accessible historical and cultural records of the Oglala Lakota people, the Lakota Nation, and related Northern Plains tribal nations to promote the knowledge and understanding of the Oglala Lakota people in historical, cultural, and natural resources contexts.

To be an internationally recognized repository for Lakota-centered collections and research, education, and culturally appropriate preservation and conservation.

Collection Summary

Materials include *institutional records* of Oglala Lakota College and the Oglala Sioux Tribe; *artifact collections* of Oglala Lakota College and the tribal repository of the Oglala Sioux Tribe; *special collections*: manuscripts, audiovisual, photographs, maps, prints, and hard to find books and publications. These materials reflect traditional knowledge (TK) and research materials specific to the origins of the Titunwan Oyate and the Oceti Sakowin to the period after the Indian Reorganization Act (IRA) to contemporary tribal educational and institutional organizations.

AGRICULTURE EXTENSION DEPARTMENT

“USDA/NIFA 1994 Land Grant”

VISION, MISSION, AND VALUES

The Oglala Lakota College (OLC) Agriculture Extension Department’s vision is to be a:

“World Class 1994 Land Grant Institution”

Agriculture Extension Department supports the growth of the Pine Ridge Reservation’s land base through growth of human resources with research and community training toward a sustainable self-sufficiency with respect for Lakota cultural values by facilitating workshops for farmers/ranchers and tribal community members.

As a member of the USDA Land Grant 1994 programs, OLC’s Agriculture Extension Department’s mission is to: “Carry out the 1994 LGI legislation as it relates to the service of the Pine Ridge Reservation cliental needs based on the model of integration of research, academics, and community extension education for development of the Oglala Lakota Nation.”

Lakota cultural values are the foundation for the department’s values and belief system as they relate to the local natural resource base on the Pine Ridge reservation service area.

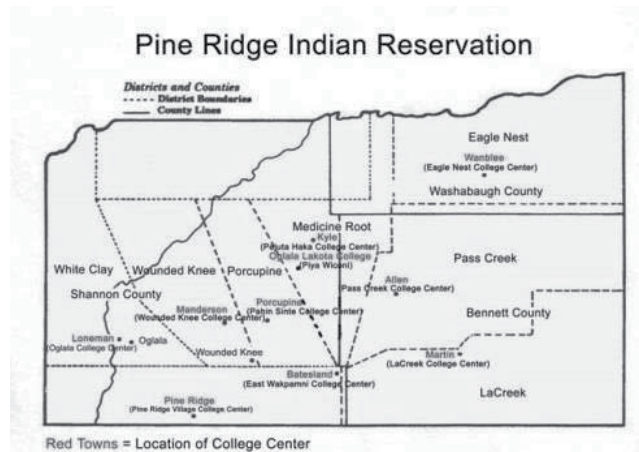

In performance of community training activities department staff value:

- Respect for Unci Maka “Grandmother Earth”
- Respect for all creation
- Lifelong learning
- Scientific research-based knowledge

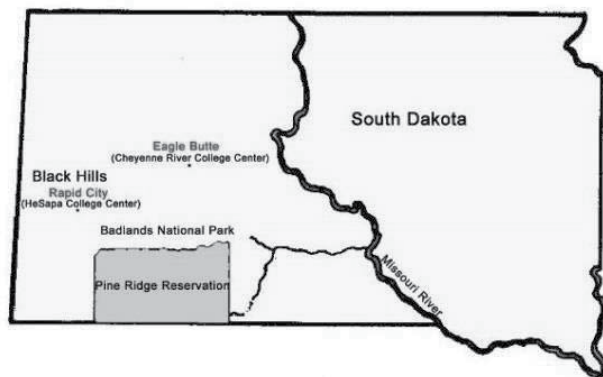

SERVICE AREA

The OLC Agriculture Extension Department is committed to provide community educational support to the Oglala Sioux Tribal communities and citizens within and bordering the Pine Ridge Indian Reservation within the college’s service area.

- Pine Ridge College Center
- Oglala College Center
- Wounded Knee College Center
- Pajuta Haka College Center
- Paha Sinte College Center
- Eagle Nest College Center
- Pass Creek College Center
- East Wakpamni College Center

AGRICULTURE EXTENSION STRATEGIC PLAN 2013-2018

Agriculture Extension staff, with stakeholder input, established this general strategic plan for its programming of community workshop/seminar training and services as they relate to agriculture activities and development of client self-sufficiency. This is a working document. Therefore, it is not rigid or prescriptive in nature. Its general principles are based on the national Land Grant vision proceeding with multi-year projects related to local issues/needs.

GOALS

- **Ag Expo Center:** To develop an Ag Expo Center for hosting community events, training, and value-added product development.
- **Advisory Boards:** To reactivate formally working agriculture advisory groups and continuation of current working advisory groups.
- **Support Community (or Community Support):** Support Community (or Community Support) training needs and coordinate with national, regional, and local USDA priority areas.
- **Improve Research Capacity:** Collaborative research programs related to food and agriculture to further indigenous knowledge in the areas of food, agriculture and land resources while supporting Lakota cultural views.

OLC AGRICULTURE EXTENSION STRATEGIC DIRECTION

The OLC Agriculture Extension department operates in an ever-changing dynamic world. Staff strive to maintain self-sufficiency and sustainability of community extension training programing based on current scientific research-based knowledge. Ag Extension staff members are committed to the development of local-based educational fact sheets to improve science-based knowledge as it relates to our area's agricultural issues.

GUIDING PRINCIPLES

The OLC Agriculture Extension department utilizes applied research methods to solve local issues relating to agriculture and natural resource planning/management in community-based training through workshops, seminars, and individual client ranch/farm/garden/home visits (and/or use of computer technology).

AGRICULTURE COMMUNITY TRAINING

Upon request, training is provided in the form of workshops/seminars/individual visits to agricultural clients within the OLC service. Past trainings have included organic gardening, food preservation, livestock management, range management, pest management, et cetera. Please contact department staff at (605) 455-6085 or 6084 or email Karla Witt at kwitt@olc.edu.

COMMUNITY/CONTINUING EDUCATION DEPARTMENT

Kateri Montileaux, Coordinator

Vacant, Assistant Coordinator

Phone: (605) 455-6142; Email: kmontileaux@olc.edu

The Community/Continuing Education Department began as the Adult Education department in 1973. The major component of the department was GED testing. In the years that following years, the department grew to include community education, life coping skill workshops, adult basic education and GED tutoring. The name of the department was changed from Adult education to Community/Continuing education. This was translated into Lakota Language as “Tiospaye Iciyohikeya Wounspe”, which means community and continuing education, which serves in the spirit of the mission and purposes of the College.

Community education is a philosophical concept that serves the entire reservation community by providing for all of the educational needs of its community members. It uses local resources to serve as the catalyst for bringing community efforts to meet their needs in addition to developing a positive sense of community, improving community living, and develop the community process toward the goal of self-actualization.

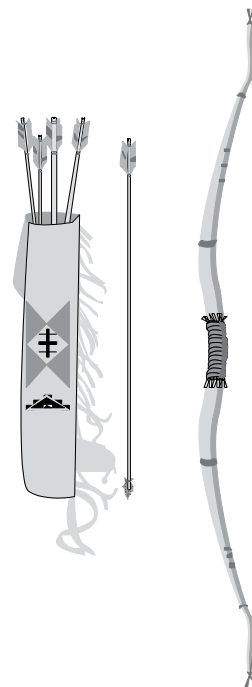

The Community/Continuing Education Department offers a program responsive to the needs of the people of the Pine Ridge Reservation. The department tutors are responsible for preparing students for taking their GED tests. The instruction provided for the student is on an individualized basis and set up to meet the individual needs of the student. Tutoring is provided at the district college centers.

The majority of Community/Continuing Education Department tutors are bilingual and live in the community they serve. The department offers lifelong learning through life coping skills workshops and continuing education.

Career counseling is another feature of the department. Each student completes a Career Occupational Preference System interest inventory. This inventory assists students in the selection of a career and allows them the opportunity to pursue their career choice.

Major components of the department are:

- A. **Adult Basic Education Skills Tutoring** in reading, writing, listening, speaking, and mathematics.
- B. **GED Tutoring** in high school subjects of writing, language arts, mathematics, social studies, and science.
- C. **GED Testing Services** is provided by Pearson VUE and we are a certified test center.
- D. **Life Coping Skills Workshops** are short courses in many areas such as consumer economics, job skills, law and government, Lakota culture and health.
- E. **Career Counseling and Job Seeking Skills**
- F. **Family Literacy** this may include Financial Literacy, Suicide Prevention, Bullying Prevention, and Counseling services available.

STUDENT SUPPORT SERVICES (TRIO) PROGRAM

Milton Fineran, Program Director, Piya Wiconi Campus

Phone: 455-6038-email: mfineran@olc.edu

Vacant, Program Data Assistant

Al Wounded Head, Counselor, Pahin Sinte CC-email: awoundedhead@olc.edu

Jerilyn Chasing Hawk, Counselor, Pejuta Haka CC-email: jchasinghawk@olc.edu

Amanda Blacksmith, Counselor, Pine Ridge CC-email: ablacksmith@olc.edu

Vacant, Counselor, He Sapa CC

The current Student Support Services program began at Oglala Lakota College in the summer of 1993. Serving 170 eligible students, the program has expanded and built upon its past success to serve 206 students per year. The project has received notification for its seventh funding cycle, which will take us to 2026. Funded to serve First Generation and Low-Income students with academic need, the staff, Peer Mentors and Tutors will work cooperatively with all District College Centers to provide assistance to program participants who can benefit from the following services:

Peer Mentoring

We provide freshmen and newer OLC students with peers who can assist them with meeting the expectations of a college environment. The Peer Mentors are successful students who have learned to overcome obstacles while maintaining full-time student status. They assist the staff with academic workshops, meet with freshmen on a “student to student” basis and provide tutoring.

Tutoring

We provide Tutors for students who are underprepared and need help with courses they find difficult. We call this “Supplemental Instruction” as the Tutoring is tied directly to the class requirements.

Academic Enrichment

Through advising, counseling, mentoring, skill building workshops and other activities for program participants, the staff and student workers foster an environment instilling “resilience” and long-term goal completion in its student participants. A grant aid scholarship is offered for those participant’s actively involved in the program and complete the academic year successfully.

Students with disabilities: The TRIO/SSS program assists those students with academic assistance only.

All SSS staff are alumni of Oglala Lakota College. Participants are required to maintain contact with program staff throughout their enrollment in college. Students who wish to receive services should complete an application during enrollment in the fall semester. Those with academic *need* are encouraged to seek program enrollment. For more information, go to the OLC homepage. The Piya Wiconi Office serves PCCC, LCCC, and CRCC; the Pine Ridge Office serves OCC and PRCC; the Pejuta Haka Office serves ENCC and PHCC; the PSCC office serves WKCC, EWCC and PSCC. Please Contact the SSS Counselor who serves your District College Center.

BUSINESS DEPARTMENT

Marry Monroe, M.B.A. Department Chairperson, Faculty
 Moreau Four Bear, M.S.A., J.D Faculty
 Dr. Lisa Brooks, M.P.T., Ph.D, Faculty
 Shawn Reinhart, M.B.A, Faculty
 Michael S. Knapp, M.A.M.S Faculty
 Rhea LeCompte, M.B.A., DBA Candidate, Faculty

VISION STATEMENT

Students will be provided the knowledge necessary to reach their maximum potential and are prepared to lead full and productive lives in the 21st century. The Oglala Lakota College Business Department ensures:

- Education excellence, equity, and high expectations for every student.
- Faculty will continually strive for excellence and stay abreast of the best practices in adult education.
- Development and maintain partnerships among educators, business, and the community that support high academic achievement and opportunity for all students.

MISSION STATEMENT

Oglala Lakota College Business Department will provide the breadth of business education necessary for students to be successful within their communities while maintaining wolakolkiciyapi. The Business Department faculty will:

- Ensure that high expectations are maintained for all students.
- Build support for higher education on the Pine Ridge Reservation.
- Create learning opportunities that lead to success and a desire to be lifelong learners.

We do these things to strengthen the Lakota Nation through education.

Associate of Arts in General Business

This is an associate degree intended for those who ultimately may decide to pursue a bachelor's degree. This program is designed to provide the student a basic education in business, while facilitating continuation of their education toward a bachelor's degree in Business, at a future date, without loss of credit. It is also suitable for those who seek an AA Degree from OLC, but plan to pursue further education at another accredited institution of higher education and want to ensure that their degree and/or credits fully transfer.

Associate of Arts in General Business

Program Learning Outcomes

Students will demonstrate the ability and skill to:

- 1 Evaluate the core functional areas of business including:
 - a. Ability to prepare, analyze, communicate, and use economic and financial information.
 - b. Ability to understand the duties of a manager: planning, organizing, directing and controlling.
 - c. Ability to use marketing to successfully perform in the business environment.
- 2 Demonstrate well developed written and oral business communication skills.
- 3 Ability to apply ethical decision models and fundamental legal concepts to business decisions.

2025-2026 Catalog

Credits

Note: BMath 153 Business Math does not fulfill the requirement of BAd 153 Applied Business Math

Grades of C or better are required in all business courses, unless the courses were taken prior to Fall 2011.

Grades of C or better are required in all non-business courses, unless the courses were taken prior to Fall 2023.

BACHELOR OF SCIENCE IN BUSINESS ADMINISTRATION

This is a bachelor's degree in business administration with a choice of one of four areas of specialization: Management, Accounting, Tribal Management or Entrepreneurship. Each degree provides a foundation of general business knowledge and skills, as well as specialized preparation for those who want to pursue a career in government, tribal programs or in private business.

Bachelors of Science in Business Administration

Business Core Program Learning Outcomes

Students will demonstrate the ability and skill to:

- 1 Evaluate the major functional areas of business including:
 - a. Ability to prepare, analyze, communicate and use economic and financial information.
 - b. Ability to understand the duties of a manager: planning, organizing, directing and controlling.
 - c. Ability to use marketing to successfully perform in the business environment.
 - d. Ability to coordinate the knowledge learned in program core courses in the formulation and administration of sound business policy.
- 2 Demonstrate well developed written and oral business communication skills.
- 3 Ability to utilize current technology to critically and creatively solve business issues.
- 4 Ability to apply ethical decision models and fundamental legal concepts to business decisions.
- 5 Ability to use critical thinking to construct quantitative and qualitative analysis of business problems.

OPTION A – Specialization in MANAGEMENT

1. Ability to evaluate and apply the functions of Human Resource Management
2. Demonstrate an understanding of small business by successfully completing a business plan.
3. Ability to understand organizational issues and human behavior to apply leadership styles necessary to effectively solve problems.

OPTION B – Specialization in ACCOUNTING

1. Recommend the appropriate managerial and business issues critical to analyzing accounting data and other information used for identifying and assessing opportunities and risks, developing organizational plans, allocating resources, and accomplishing objectives.
2. Recommend relevant accounting principles and standards to specific business activities and workplace situations.

OPTION C – Specialization in TRIBAL MANAGEMENT

1. Ability to select, apply for and manage a grant.
2. Integrate principles of management and personnel supervision in relation to tribal programs
3. Apply behavior approach management with an emphasis on the understanding, prediction, and control of human behavior in the tribal and organizational setting.

OPTION D – Specialization in ENTREPRENEURSHIP

1. Determine individual leadership techniques to best suit a small business.
2. Assemble a report in relation to the marketing research conducted for a business.
3. Construct a business plan integrating reservation issues, licensing, tribal laws and codes

Applied Business Math

Grades of C or better are required in all business courses, unless the courses were taken prior to fall 2011.

Grades of C or better are required in all other courses, unless courses were taken at OLC prior to Fall 2023

BUSINESS COURSE DESCRIPTIONS

ACCOUNTING

ACCT 103 Principles of Accounting I

Prerequisite: Math 103 & MIS 113, 3 credits

An introduction to accounting where emphasis will be placed on the accounting cycle and double-entry accounting.

ACCT 203 Principles of Accounting II

Prerequisite: ACCT 103. 3 credits

An introductory course in the accounting cycle, including accounting concepts and principles used to analyze and record transactions in a business environment. The study and preparation of payroll and applicable laws and regulations will be studied. Transactions are focused on basic accounting systems, advanced accounting systems, cash and receivables.

ACCT 303 Intermediate Accounting

Prerequisite: ACCT 203. 3 credits

A more in depth study of accounting concepts and principles with emphasis on accounting for income statement and statement of cash flows, income measurement, balance sheet, and value of money.

ACCT 343 Governments/Non Profit Accounting

Prerequisite: ACCT 203. 3 credits

The Governmental and Non-Profit Accounting course is an examination of the basic accounting concepts and practices used in governmental and non-profit agencies. The student will gain a thorough understanding of the financial activities of non-profit and governmental agencies, budgetary accounting, and reporting procedures.

ACCT 353 AIS-Accounting Information Systems

Prerequisite: ACCT 203. 3 credits

An accounting course that provides experience with computer-based application software programs.

ACCT 393 Managerial Accounting

Prerequisite: ACCT 203. 3 credits

This course focuses on decision-making in organizations, where the decisions involve the generation, analysis, or use of financial information. The major topics in this course include the use of accounting in making alternative choice decisions, the development and use of product cost information, and the use of accounting information for managerial planning and control. Throughout the course, a managerial viewpoint is stressed.

ACCT 423 Advanced Accounting

Prerequisites: ACCT 303. 3 credits

A more in-depth study of accounting concepts and principles with emphasis on Investments, liabilities, income taxes, pensions and postretirement benefits, shareholders' equity, accounting changes and adjustments for errors and in-depth concentration of the statement of cash flows.

ACCT 453 Auditing

Prerequisite: ACCT 203. 3 credits

A study of audit procedures including professional standards, professional ethics, legal liability, audit evidence, planning the audit, and internal controls.

ACCT 496 Accounting Internship

Prerequisite: Department Chair Approval. 6 credits

Student will observe and experience business operations in the field of accounting, while completing a hands-on administrative/low-level managerial internship at a local business or organization of their choosing subject to the Academic Advisor approval. Students will maintain a weekly log of activities and keep a written journal describing their experiences, what they have learned and do a self-evaluation. Students will work for 180 hours in the workplace.

BAd 133 Introduction to Business

Prerequisite: Engl 103. 3 credits

This course is a comprehensive, updated introduction to all key business functions: management, marketing, accounting, finance and information technology. Core topics highlighted within these functional areas include ethics and social responsibility, small business concerns, different forms of business ownership and operations of small businesses. The course is structured around the main components of a business plan from introduction to executive summary.

BAd 143 Personal Finance

Prerequisite: 3 credits

This course is designed to teach students how to manage their own personal budget, achieve good credit, understand various types of insurance, understand investment practices, and how to plan for retirement.

BAd 153 Applied Business Math

Prerequisite: Math 134 or higher. 3 credits

This course focuses on mathematics procedures and processes used in the business and financial world. It can replace Math 154, College Algebra on the business status sheet. This course may not prepare students for continuing in mathematics and Math 154 may be a better choice for students contemplating graduate school.

BAd 243 Business Law

Prerequisite: BAd 133 an Engl 113. 3 credits

An introductory course of the principles of law as they apply to citizens and businesses. The course will include an understanding of the court system at the local, state, and national level. Students will gain an understanding of contract law, their rights and responsibilities as citizens, utilization of financial transaction, employment and agency relationships and the understanding of the regulations governing different types of business organizations.

BAd 253 Principles of Management

Prerequisite: BAd 133. 3 credits

This course provides an in-depth exposure to the practice of management in modern business. Topics include: the management functions of planning, decision-making, organizing & staffing, communicating, motivating & leading, and evaluating & controlling; the various styles and characteristics of successful managers; and management challenges facing today's firms.

3 credits

BAd 263 Principles of Marketing

Prerequisites: BAd 133. 3 credits

An overview of the field of modern marketing, with detailed emphasis on: the marketing concept; strategic marketing – with environmental scanning and internal audits; social responsibility and ethics in marketing; marketing research & information systems; consumer behavior & organizational markets; products, the product life cycle, product management, branding-packaging-labeling; the marketing of services & service quality.

BAd 303 Human Resource Management

Prerequisites: BAd 253 and BAd 333 (Co-requisite). 3 credits

This course covers the principles and techniques of human resource management including legislation affecting employers today. It also covers the human resource functions of procurement, organization, development, compensation, integration, management and separation.

BAd 313 Organizational Theory & Behavior

Prerequisite: BAd 253 and BAd 333 (Co-requisite). 3 credits

This course is a behavior approach to management with emphasis on the understanding, prediction, and control of human behavior in the organization setting. Topics include individual behavior, interpersonal and group behavior, environmental adaptation and organizational effectiveness.

BAd 333 Business Communications

Prerequisite: BAd 133 and Engl 113. 3 credits

This course covers modern practices in the preparing, planning, writing and dictating all types of business letters and reports that are commonly required in business operations.

BAd 343 Quantitative Business Analysis

Prerequisites: SoSc 313 and BAD 153 or Math 154. 3 credits

This course introduces a collection of quantitative tools designed to enhance managerial decision-making process. Topics to be covered in this course include counting rules, measures of central tendency and dispersion, distributions (including normal and binomial), sampling and estimation, hypothesis testing, decision theory, forecasting, inventory control models, linear programming, project management techniques, queuing theory, and statistical quality control.

BAd 363 Business Finance

Prerequisites: Acct 203 and BAD 153 or Math 154. 3 credits

This course provides an introduction to business finance with an emphasis on the use of information from the three basic financial statements to do ratio analysis, financial forecasting, and calculate the degree of business leverage. In addition, working capital & cash management, short-term financing, the time value of money concept, the cost of capital, and various valuation methods are discussed.

BAd 373 Grants Proposal Writing & Management

Prerequisites: Acct 103 and BAd 333. 3 credits

This course provides “hands-on” instruction in developing a team to address a need, write a comprehensive Grant request proposal, and find appropriate sources of funding. Student teams will actually research, write and present a complete mock-Grant Proposal as the culminating class exercise.

BAd 383 Business Ethics & Social Responsibility

Prerequisites: BAd 253 and BAd 333. 3 credits

This is a study of ethics and social responsibility as they relate to issues, conflicts, decision-making, and program development in business today. The impact of business activities on stockholders, employees, communities, the environment, and society in general are discussed in detail.

BAd 413 Reservation Entrepreneurial Operations

Prerequisite: BAd 253 and BAd 333. 3 credits

This course will provide students with knowledge on land status issues common to the area, business financing and special circumstances as they apply to the reservation, Tribal tax laws, Tribal Business Licenses, Tribal Uniform Commercial Code, and Marketing on/off the Reservation. This course is specific to businesses on the reservations.

BAd 423 Organizing & Operating a Small Business

Prerequisites: BAd 303, BAd 363 and Acct 393. 3 credits

This course identifies the key issues and requirements involved in the start-up, financing and operation of a small for-profit business. Coursework culminates in the writing and presentation of a mock-Business Plan, detailing a fictional firm of the student's choice that is suitable for soliciting financing.

BAd 443 Problems in Business

Prerequisites: BAd 343. 3 credits

Important issues and problems in business today are reviewed during the first half of the semester. Students then proceed to guide independent research in an area of personal interest to them, culminating in the writing and presentation of a significant Research Paper on the selected business issue.

BAd 453 Seminar in Strategic Management

Prerequisites: Must be taken in final semester & BAd 363. 3 credits

This is the capstone course for graduating seniors in Business Administration, studying the role of top managers in developing and implementing an organization's strategies. Extensive student participation and presentations occur in the seminar format, with the case study method used to analyze strategic theory and actual business applications.

BAd 463 Tribal Planning & Administration

Prerequisite: BAd 363 and BAd 333. 3 credits

This is an applied course in the principles of management and personnel supervision, as they relate to Tribal programs. Emphasis is on: understanding and solving personnel problems, writing program objectives, defining activities to be done, effective planning, the direction & evaluation of a Tribal program, managing budgets, and studying the interrelationship between various programs and Tribal governments.

BAd 473 Marketing Research

Prerequisite: BAd 263, BAD 153 or Math 154 and BAd 333. 3 credits

Introduces students to the planning, collection, and analysis of data relevant to marketing decision making, the understanding and communication of the results.

BAd 483 Leadership

Prerequisite: BAd 253 and BAd 333. 3 credits

Taking a college course on leadership will not make you a leader, that's not how it happens. Studying leaders and leadership will help you develop the qualities and traits that do. Students in this course will learn the traits, styles and different types of leaders. Attention will be paid to self-leadership, one on one leadership, team leadership and organizational leadership. The different skills for effective leadership will be studied.

BAd 490/493 Senior Special Topics in Business

Prerequisite: Department Chair Approval

Studies in various special business topics at the senior level, courses are offered as student and/or community interest indicates and appropriate instructors are available. Course content may change from semester to semester; thus, the class may be taken more than one time, when different topics are offered. Course credit offered may vary, depending upon the particular subject matter and content.
credit – variable.

BAd 496 Business Internship

Prerequisite: Department Chair Approval. 6 credits

Students will observe and experience business operations in a variety of functional areas, while completing a hands-on administrative/low-level managerial internship at a local business or organization of their choosing subject to the Academic Advisor approval. Students will maintain a weekly log of activities and keep a written journal describing their experiences, what they have learned and do a self-evaluation. Students will work for 180 hours in the workplace.

Econ 203 Principles of Microeconomics

Prerequisite: Math 103 or higher. 3 credits

This course is designed to give students an understanding of basic economic concepts, such as supply and demand, the operation of the price mechanism, substitute goods, economic trade-offs and opportunity cost, which affect the activities of businesses and consumers in a capitalist market economy. Emphasis is also given to the Mixed Economy, and how the student becomes part of it on, or off, the reservation.

Econ 213 Principles of Macroeconomics

Prerequisite: Math 103 or higher. 3 credits

This course is designed to give students an introduction to the principles underlying economic processes, such as: the nature of the free enterprise system; income & consumptive spending; the money & banking systems; national output, income and the gross national product; monetary & fiscal policy; and unemployment & inflation as they relate to governmental decision-making and the national accounts.

Econ 333 Economic Issues on Reservations

Prerequisites: Econ 203, Econ 213 and BAd 333. 3 credits

This course provides an understanding of the unique dynamics of Reservation Economies that affect the lives of Native Americans. Topics include: the economic impact of treaties and their changing interpretation by government; the effect of Federal Department, Agency and Program (such as: Agriculture, BIA, HUD, WIC and Economic Empowerment Zones) activities on reservation economies, job opportunities, citizen attitudes, etc. The roles of education, Tribal government, the relevant State government, and other reservation-specific issues will be discussed.

EDUCATION DEPARTMENT

Dr. Shannon Amiotte, Ed.D., Dean of Education
 Vacant., IPD Coordinator
 Wicapi Win Waste Yellowhawk, Secretary
 Ramona Pourier, M.Ed., Assistant Professor
 Brian Dodge, M.Ed., Assistant Professor
 Martin Red Bear, Jr., M.Ed., Assistant Professor
 Lowell Phillips, S.ED., Assistant Professor
 Vacant, Education Instructor, CRCC

MISSION AND VISION STATEMENTS

Teacher Preparation Vision Statement: To graduate highly qualified professional, motivated, reflective teachers who possess and practice **Wolakolkiciyapi** in a multicultural, changing world. The professional teacher education program views **Wolakolkiciyapi** as reflection and conduct of the Lakota virtues as a means of improving self and others.

Teacher Preparation Mission Statement: Graduates from our programs will be proficient as competent reflective teachers of content, theory, and application with an emphasis on Lakota Virtues (character education) while emphasizing community empowerment through reflection of traditional Lakota perspectives.

DEGREES, CERTIFICATIONS & ENDORSEMENTS

ASSOCIATE OF ARTS DEGREE IN EARLY CHILDHOOD: This degree prepares individuals to work as paraprofessionals with infants and young children from birth to 5 years of age in early childhood and preschool settings. This degree tracks into the B.A. in Early Childhood degree.

Learning Outcomes:

P1.LO1: Candidates demonstrate Lakota cultural values in all learning contexts.

P1.LO2: Candidates recognize the diverse influences impacting the development and learning of young children and effectively utilize strategies to enhance the learning potential of all children.

P1.LO3: Candidates recognize the importance of co-curricular activities, involving respectful family and community relationships, to enhance the learning potential of young children.

P1.LO4: Candidates will engage in reflective activities to gain an understanding of developmentally appropriate practices in educating young children.

BACHELOR OF ARTS IN EARLY CHILDHOOD EDUCATION: This degree was developed based on the National Association for the Education of Young Children (NAEYC) initial licensure standards for teacher preparation programs. This degree has two emphasis options: 1) Birth to Preschool, to earn a Bachelor of Arts Degree in Early Childhood Education as required by Head Start and 2) Birth to Grade 3, to earn a Bachelor of Arts Degree in Early Childhood Education and South Dakota Department of Education teacher licensure. Candidates pursuing this option must pass the required Praxis Series content and pedagogy area exams to be eligible for graduation and state licensure. Students pursuing the Bachelor of Arts in Early Childhood Education degree must meet the entrance requirements of the Teacher Preparation Program.

Learning Outcomes:

P2.LO1: Candidates demonstrate Lakota cultural values in all learning contexts.

P2.LO2: Candidates recognize the diverse influences impacting the development and learning of young children and effectively utilize strategies to enhance the learning potential of all children.

P2.LO3: Candidates demonstrate proficiency integrating solid content knowledge and sound pedagogical understandings to design and implement academic and co-curricular experiences that include families and communities to promote positive development and learning for young children.

P2.LO4.1: Candidates demonstrate understanding of the goals, benefits, and uses of effective assessment strategies to positively impact the learning and development of young children.

P2.LO4.2: Candidates engage in continuous, reflective learning, following ethical guidelines to make informed decisions to advocate for young children and their families.

ASSOCIATE OF ARTS DEGREE IN ELEMENTARY EDUCATION:

This degree prepares individuals to work as paraprofessionals in K-12 educational settings. This degree tracks into the B.S. in K-8 Elementary Education.

Learning Outcomes:

P3.LO1: Candidates demonstrate Lakota cultural values in all learning contexts.

P3.LO2: Candidates utilize developmental concepts and theories to construct learning opportunities that support the individualities of children and young adolescents.

P3.LO3: Candidates demonstrate proficiency in content area concepts when planning academic and co-curricular learning activities, projects, and explorations for students, families and communities that augment learning experiences.

P3.LO4: Candidates engage in reflective practices to develop an understanding of best practices for teaching and learning.

BACHELOR OF SCIENCE DEGREE IN K-8 ELEMENTARY EDUCATION:

Successful completion of this degree prepares the student to teach grades K-8 with Middle Level endorsements in the state of South Dakota. This program is aligned to the Council for the Accreditation of Education Preparation (CAEP) Elementary Teacher Preparation Standards for initial teacher licensure. Candidates need to meet entrance requirements and pass the required Praxis Series exam to be admitted to the Teacher Preparation Program. Candidates also need a passing score on the required Praxis Series pedagogy examination prior to student teaching and to meet graduation and licensure requirements.

Learning Outcomes:

P4.LO1: Candidates demonstrate Lakota cultural values in all learning contexts.

P4.LO2: Candidates utilize developmental concepts and theories to construct learning opportunities that support the individualities of children and young adolescents.

P4.LO3.1: Candidates demonstrate proficiency in content area concepts when planning academic and co-curricular learning activities, projects, and explorations for students, families and communities that augment learning experiences.

P4.LO3.2: Candidates develop and implement instructional units that demonstrate sound pedagogical practices to foster active engagement in learning, critical thinking, and problem solving for K-8 students.

P4.LO4.1: Candidates utilize formal and informal assessment strategies to monitor and plan for instruction that will promote continuous growth and learning for K-8 students.

P4.LO4.2: Candidates engage in continual reflective practices connecting educational research and the impact of their professional decisions on students and families.

BACHELOR OF SCIENCE DEGREE IN K-12 LAKOTA STUDIES:

This degree, in cooperation with the Lakota Studies Department, gives graduates the South Dakota Indian Studies credential which allows them to teach Lakota Studies and related subjects in K-12 Education. This

program is aligned with the Interstate New Teacher Assessment and Support Consortium (InTASC) standards adopted by the South Dakota Board of Education as the South Dakota Teacher Competencies. Candidates need to meet entrance requirements and pass the required Praxis Series exam to be admitted to the Teacher Preparation Program. Candidates also need to pass the required Praxis Series pedagogy exam prior to student teaching and to meet graduation and licensure requirements.

Learning Outcomes:

P5.LO1: Candidates demonstrate Lakota cultural values in all learning contexts, and demonstrate proficiency in the acquisition, understanding, and use of the Lakota language.

P5.LO2: Candidates utilize developmental concepts and theories to construct learning opportunities that support the individualities of K-12 students.

P5.LO3: Candidates exercise their understanding of Lakota history, culture, and psychology combined with sound pedagogical practices when developing and implementing instructional units in order to engage and motivate K-12 Lakota students, and their families and communities, in academic and co-curricular activities.

P5.LO4.1: Candidates utilize culturally relevant authentic assessments to evaluate student learning and achievement.

P5.LO4.2: Candidates engage in continual reflective practice to connect culture, language, and content in meaningful ways to develop cultural competence.

BACHELOR OF PHYSICAL SCIENCE DEGREE: This degree offered in conjunction with the Mathematics and Science Department leads to a Bachelor of Science Degree in Secondary Education. Students are offered a strong background in Mathematics, Physics, Earth Science, and Chemistry. The program is aligned with the National Science Teachers Association (NSTA) Science Standards for Teacher Preparation. Candidates need to meet entrance requirements and pass the SD DOE required content knowledge credit hours or Praxis Series content exams relevant to this degree to be admitted to the Teacher Preparation Program. Candidates also need to pass the required Praxis Series pedagogy exam prior to student teaching and to meet graduation and licensure requirements.

Learning Outcomes:

P6.LO1: Candidates demonstrate Lakota cultural values in all learning contexts.

P6.LO2: Candidates develop learning activities and explorations that convey the important concepts, ideas and principles of contemporary science to secondary students.

P6.LO3: Candidates engage a variety of strategies and methodologies when developing instructional units that engage students in scientific and technological processes while maintaining a safe and supportive learning environment.

P6.LO4.1: Candidates develop effective assessment strategies and utilize the results to guide and modify instruction.

P6.LO4.2: Candidates demonstrate ethical practices as they involve students in scientific studies related to locally important issues and effectively collaborate with community agencies in co-curricular scientific explorations.

EXCEPTIONAL EDUCATION PREPARATION PROGRAM IN K-12: This preparation program leads to an endorsement in K-12 special education that may be added to a professional or advanced South Dakota educator certificate. Coursework is offered for both undergraduate teacher candidates and certified teachers. The program is aligned to the Council for Exceptional Children (CEC) performance-based standards for initial special education teacher licensure. Candidates complete the required coursework, complete a special education practicum and, if working towards alternative certification, must pass the Praxis Series special education exam required for licensure.

Learning Outcomes:

P7.LO1: Candidates demonstrate Lakota cultural values in all learning contexts.

P7.LO2.1: Candidates demonstrate understanding of special education principles, theories, laws and policies conjoin with diverse human issues to impact the delivery of special education services.

P7.LO2.2: Candidates distinguish the similarities and differences in human development and the characteristics of K-12 students with special learning needs in order to provide individualized instruction that is meaningful for the student.

P7.LO3: Candidates utilize evidence-based instructional strategies to modify learning environments and curricula to enhance learning experiences, promote positive self-esteem, build life skills, and engage students in critical thinking and problem-solving activities.

P7.LO4.1: Candidates develop long-range individualized education plans that are translated into shorter-range goals and objectives based on an individual's abilities and needs and modified based on assessment of the individual's learning progress.

P7.LO4.2: Candidates demonstrate ethical practices and effectively collaborate in co-curricular activities with families, other educators, related service providers, and community agencies to advocate for the learning and well-being of individuals with special educational needs.

K-12 INDIAN STUDIES ENDORSEMENT: The program is available for teacher candidates and certified teachers who wish to add the South Dakota Indian Studies endorsement to their South Dakota certification. Completion of this program allows those attaining such to teach related subjects in a K-12 setting. No Praxis Series content exam is required to validate this endorsement; however, relevant coursework is required.

RECERTIFICATION CREDITS AND EDUCATION ENDORSEMENTS: Oglala Lakota College offers a variety of coursework that may be utilized for teacher licensure renewal and/or that may lead to additional teaching authorizations in the state of South Dakota. Individuals who wish to expand the content or age range span of their teacher licensure are encouraged to visit the South Dakota Department of Education (SD DOE) website, <https://doe.sd.gov/certification/>, for more information.

ALTERNATIVE CERTIFICATION: Oglala Lakota College offers a variety of courses that may be utilized to meet coursework requirements for South Dakota Department of Education alternative certification requirements. Individuals who are considering or who have been approved for alternative certification are encouraged to visit the South Dakota Department of Education (SD DOE) website, <https://doe.sd.gov/certification/>, for more information.

STATE CERTIFICATION REQUIREMENTS

All applicants for South Dakota Teacher Certification must submit verification of meeting minimum content credit hour requirements or passing scores on the Praxis Series examinations for each content area of authorization and for the pedagogy examination that matches the applicant's preparation. In addition, applicants must submit verification of suicide awareness and prevention training. For additional Praxis information visit the Educational Testing Service (ETS) website at <http://www.ets.org/praxis>. For more information regarding South Dakota Teacher Certification visit the South Dakota Department of Education (SDDOE) website <http://www.doe.sd.gov/certification/>. Further information about suicide awareness and prevention training information is available at <http://www.doe.sd.gov/SuicidePrevention>.

EDUCATION DEPARTMENT FOUR DIRECTIONAL MODEL

***Wiohpiyata* (West): General Education Admission / Entrance Requirements**

Wiyopheyata, the cardinal direction of west, is represented by the color black. The cycle begins in the west and continues clockwise. This direction is also known as the *Wakinyan Oyate*, meaning Thunder Nation who teach us that we must be courageous to overcome obstacles and difficulties in life (Moves Camp and Two Dogs, et. al., 2003). Prospective candidates are required to demonstrate *Wowacin Tanka* meaning fortitude, *Wohitika* meaning courage and bravery, as well as *Woksape* meaning wisdom. Entering candidates must endure and balance day-to-day obstacles of a family, geographical location, financial, and personal responsibilities. The completion of the necessary core requirements for entrance into the teacher preparation program requires fortitude, courage and wisdom. Therefore, this is the starting point and the first stage of a student's educational journey to becoming a "Teacher Candidate", and ultimately, a teacher.

While Oglala Lakota College pursues an open-door policy in which all qualified students will be admitted without regard to race, religion, origin or political belief, students must apply for and meet degree specific entrance requirements for their declared major. For this reason, students who have declared a bachelor's degree in education enter a stage of "Pre-Candidacy" as they complete their general education requirements and work towards meeting the entrance requirements for early childhood, elementary and secondary teacher licensure programs.

Teacher Preparation Program Pre-Candidacy Requirements:

- Meet the general admission criteria for Oglala Lakota College;
- Attend an Education Department specific orientation;
- Complete general education core, Lakota studies, and degree specific core requirements with a 3.0 GPA (grade point average) or higher;
- Participate in a Praxis subject area assessment orientation and preparation session.

Notes: Prospective candidates pursuing the Birth to Preschool option in the Bachelor of Arts in Early Childhood Education Degree may "opt out" of taking Praxis Series exams. Prospective candidates pursuing the Secondary Physical Science Degree will need to complete the math and science professional content requirements prior to taking any secondary Praxis content exams. Physical science majors interested in earning full acceptance into the teacher preparation program should contact the Education Department to inquire about taking an optional Praxis content exam.

***Waziyata* (North): Professional Core Requirements**

Waziyata, the cardinal direction of North, is represented by the color red. This direction is also known as the *Tatanka Oyate*, meaning Buffalo Nation who brings us the laws, beliefs, and teachings. These teachings provide the basis for Lakota identity and importance of living a good, productive life (Bear Shield, et. al., 2000). Within the profession, candidates need a solid theoretical base for understanding laws, beliefs, and teachings - to become proficient within their field of study. Candidates are required to demonstrate *Wowacin Tanka*, meaning patience and fortitude as well as *Woonspe*, meaning lessons during this stage.

Teacher Preparation Program Admission Protocol:

Students must apply for acceptance into the education program upon completion of an Associates of Arts Degree, completion of ED 283 Foundations of Education or ECH 203 Introduction to Early Childhood Education, or upon transfer into the OLC teacher preparation program. Applicants to the teacher preparation

program must complete and submitting the following:

- Letter of Intent addressed to the Dean of Education requesting admittance to the program;
- Application for admission into the teacher training program (application form included in Education Department Handbook);
- Three letters of recommendation from school administrators, teachers, parents and/or community members other than immediate family (form included in Education Department Handbook);
- Unofficial transcripts, current status sheet and individual plan of study for program completion;
- A typed essay “Who I Am and Why I Want To Be a Teacher (guidelines included in Education Department Handbook);
- Verification of having taken or being registered for the required Praxis exam, or a signed Praxis “Opt-Out” form for birth to preschool early childhood majors; and
- Verification of initiation of background check and drug testing process.

Upon receipt of a complete application file, prospective teacher candidates will be scheduled for an entrance interview. Prospective candidates will be asked to bring their Professional InTASC (ED 283 / ECH 203) Portfolio with them to their scheduled interview.

Teacher Preparation Entrance Requirements for Secondary, Elementary, Early Childhood and K-12 Lakota Studies Majors:

- **Prerequisite Requirements:** To be eligible for acceptance into the teacher preparation program, applications must have:
 - An overall GPA of 3.0 or higher (Effective 2016-2017 increased from 2.8 GPA);
 - Earn a grade of “B” or better in all professional required courses (Effective 2016-2017 increased from “C” or better, this requirement applies to courses taken Fall 2016 or later);
 - Achieved a qualifying score on the required content area Praxis exam for their program of study (Effective 2012-2013 moved from an entrance into student teaching requirement to an acceptance into the teacher preparation program requirement); and
 - Cleared tribal, state and federal background checks (Effective 2016-2017 all three background checks are required instead of clearing any background check) and drug testing requirements (Effective 2014-2015) for eligibility to work in an educational setting with children and attain state teacher licensure.

Prospective candidates who fail to meet the GPA and/or Praxis requirement will be allowed to finish their Associate of Arts degree in Elementary or Early Childhood Education if they have not already done so. Prospective bachelor’s degree candidates who choose to continue working towards meeting GPA and/or Praxis requirements may request conditional acceptance for one semester to meet the conditions.

Prospective candidates who fail the background check and are ineligible to work in an educational setting with children and attain state teacher licensure will be administratively withdrawn from their declared education degree program and will not be allowed to enroll in any further education coursework. If beyond the 100% withdraw deadline, these students will be allowed to finish the courses they are currently enrolled in (with the exception of courses including field-based experiences), if they so choose, before declaring a change of degree program.

Prospective candidates who are eligible for state teacher licensure but have questionable activity on their background checks that may hinder placement for field-based experiences or cause them difficulty in job seeking will be advised of such.

Prospective candidates who do not pass drug testing requirements will be referred to student support services and will not be allowed to enroll in any further education coursework until proof of a clean drug screening is submitted. If beyond the 100% withdraw deadline, these students will be allowed to finish the courses they are currently enrolled in (with the exception of courses including field-based experiences), if they so choose. Students who have not submitted proof of a clean drug screening within one semester will be administratively withdrawn from their declared education degree program.

Prospective candidates who are denied or dismissed from three field-based placements based on the cooperating school or early childhood center decision, for the early childhood internship or sophomore experience, will be administratively withdrawn from their declared education degree program and will not be allowed to enroll in any further education coursework. If beyond the 100% withdraw deadline, these students will be allowed to finish the courses they are currently enrolled in (with the exception of courses including field-based experiences), if they so choose. Prospective candidates who are unable to complete the required field-based experience will be advised into another degree program.

- **Entrance Requirements:** Upon meeting the prerequisite conditions, applicants must meet the following entrance requirements for admission into the teacher preparation program: A rating of 3.0 or higher on a 5-point scale on the (See the Education Department Handbook for rating scale criteria):
 - Application to the teacher preparation program;
 - Three letters of recommendation;
 - Writing samples (including the letter of intent, personal essay, and impromptu writing sample);
 - Entrance interview; and
 - Professional portfolio.

Prospective bachelor's degree candidates who meet most, but not all, teacher preparation program entrance requirements may request conditional acceptance for one semester to meet full requirements (form included in Education Department Handbook).

All prospective candidates, including those who are not planning to begin a bachelor's degree program right away, must submit an application for acceptance to the program. To be eligible for bachelor's degree program deferral, candidates must meet program acceptance requirements unless acceptance and good standing in another teacher preparation program has been verified (form included in Education Department Handbook).

Exit Requirements for Associate of Arts Degree: Prospective teacher candidates graduating with an associate of arts degree in education must have:

- Met with the Dean of Education for advising the semester prior to program completion/graduation.
- Completed and submitted their AA level Professional InTASC Portfolio for department review.
- Completed required coursework according to degree status sheet.
- A cumulative GPA of 2.0 or better, as per OLC policy. (Note: This does not meet the minimum 3.0 GPA requirement for acceptance into the teacher preparation program.)
- Completed AA level Early Childhood Core or AA level elementary education Professional Core Requirements with a "B" or above, if working towards a bachelor's degree program in education.
- Completed an exit interview.

Teacher Preparation Program Advisory Review: In order to maintain candidacy status in the Teacher Preparation Program candidates must:

- Complete professional core requirements with a GPA of 3.0 or better. (Effective 2016-2017)
- Earn a grade of “B” or better in all professional required courses. (Note: This requirement applies to all courses taken Fall 2016 or later, courses completed with a “C” prior to that time are permitted so long as the overall GPA requirement is met.)

In addition, candidates are expected to:

- Maintain an up-to-date professional portfolio by including artifacts and artifact reflections upon completion of each course. Participate in InTASC Portfolio development workshops. Submit portfolio for periodic education faculty advisor review.
- Attend and participate in Education Department advising as scheduled.
- Participate in Praxis Series orientation and preparation sessions.
- Attend and participate in OLC sponsored co-curricular cultural events.
- Meet with the Dean of Education for advising, if planning to Stop-Out (form included in Education Department Handbook).

Note: Candidates pursuing the Birth to Preschool Early Childhood Degree who have a signed “Praxis Opt-Out” form on file are exempt from the Praxis requirement until such time they choose to extend their professional development and pursue Birth to Grade 3 state certification.

Special Education Teacher Preparation Program Admission Protocol (For Certified Teachers):

Application to the special education teacher preparation program is required. Certified teachers seeking the special education endorsement must complete and submit the following:

- The general admission criteria for Oglala Lakota College;
- A professional letter of intent written to the Dean of Education addressing the reasons why they should be accepted into OLC's Special Education Program, their academic intent once selected as a student, and their professional intentions after receiving special education certification;
- Application for admission into the teacher training program (application form included in Education Department Handbook);
- Three letters of recommendation from school administrators, teachers, parents and/or community members other than immediate family members (reference form included in Education Department Handbook);
- Unofficial transcripts and a copy of State teacher licensure;
- Verification of passing required background checks and drug testing.

Effective July 1, 2017 the SD DOE allows general education teachers an alternative pathway to receive the special education endorsement. Information regarding alternative certification in special education is available at <http://www.doe.sd.gov/certification/>. Certified teachers seeking the special education alternative endorsement will also be required to submit their District’s Intent to Employ form.

***Wiyohinyanpata* (East): Professional Requirements**

Wiyohinyanpata, the cardinal direction East, is represented by the color yellow. This direction is also known as the *Hehaka Oyate*, or Elk Nation who possess *Woksape*, meaning wisdom encompassing survival skills, a sense of destiny, and vision for the future. These teachings are to be modeled by *Ikce Wicasa*, meaning the common man (Bear Shield, et al, 2000). This is the third stage fulfilling the professional requirements where candidates depend upon survival skills, which includes the construction of appropriate vision for self, the educational community of learners and the community; then begin to demonstrate professional wisdom within their profession.

Teacher Preparation Program Advisory Review: In order to maintain candidacy status in the Teacher Preparation Program candidates must:

- Acceptance to the Teacher Preparation Program to take all ED, ECH and SCED 400-level methods courses and Seminar for Student Teaching.
- Complete professional requirements with a GPA of 3.0 or better. (Effective 2016-2017)
- Earn a grade of “B” or better in all professional required courses. (Note: This requirement applies to all courses taken Fall 2016 or later, courses completed with a “C” prior to that time are permitted so long as the overall GPA requirement is met.)
- Pass the appropriate Praxis pedagogy examination. (Note: Attainment of a qualifying score on the required Praxis Series pedagogy exam is required for acceptance into student teaching.)

In addition, candidates are expected to:

- Maintain an up-to-date professional portfolio by including artifacts and artifact reflections upon completion of each course. Participate in InTASC Portfolio development workshops. Submit portfolio for periodic review.
- Attend and participate in Education Department advising as scheduled.
- Participate in Praxis Series orientation and preparation sessions.
- Attend and participate in OLC sponsored co-curricular cultural events.
- Meet with the Dean of Education for advising, if planning to Stop-Out (form included in Education Department Handbook).

Note: Candidates pursuing the Birth to Preschool Early Childhood Degree who have a signed “Praxis Opt-Out” form on file are exempt from the Praxis requirement until such time they choose to extend their professional development and pursue Birth to Grade 3 state certification.

Admission to Practicum/Student Teaching Requirements for all Programs: Application to student teach and/or enter into practicum experiences is required.

- **Prerequisite Requirements:** To be eligible for acceptance into student teaching or practicum experiences, applicants must have:
 - A cumulative GPA of 3.0 or better. (Effective 2016-2017)
 - A grade of “B” or better in all professional and professional core coursework. (Note: This requirement applies to all courses taken Fall 2016 or later, courses completed with a “C” prior to that time are permitted so long as the overall GPA requirement is met.)
 - Passing scores on required Praxis Series content and pedagogy examinations for program certification area(s). (Note: Candidates pursuing the Birth to Preschool Early Childhood Degree who have a signed “Praxis Opt-Out” form on file is exempt from the Praxis requirement unless they have chosen to extend their professional development and pursue Birth to Grade 3 state certification.)
 - Completed all or most methods courses. (Note: No more than one additional class may be taken during student teaching, without approval of the Dean of Education.)
- **Admission to Practicum/Student Teaching Protocol:** Candidates must apply for acceptance into student teaching or practicum experiences one semester prior to their planned internship. Candidates must complete and submit the following:
 - A letter to the Dean of Education requesting acceptance into the student teaching or practicum experience;
 - Three (3) letters of support from teachers or administrators in the professional area of the desired levels and/or content areas of the internship;
 - Application for admission into student teaching or practicum experience (application form included in Education Department Handbook); and
 - Professional portfolio for review.

Upon receipt of a complete application file, a thorough review will be conducted to ensure eligibility for student teaching.

Upon approval, student teaching / practicum experience arrangements will be made, and a placement meeting will be scheduled. Candidates must complete and pass the cooperating school's required background check and/or drug test prior to being placed in a classroom. In addition, candidates may be required to submit an application with the district. The cost of the background checks and/or drug test required by the school is the responsibility of the candidate unless it is a policy of the district to cover these costs.

To be eligible for practicum/student teaching deferral, candidates must meet student teaching acceptance requirements (form included in Education Department Handbook).

- **Recommendations**

- Candidates pursuing the Birth to Preschool Early Childhood Degree should complete the Early Childhood Practicum during their senior year.
- For all other degree programs: It is recommended that Student Teaching be undertaken in the fall semester of the candidate's senior year.

***Itokagata* (South) – Practicum/Student Teaching/Internship/Field Experience Induction:**

Itokagata, the direction South, is represented by the color white. This direction is also known as the *Wamakaskan Sitomni*, or the Animal Nation. The Animal Nation teaches us how to live and work together living in harmony with *Unci Maka* (Grandmother Earth). These teachings provide the basis for preparing our journey back realizing our origins and creation as well as appreciation (Moves Camp and Two Dogs, et al, 2003). This is the fourth stage of the educational journey where the candidate will complete their internship and/or infield experiences. This stage also marks their 1st year within the profession. Candidates are required to demonstrate *Wacante Ognaka* meaning compassion and generosity. Effective Educational Leaders demonstrate compassion and generosity through delivery and giving their knowledge, skills and ability to the educational community and local community.

Student Teaching: Student teaching is a 16-week, full-time experience during which time candidates must demonstrate competency, under the direction and supervision of qualified personnel, in the job responsibilities required by their chosen program. Guidelines for student teaching are outlined in the Student Teaching Handbook. **Practicum Experiences:** Practicums are field-based, classroom experiences during which time candidates demonstrate competency, under the direction and supervision of qualified personnel, in the job responsibilities required by their chosen program. Guidelines for practicum experiences are outlined in course syllabi and in the Student Teaching Handbook.

Teacher Preparation Program Exit: In order to be eligible for graduation with a bachelor's degree in education, Teacher Preparation Program candidates must have:

- Met with the Dean of Education for advising the semester prior to program completion / graduation.
- Completed and submitted the Professional InTASC Portfolio for department review.
- Completed and submitted the Impact on Student Learning Project for department review.
- Completed ~~of~~ required coursework according to degree status sheet.
- A cumulative GPA of 3.0 or better. (Effective 2016-2017)
- A grade of "B" or better in practicum or student teaching. (Effective 2016-2017)
- Verification of qualifying scores on the Praxis Series content and pedagogy exams in desired certification area(s). (Note: Candidates pursuing the Birth to Preschool Early Childhood Degree must have a signed "Praxis Op-Out" form on file to be exempt from this requirement.)
- Completed an Exit Interview.
- A GPA that meets or exceeds the South Dakota State Requirements for GPA.

Note: It is the responsibility of the student to initiate and complete application for certification with the South Dakota Department of Education. Effective July 1, 2017 all candidates applying for certification must provide proof of one hour of suicide prevention training (SDCL § 13-42).

EDUCATION DEPARTMENT PROGRAM STANDARDS

The Oglala Lakota College education courses are aligned to the following teacher preparation standards: SD Department of Education Administrative Rule 24:53:04:06 ([SD DOE](#)), the Interstate New Teacher Assessment and Support Consortium ([InTASC](#)) Model Standards for Beginning Teacher Licensing and Development, the Council for the Accreditation of Education Preparation (CAEP) Elementary Teacher Preparation Standards, the National Association for the Education of Young Children ([NAEYC](#)) Standards, the National Science Teachers Association ([NSTA](#)) Standards, and the Council for Exceptional Children ([CEC](#)) Standards.

EDUCATION DEPARTMENT DEPARMENT COURSE ROTATION SCHEDULE

All courses are offered every semester with classes switching between cohorts each semester. Classes in each cohort are arranged so that upper and lower division courses are scheduled each day to support student progression and minimize situations in which students would need to choose between two needed classes. Courses that are needed in both eastern and western cohorts will be centrally located whenever possible. Schedule is subject to change based on student enrollment.

EDUCATION DEPARTMENT COURSE DESCRIPTIONS

ECH 203 Introduction to Early Childhood Education

Prerequisite: Engl 103. 3 credits

This course provides an introduction to the field of early childhood education. The philosophies, goals, and purposes of early childhood programs, as well as professional and staff development will be explored. Candidates are required to complete their application for entry into the teacher preparation program as part of course requirements.

ECH 213 Planning and Adminstrating Early Childhood Programs

Prerequisite: None. 3 credits

This course introduces the students to the steps involved in setting up a home or day care center with a learning environment for the infant, toddler, and preschool child. This course considers issues of management, administrative procedures, health, safety, use of physical space, and licensing regulations.

ECH 223 Materials & Techniques for Infant/Toddler/Pre-K Centers I

Prerequisite: None. 3 credits

This course will help the candidate to develop culturally relevant materials for the enhancement of physical, emotional, and intellectual growth for the infant, toddler, and preschool child. An introduction to a variety of activities and media which can be used to foster creativity in young children with specific emphasis on art, music, movement, drama, puppetry, and literature will be explored. Candidates will gain knowledge and expertise in teaching techniques individually and developmentally appropriate for young children.

ECH 233 Curriculum for Self-Awareness and Individual Development

Prerequisites: ED 213, ECH 203. 3 credits

This course is designed to provide candidates with the knowledge and skills necessary to promote the means of building positive self-concepts and individual strengths in the infant, toddler, and preschool child. Techniques and materials that can be used within daycare centers, early childhood classrooms, and home centers which will support social and emotional development while also providing positive guidance will be introduced.

ECH 243 Early Childhood Specialty Internship

Prerequisites: ECH 203, ED 213. 3 credits

Candidates will complete a total of 135 hours of observation, as required by the South Dakota Department of Education, in an early childhood center, program, or agency. Candidates are required to keep a journal and observation log which will be signed off on after each observation. Candidates may take an active role in the classroom - assisting in planning and learning experience of the children. Candidates who are currently employed in an early childhood center/classroom will complete their observations in the center/classroom in which they are employed. This experience is similar to the state requirement of a "Sophomore Experience". Candidates will be observed in the classroom settings by their college supervisor.

ECH 253 Parental Staff and Community Involvement in Early Childhood

Prerequisites: ED 213, ECH 203. 3 credits

This course introduces the candidate to the importance of positive communication and the necessary techniques for promoting good relationships between parents, family members, staff, and the community. Special emphasis on strategies for providing an optimal environment for young children and resources for meeting problems through cooperative and positive interaction.

ECH 323 Materials & Techniques II for Infant, Toddler, & Pre-K Centers

Prerequisites: ED 213, ECH 203. 3 credits

This course will help candidates to develop more culturally relevant techniques and materials for the enhancement of physical, emotional, and intellectual growth of the infant, toddler, and preschool child. A study of the basic concepts, methods, and materials of language arts, mathematics, science, and social studies appropriate to young children will be investigated. We will also consider the importance of learning centers and bulletin boards in the classroom. Exploring the concepts of play as the means for learning will also be included. Planning daily and weekly schedules are also considered. Completion of ECH 223 is recommended prior to taking this course.

ECH 363 Family Literacy

Prerequisites: ED 213, ECH 203, ECH 253. 3 credits

This course focuses on the need to promote literacy within the family and community to address how young children are affected by reservation-wide concerns such as dropout rates, which historically have been high, and literacy levels, which have been consistently low. Candidates in this course will explore existing family literacy models and all facets of planning family literacy events. Candidates will take part in community literacy outreach efforts such as books-in-a-bag or hosting family literacy events aligned with national literacy events. What is learned and implemented through this course will support the mandated Head Start and NAEYC Standards in the area of literacy and family engagement.

ECH 383 Methods of Assessing Young Children

Prerequisites: ED 213, ECH 233, ECH 243. 3 credits

In this course the candidate will learn the importance of observing, documenting and assessing young children. The candidate will become confident in using both formal and informal assessments with young children and become knowledgeable in utilizing assessment results and sharing these results with the child's family and other professionals to better meet the needs of the child.

ECH 403 Social-Emotional Growth and Socialization

Prerequisites: ED 213, ECH 223, ECH 233. 3 credits

In this course the candidate will learn concepts of early social-emotional growth and socialization in the context of group care, with an emphasis on the development of a nurturing relationship between infants and caregiver. The importance of responsive care giving, individualizing care through an understanding of infant temperament, support for the critical role of family and culture, and stages of emotional development are also covered.

ECH 413 Group Care

Prerequisites: ED 213, ECH 223, ECH 233. 3 credits

In this course the candidate will learn about the philosophical foundations of caring for Infants and Toddlers in groups as well as the special issues of caring for infants in groups. This type of care is different from the care of one infant, e.g., in a typical family or nanny situation, and from the group care of older children. The candidate will also learn how to ensure that infants in professional group care thrive through having assigned to them one or a very few consistent, caring adults to provide security, individualized attention, responsiveness, familiarity, and protection in the context of a peaceful environment.

ECH 423 Early Learning and Development

Prerequisites: ED 213. 3 credits

In this course candidates will focus on the critical issues of brain development, communication and identity formation in prenatal babies, infants and toddlers. Candidates will learn elements of care that support expecting parents, infants and families. Areas of focus will include caring relationships, health and safety, connections to family and culture, family and community support, the importance of prenatal care and nutrition, and responsive, knowledgeable caregivers.

ECH 496 Practicum in Early Childhood Education

3 credits

In this course the candidate will learn real world applications of their college classroom learning experiences. The student will spend at least 520 hours in local Early Childhood Classroom or Daycare. By the end of the semester, if not previously, the student will assume all responsibilities of the Classroom Teacher or Primary Caregiver. Candidates who are currently employed in an early childhood center will complete their practicum in the center/classroom in which they are employed. This course should be taken in the senior year.

ED 283 Foundations of Education w/ Sophomore Experience

Prerequisites: SpCm 103, Engl 113, Psy 103, Math 103. 3 credits

Foundations of Education provides an introduction to the profession of teaching in the K-12 schools. A state requirement for this course is also referred to as ‘Sophomore Experience’. This part of the course requires 15 hours of observation in the field followed up by 15 hours of candidate journaling related to classroom observations and topics covered in this course. Topics include the history and philosophy of education, structures and governance of schools, professionalism, teacher effectiveness, and curriculum models. Candidates are required to complete their applications for entry into the teacher education program as part of course requirements.

ED 303E Indian Studies for Education

Pre-requisites: SpCm 103, Engl 113, Psy 103. 3 credits

A history of American Indian schools and community and student relations is emphasized in this course. Educational theory and background into traditional tribal education, church, federal, and public education will be explored. Teaching methods based on integrating state content standards with Indian values and culture are part of this course. The South Dakota Indian Studies Strands are addressed.

ED 213 Child and Adolescent Development

Prerequisites: SpCm 103, Engl 113, Psy 103. 3 credits

Child Growth and Development includes a broad focus on the biological, physical, social, emotional, and intellectual growth and development of children from prenatal to adolescence. Child rearing and educational practices of several different cultures, with an emphasis on Lakota practices will also be reviewed.

ED 303 Children’s Literature

Prerequisites: SpCm 103, Engl 113, Psy 103. 3 credits

This course offers a presentation of the best literature available for children in a variety of media, books, short films, video, audio books, and storytelling. Candidates study criteria for evaluating these media and ways of using them in early childhood, elementary and junior high classrooms. Methods of promoting family literacy are explored. The text is supplemented with bibliographies of Native American literature and Native American stories for children. Several approaches to interacting with literature and media will be reviewed and discussed.

ED 313 Educational Psychology

Prerequisites: Ed 213. 3 credits

Educational Psychology is concerned with understanding how children develop and learn through formal (and informal) instruction in classroom settings. Candidates will examine physical, social and character development, emotional and cognitive principles and developmental learning theories found in educational settings. An understanding of intellectual differences, learning and problem-solving processes, self-esteem, motivation and assessing learning will be investigated in this course.

ED 323 Adolescent Psychology and Curriculum Concepts

Prerequisite: Ed 213. 3 credits

This course is an overview of educational programs and instructional strategies centered around developmental issues related to the social, emotional, physical and cognitive development of adolescent learners. Candidates will examine adolescent curriculum elements including active learning, alternative scheduling, advisory teams, challenging curriculum and interdisciplinary collaboration. Culture influences, with an emphasis on Lakota practices, will also be reviewed.

ED443 Methods of Teaching Language Arts

Prerequisite: Acceptance to Teacher Preparation Program. 3 credits

This course will include the interrelationship between reading, writing, speaking and listening (the four traditional Language Arts) and viewing and visually representing (two new language arts areas reflecting the importance of visual literacy). Students will develop lesson plans and strategies that present language arts as a whole and that address the Early Learning Guidelines or Common Core Standards for English Language Arts. Specific attention will be given to assessing the Language Arts, Lakota culture, character education, behavioral management, individualizing instruction, parental/community involvement, and service learning.

ED 463 Human Relations

Prerequisites: None. It is recommended that all professional core coursework be completed prior to taking this course. 3 credits

This course will center on Native American and multicultural issues. Candidates will investigate different social phenomena, processes, and outcomes, especially those dealing with social economic status, life styles, history, reciprocal perceptions and interactions between different groups. Emphasis will be on recognizing stereotypes, prejudice and discrimination. Candidates will discuss precepts of critical pedagogy and its impact on the above. Woven into this course is the concept of Wolakota and character education.

ED 483/ED 583 Technology for Teachers

Prerequisite: MIS 113. 3 credits

This course is designed to provide participants with the knowledge, competencies and understanding to apply technology-enhanced instructional strategies in the classroom. The course provides detailed practice in using computer and Internet-based technologies. In addition, participants will design learning units that use the Internet, multimedia and hypermedia tools to support the development of interpersonal, collaboration and higher order thinking skills of PreK-12 learners. Extended studies will be required for those that enroll in this course for graduate credit hours.

ED 290/490 Special Projects in Education

This course provides special educational opportunities related to topics of interest in the field of education. Courses may be provided for OLC students, pK-12 institutions, educational organizations or the staff of the college. Individuals who wish to offer a special projects class for college credit should contact the Dean of Education or Vice President for Instruction.

EDECH 402 Methods of Teaching Music and Art for ECH/Elementary Teachers

Prerequisite: Acceptance to Teacher Preparation Program. 3 credits

Music and art are important components of a well-rounded education. Methods for music may include music appreciation, understanding keys, notes, rhythm and measures as well as genres of music. Teacher candidates will play basic instruments like recorders, flutes and/or drums. Indian music will be emphasized. Art will include using various mediums from crayolas to tempera and naturally occurring substances. Use of a ruler and compass for artwork to reinforce traditional designs will be included. Project art such as constructing dioramas and models using various mediums will also be explored.

EDECH 413 Methods of Teaching ECH/Elementary Reading

Prerequisite: Acceptance to Teacher Preparation Program. 3 credits

This course will cover instructional strategies for reading, including whole language and phonics. The emphasis of language development, phonemic awareness, the cueing system, word recognition strategies and reading for comprehension will be addressed. Course emphasis will include the development and presentation of lessons by candidates. These lessons will address character education and involve the skills and strategies of reading based on the Common Core Standards or Early Learning Guidelines. Exploration of reading assessments, Lakota literature and culture, behavioral management, community and parental involvement, and differentiating instruction to meet the needs of diverse learners will be reinforced in this course.

EDECH 423 Methods of Teaching ECH/Elementary Math

Prerequisite: Acceptance to Teacher Preparation Program. 3 credits

This course will provide candidates with a preview and utilization of various types of math manipulatives, internet applications and other math instructional materials. They will learn different strategies for effective pre-school through 8th grade instruction. Models of classroom management, student learning styles and cooperative learning will also be explored. Inclusion strategies and parental/community involvement strategies will also be reviewed. Candidates will develop lesson plans utilizing this information and present lessons to the class that are designed around the Common Core Standards or Early Learning Guidelines for Mathematics.

EDECH 433 Methods of Teaching ECH/Elementary Science

Prerequisite: Acceptance to Teacher Preparation Program. 3 credits

This course will provide the learner with information on the basic knowledge and skills of teaching pre-school-through 8th grade science. In this course candidates will review science materials, resources, educational technology, and computer software. Candidates will create and present formal and informal lessons designed around the Early Literacy Guidelines or the South Dakota State Science Standards and the Common Core Standards for Literacy in Science. Special attention will focus on assessment of science concepts, Lakota star knowledge, differentiated instruction, and parental and community involvement.

EDECH 453 Methods of Teaching ECH/Elementary Social Studies

Prerequisite: Acceptance to Teacher Preparation Program. 3 credits

This course will provide learners with experience in the effective planning and development of social studies programs for children pre-school through 8th grade. It will address goals, objectives, curriculum, educational technology and resource materials relevant to pre-school & elementary social studies. Lakota and other indigenous peoples' heritage will be examined. Candidates will explore various learning styles, classroom management technique and parental involvement. In this course the learner will develop informal and formal lesson plans designed around the Early Literacy Guidelines or the South Dakota State Social Studies Standards and the Common Core Standards for Literacy in History/Social Studies.

EDECH 462 Methods of Teaching Health and Physical Education

Prerequisite: Acceptance to Teacher Preparation Program. 3 credits

Teacher candidates will learn and practice techniques and methods for integration of health, first aid, and physical education into the early childhood and elementary educational settings. Candidates will also expand their knowledge of health, hygiene, nutrition, communicable diseases, and environmental issues which affect the health of our students and parents.

EDLK 473 Seminar for Student Teaching

Prerequisite: Acceptance to Teacher Preparation Program. 3 credits

This course addresses the various challenges and issues associated with student teaching/practicum experiences and the first year of teaching for early childhood, elementary, and secondary teachers. Emphasis is given to synthesizing the personal philosophy of education, completing the professional portfolio, examining professional ethics, applying for teacher licensure (when applicable), becoming an effective teacher, and establishing a well-managed classroom. Students will receive instruction in writing resumes and cover letters, requesting references, completing applications, and interviewing. Student Teaching Seminar may be taken in the semester prior to or concurrently with the student teaching or practicum experience.

EDLK 489 Student Teaching

Prerequisites: Completion of Professional Requirements, Passing Score on Praxis Series content knowledge and pedagogy examinations, GPA of 3.0 or better, Acceptance into Student Teaching. 9 credits

Student teaching is a full-time experience during which time teacher candidates must demonstrate competencies in the job responsibilities required by their chosen program. Teacher candidates spend 16 weeks in supervised practice in approved pre-K-12 classroom settings under the direction and supervision of qualified school personnel. Student teaching experiences are typically completed at two levels: and placements are arranged to fulfill the balance of time in each subject area and age or grade level span as required for South Dakota teacher preparation and licensure.

ExEd 313/513 Introduction to Exceptional Education / Characteristics & Etiology

3 credits

Candidates will study, in depth, the high incidence disabilities, their definitions, diagnosis and characteristics. Legal obligations of IDEA, Sect. 504 and ADA will be introduced. Low incidence disabilities will also be introduced. Emphasis will be given on determining disabilities, understanding the cognitive, social and emotional difficulties and planning appropriate interventions. Researching journal articles for current information will provide additional source material. Graduate Nature of the Course: Participants taking this course for graduate credit will complete all assignments required for undergraduate credit and complete a graduate level research project (15-page research paper or a 5-page reflective analysis of a field-based experience) related to one of the disability categories of IDEA.

ExEd 323/523 Assessment and Practical Applications

3 credits

This course is a study in the selection, administration and interpretation of formal and informal test instruments. Areas addressed include cognitive, communicative, affective and adaptive behavior skills. Candidates will become familiar with assessment terms such as standard deviation, error of measurement, test reliability and validity. Intelligence tests, achievement tests, behavioral inventories and adaptive behavior inventories will be examined and administered and interpreted. Experience applying this data into written reports for MDT's and IEP/IFSP's will also be addressed. Graduate Nature of the Course: Participants taking this course for graduate credit will complete all assignments required for undergraduate credit and complete a graduate level research project (15-page research paper or a 5-page reflective analysis of a field-based experience) related to evaluation as part of eligibility determination or ongoing assessment measures to monitor progress and plan instruction.

ExEd 333/533 IEP/IFSP Program and Curriculum Development*3 credits*

Candidates will be introduced to models and theories that are the basis for special education programs. This course addresses skills in collaboration, team teaching, and techniques of inclusion. The student will develop appropriate lesson plans based on PK-12 academic standards to design instructional programs which facilitate individual achievement towards IEP/IFSP goals and objectives. Program development will include ways to monitor not only student progress but the effectiveness of the program. The candidate will organize and maintain all portions of the IEP/IFSP process including progress reports, timely written notices, and conduct meetings. Candidates will utilize electronic file management systems to maintain IEP/IFSP records. Graduate Nature of the Course: Participants taking this course for graduate credit will complete all assignments required for undergraduate credit and complete a graduate level research project (15-page research paper or a 5-page reflective analysis of a field-based experience) related to individualized education programs or family service plans.

ExEd 303/603 Special Education Law*3 credits*

This course will examine current laws pertaining to individuals who have disabilities. Candidates will gain an understanding of the legal components and requirements of the Individuals with Disabilities Education Act, the Americans with Disabilities Act, Section 504 of the Rehabilitation Act, and the Family Education Rights and Privacy Act. Graduate Nature of the Course: Participants taking this course for graduate credit will complete all assignments required for undergraduate credit and complete a graduate level research project (15-page research paper or a 5-page reflective analysis of a field-based experience) related to the impact of special education law on the provision of services to children with exceptional needs.

ExEd 433/633 Diagnostic Teaching*3 credits*

This course is designed to address the needs of children who have high-incidence disabilities. Candidates will use standard curriculum materials to devise appropriate adaptations to meet individual needs. Strategies developed and implemented will be geared toward the high incidence disabilities. Candidates will gain experience designing intervention programs that address motivational and curriculum concerns. Appropriate communication and collaboration skills for coordinating delivery and evaluation of direct/indirect instruction of reading, math and language arts will be an area of emphasis. Graduate Nature of the Course: Participants taking this course for graduate credit will complete all assignments required for undergraduate credit and complete a graduate level research project (15-page research paper or a 5-page reflective analysis of a field-based experience) related to instructional strategies for increasing student achievement.

ExEd 443/643 Strategies for Low Incidence Disabilities*3 credits*

This course is designed to address the needs of children who have low-incidence disabilities. Areas of emphasis include autism, TBI, orthopedic impairments and multi-handicapped. In addition to classroom-based instruction, students will participate in field-based experiences to develop the knowledge and skills necessary to implement programs appropriate for students with these types of disabilities. Candidates will be introduced to the resources available in adaptive technologies. Collaboration and coordination with specialized services, regular education, families and other agencies will be addressed. Service learning will be included as a part of this class. Graduate Nature of the Course: Participants taking this course for graduate credit will complete all assignments required for undergraduate credit and complete a graduate level research project (15-page research paper or a 5-page reflective analysis of a field-based experience) related to instructional strategies for increasing student achievement.

ExEd 453/653 Classroom Management

3 credits

Classroom management is key to successful learning. Theories and anecdotal stories will be examined in determining successful classroom management techniques. Collecting, recording, graphing and analyzing data to make appropriate interventions will be a major component of the course. The use of technology to facilitate data collection will be considered. Opportunities to practice and apply these methods will be provided through classroom observations. Building classroom community, character education and Wolakolkiciyapi will be stressed. The goal is to provide the knowledge needed to build a safe and inclusive learning environment for students. Graduate Nature of the Course: Participants taking this course for graduate credit will complete all assignments required for undergraduate credit and complete a graduate level research project (15-page research paper or a 5-page reflective analysis of a field-based experience) related to the critical role of classroom management in student learning and achievement.

ExEd 473/673 Transitions and Community Resources

3 credits

This course prepares candidates to assist students with disabilities to transition into post-secondary learning, the adult world of work and independent living. Collaboration with outside agencies and utilizing community resources to assist students in progressing toward their lifegoals is a major component of the course. Candidates will gain the necessary knowledge to guide adolescents who have disabilities in gaining self-advocacy skills and actively participating in their own transition planning. Service learning will also be a component of this class. Graduate Nature of the Course: Participants taking this course for graduate credit will complete all assignments required for undergraduate credit and complete a graduate level research project (15-page research paper or a 5-page reflective analysis of a field-based experience) related to successful transition from school to adult life and services.

ExEd 483 Elementary Special Education Practicum

Prerequisites: Program Acceptance and SD DOE Approval for Alternative Certification. 3 credits

This practicum experience is designed for certified teachers approved for SD DOE K-12 Special Education Alternative Certification. This semester's long elementary experience, including early intervention services, is one-half of the year-long practicum that must be completed as part of the alternative certification requirements. Alternative certification teachers completing this experience will work under the mentorship of an individual designated by their employing school and maintain an internship log. Under the direction of a college supervisor alternative certification teachers will complete an Impact on Student Learning Project and develop a Professional InTASC/CEC Portfolio demonstrating their knowledge and skills in working with school-age children and pre-adolescent learners who have disabilities. In addition, alternative certification teachers will prepare for and take the state designated special education licensure exam.

ExEd 493 Secondary Special Education Practicum

Prerequisites: Program Acceptance and SD DOE Approval for Alternative Certification. 3 credits

This practicum experience is designed for certified teachers approved for SD DOE K-12 Special Education Alternative Certification. This semester's long secondary experience, including transition services, is one-half of the year-long practicum that must be completed as part of the alternative certification requirements. Alternative certification teachers completing this experience will work under the mentorship of an individual designated by their employing school and maintain an internship log. Under the direction of a college supervisor alternative certification teachers will complete an Impact on Student Learning Project and develop a Professional InTASC/CEC Portfolio demonstrating their knowledge and skills in working with adolescent learners who have disabilities. In addition, alternative certification teachers will prepare for and take the state designated special education licensure exam.

ExEd 496/796 Special Education Practicum

A practicum experience is required for candidates seeking the K-12 endorsement in special education. A minimum of a three-semester-hour special education practicum under the supervision of a certified special education teacher and university supervisor at each level of endorsement is required. Candidates will gradually assume responsibility for planning, instruction, evaluation, and classroom management during the experience at each level of certification sought. In addition, candidates will complete a professional portfolio demonstrating the knowledge and skills set forth by the Council for Exceptional Children's performance-based standards covering foundations, development and characteristics of learners, individual learning differences, instructional strategies, learning environments and social interactions, communication, instructional planning, assessment, professional and ethical practice, and collaboration. Completion of exceptional education coursework, passing score on the Praxis Series special education content exam, GPA of 3.0 or better in special education coursework, and acceptance into the practicum experience is required.

Math 234 Mathematics for Elementary Teacher I

Prerequisite: Math 103 completed with a grade of "C" or better. 4 credits

This course utilizes an inquiry-based approach to gain understanding of mathematical concepts at concrete, representational and abstract levels. Topics include problem solving, sets, algebraic thinking, the study of numeration systems, fundamental operations of arithmetic (properties and algorithms), the extended number system and proportional reasoning. The processes of problem solving (representation, reasoning, making connections, and communication of ideas) are emphasized throughout the course. Direct connections are made between course content and the State Standards for Mathematics.

Math 244 Mathematics for Elementary Teacher II

Prerequisite: Math 103 completed with a grade of "C" or better. 4 credits

This course utilizes an inquiry-based approach to gain understanding of mathematical concepts at the concrete, representational and abstract levels. Topics include data and chance, geometric shapes, geometry as measurement and transformational geometry. Problem solving, representation, reasoning, making connections, and communication of ideas are emphasized throughout the course. Direct connections are made between course content and the State Standards for Mathematics.

SCED403 Methods for Teaching Secondary Mathematics

Prerequisite: Acceptance to Teacher Preparation Program. 3 credits

Topics from secondary mathematics are presented from advanced standpoint and designed to meet the needs of teachers. Topics will include mathematical terminology, elements of number theory, problem solving, probability, and applications of mathematics. This course will provide candidates with experience in the use of various types of math manipulatives, computer programs and other math instructional materials. Candidates will learn the elements of effective secondary instruction, different models of classroom management, learning styles and cooperative learning. Lessons will be designed and based around the South Dakota Content Standards. Students with special needs, inclusion strategies and parental/community involvement strategies will be reviewed. The student will plan lessons utilizing this information and present lessons to the class.

SCED413 Methods of Teaching Secondary Science

Prerequisite: Acceptance to Teacher Preparation Program. 3 credits

Candidates will review contemporary science materials, resources, educational technology and computer software. Process science, planning, safety and computer implementation are emphasized. Candidates will create and present formal and informal lessons. Lessons will be designed and based around the South Dakota State Content Standards. Special attention will focus on assessment of science, use of Lakota culture in lesson plans, individualizing instruction and promoting character education - Wolakota. Other topics include cooperative learning, lesson plan design and interdisciplinary teaching.

ScEd 443 Reading in the Content Area

Prerequisites: Ed 313, ExEd 313, Ed 323. 3 credits

Students must be able to read a variety of informational texts and produce written documents. This course will introduce the tools necessary to integrate literacy strategies into content learning to help raise student achievement in content area classes such as social studies, science and mathematics. Emphasis areas include cultural and linguistic diversity, student motivation, formal and informal literacy assessment to guide instruction, effective instructional methods and learning strategies, and informational technologies to foster literacy. Course participants will develop lesson plans that model literacy integration across the curriculum that aligns to the Common Core Standards for Literacy in History/Social Studies, Science and Technical Subjects. Specific attention will be given to meeting the needs of Native American middle school and high school students.

Sci 204 Integrated Science for Elementary Teacher I

Prerequisites: Math 103 completed with a "C" or better and a core science class. 4 credits

This course is designed to acquaint the pre-service elementary teacher with the scientific method and basic processes and concepts of science through the use of published articles in addition to the text. The latest scientific discoveries and current thinking in science education will be discussed. A writing component will consist of reacting to the assigned articles. A completed science fair project is required.

Sci 214 Integrated Science for the Elementary Teacher II

Prerequisites: Math 103 completed with a "C" or better and a core science class. 4 credits

This course is a continuation of Sci 204 and will further stress the scientific method and basic processes of science through the study of specific concepts of physical and biological sciences. A writing component will consist of reacting to recent scientific and science education articles followed by class discussion. The display of a science fair project is required.

Special Notes: Effective the spring semester of 2017 Math 223, 233 and 243 Mathematics for Elementary Teachers I, II and III were condensed into two 4-credit hour courses. Effective the fall semester of 2017 EDECH 403 and EDECH 463 Methods of Teaching Music and Art and Methods of Teaching Health and Physical Education were changed to two-credit hour courses. Education majors should contact the Education Department for clarification of program requirements. Adjustments will be made to individual student status sheets as necessary.

DEPARTMENT VISION STATEMENT

To produce graduates who will become leaders in their chosen field and help rebuild the Lakota nation through education.

DEPARTMENT MISSION

The mission of the Humanities and Social Science Department is to provide programs ensuring students have the opportunity to learn key workplace skills, while integrating cultural aspects of Wolakolkiciyapi. Our programs equip students with:

- verbal, written, and visual communication skills,
- the background necessary for competent and ethical government administration,
- the ability to think critically, and
- a general knowledge in humanities and social science content areas.

DEPARTMENT PHILOSOPHY

The Humanities and Social Science Department offers a career-focused liberal arts education with courses in graphic design, communications, government administration, and social science. The breadth of offerings reflects the commitment of the faculty to challenge students to develop an interdisciplinary comprehension of and the ability to excel in a complex, diverse, and rapidly changing world. The Humanities and Social Science Department's degrees encourage students to develop an informed view of the world and the ability to critically analyze their view while actively participating responsibly in society. An Oglala Lakota perspective is facilitated in all curricula and programs.

DEPARTMENT GOALS

The Humanities and Social Science Department has adopted the following goals:

- Provide and monitor quality post-secondary academic teaching and learning emphasizing an Oglala Lakota cultural perspective as it relates to global diversity.
- Offer students learning opportunities to acquire knowledge and skills for personal and professional development.
- Prepare graduates for career and life success and for leadership roles in their families, tribe, and the global community.

DEPARTMENT STUDENT LEARNING OUTCOMES

Humanities and Social Science graduates will be able to:

- analyze and apply professional ethics in a leadership context
- identify, define, and solve problems
- locate and evaluate information using current technology
- communicate with accuracy and clarity
- comprehend, retain, and apply information
- demonstrate skills for leadership and participation in Oglala Lakota culture and policy within the larger context of a diverse tribal and global society (Wolakolkiciyapi)

CO-CURRICULAR STUDENT LEARNING OUTCOMES

- Students will engage in a diverse environment.
- Students will be able to expand their program knowledge and skills.
- Students will be able to expand their general education knowledge and skills

BACHELOR OF ARTS IN LEADERSHIP AND COMMUNICATIONS

Leadership and Communications Goals

Program graduates will:

1. practice culturally competent leadership in decision making, organizational development, and human and natural resource management.
2. lead non-profit organizations.
3. lead tribal or other governmental programs.
4. be admitted to graduate school or law school.

Leadership and Communications Program Learning Outcomes

Program graduates will be able to:

1. Use the interpersonal, engagement, and organizational skills necessary to be effective leaders in harmony with Wolakota.
2. Interpret the historical, intercultural, and international contexts of diverse human experience, with a focus on impacts on tribal governance.
3. Communicate within the context of changing technology and digital markets.
4. Incorporate critical thinking into written and oral communication activities.
5. Conduct research using a variety of methodologies.
6. Develop and evaluate policies and programs, with an emphasis on sovereignty and nation building.
7. Articulate the ethical implications of government leadership.

Note Regarding Prerequisites:

One class required for the Leadership and Communication degree requires business courses as prerequisites.

BAd 373 Grant Proposal Writing & Management

The Humanities and Social Science (HSS) Department and the Business Department agree that students in the Leadership and Communications degree will be successful as long as they have taken the designated HSS prerequisites. The Business Department prerequisites cover skills and strategies from a business administration standpoint. The HSS Department includes classes which develop similar skills and strategies, but from a public administration standpoint.

BAd 373 * Grant Proposal Writing & Management

Business Department prerequisite: Acct 213 Accounting II and BAd 253 Principles of Management

HSS Prerequisites: LdCm 233 Research Methods and Engl 213 Writing in the Professions

ASSOCIATE OF ARTS IN GRAPHIC ARTS

Graphic Arts Goals

Program Graduates will:

1. be able to compete successfully in all aspects of the print industry as graphic designers.
2. have the skills needed to promote and market their artworks, including internet marketing that would allow them to work anywhere that there is an internet connection.
3. be prepared for entry into more specific art programs, such as fine arts, animation, illustration, or 3-D rendering.

Graphic Arts Program Learning Outcomes

Program graduates will be able to:

1. communicate using graphic design techniques to compete on a professional level.
2. qualify to work in all electronic media.
3. professionally market their artworks on an international level using social media and the Internet.
4. produce an electronic portfolio website for future employment.
5. create graphics for industrial printing applications.

2025-2026 Catalog

HUMANITIES AND SOCIAL SCIENCE COURSE DESCRIPTIONS

Art 103 Drawing I

Prerequisites: None. 3 credits

This introductory course is designed for students with limited experience in drawing. Course content will introduce the basic and fundamental principles for drawing, including shape, form, perspective, line, value, and composition. The student will develop basic techniques for drawing through the practice of observation, material/tool understanding, and critical thinking.

Art 153 School Arts and Crafts

Prerequisite: NONE. 3 credits

This course is designed to give future teachers practical arts and crafts experience and to develop an understanding of art education in relation to the growth and development of children. The course will also provide practice in two-and three-dimensional arts utilizing paints, crayons, ink, color markers, etc., along with practice in classroom crafts (mobiles, papier-mâché, etc.).

Art 183 Color Theory

Prerequisites: None. 3 credits

This course is designed for the art student to learn the theory of color, composition, and typography. The student will explore the use of color in design, painting, and illustration. Emphasis will be on the use of type and layout in design.

Art 203 Drawing II

Prerequisite: Art 103. 3 credits

This course is designed for progressing art students to further develop their control and confidence in the fundamental principles of drawing. Students will demonstrate basic understanding of two dimensional design.

Art 223 Painting I

Prerequisites: Art 103, Art 183. 3 credits

This course is designed for students to explore introductory techniques in painting, tools, materials, and processes through a variety of painting projects. Students will gain further confidence in color theory and two-dimensional design.

Art 283 Web Design

Prerequisites: None. 3 credits

This course is designed for the art student to learn basic web design using the programs Adobe Dreamweaver and Wordpress. Students will be able to produce their own website using their own design concepts and imagination.

Art 290/490 Special Topics in Art

Credit may vary from one (1) to three (3) credits

This course emphasizes selected topics in Art. Topics will change each semester and may be repeated for credit. When taken at the 200-level, it is expected that the student will do enhanced sophomore level work. A 400-level implies a mastery senior level course with extensive work expected.

Engl 103 - Composition I

Prerequisite: R&W 093 or placement through testing. 3 credits.

This course is an introduction to academic writing in college. Students will practice the skills and documentation needed for effective academic writing. Emphasis will be placed on the writing process: a

well-developed thesis, clarity and coherence, sound development, the ability to relate careful analytical reading to effective writing, and elimination of major grammatical errors. By the end of the course students should be able to express their ideas persuasively and clearly.

Engl 113 Composition II

Prerequisite: Engl 103 with "C" or better. 3 credits

This research-focused course is a continuation of academic writing. Students will practice more complex skills in research, writing, and documentation needed for effective academic writing. Emphasis will be placed on instruction in argumentation and conducting research with databases, primary sources, books, journal articles, and other sources. Students will also learn formatting styles and how to introduce, paraphrase, summarize, quote, and blend their cited material into their paper. By the end of the course students should be able to express their ideas persuasively and clearly.

Engl 213 Writing in the Professions

Prerequisite: Engl 113. 3 credits

This course provides students with skills needed to complete many technical writing tasks in their daily and professional lives. Students will learn to utilize correct grammar to create products such as letters, memos, resumes, CV's, brochures, pamphlets, instructions, manuals, reports, and proposals. Other areas covered are voice, tone, style, formatting, editing, and graphics.

Engl 303 Grammar and Linguistics

Prerequisite: Engl 113. 3 credits

This course is a study of language usage and English grammar. Topics include a study of current approaches to English grammar and language use. Relationships between English and Lakota language structures will be discussed.

Engl 313 Digital Communication

Prerequisite: Engl 113. 3 credits

This course will provide students with a detailed understanding of digital communication as well as an opportunity to assess and analyze various platforms/types of communication (e.g. blogs/vlogs, social media, webpages) in the digital realm. It is a project-based course that incorporates tools for visual and textual analysis that results in presentation for the digital environment.

Engl 323 Creative Writing

Prerequisite: Engl 113. 3 credits

This course is designed to help students interested in the techniques of writing fiction, drama, nonfiction and poetry. This course will include assistance in critiquing, developing, and structuring ideas, and creating original compositions in each genre.

Engl 333 Writing for Social Change

Prerequisite: Engl 113. 3 credits

This course introduces students to the techniques and methods for writing for social change and social justice. Students will read a variety of works, in several genres, by writers who worked to precipitate change in their lifetimes—with an emphasis on Native American authors. Students will develop, craft, and revise their own writing with the goal of impacting minds in their community, and in the world at large.

Engl 413 News Writing

Prerequisite: Engl 113. 3 credits

This course is designed to provide students with the basic skills and knowledge they need in order to engage effectively in news gathering and news writing. Students will learn style rules and application, reporting methods, and journalistic ethics.

Engl 433 Global Issues

Prerequisites: Lit 203, SpCm 103, SpCm 223. 3 credits

English and Communication Studies majors will explore various global issues from within diverse contexts. Students will work with faculty from the Humanities and Social Science department to explore different aspects of globalization and other worldwide issues, achieve a more tertiary understanding of other cultural backgrounds and develop an appreciation of the impact within other societies on their own life experiences. Students will utilize oral and written communication formats to demonstrate their skills and knowledge reflecting their enhanced reading and information retrieval skills as a result of the successful completion of this course. Students who successfully complete this course will be better prepared to navigate the current global climate effectively, ethically, and professionally.

Engl 290/390/490 Special Topics in English

Credit may vary from one (1) to three (3) credits.

This course emphasizes the study of selected topics in English composition and creative writing. Topics will change each semester and may be repeated for credit.

GArt 123 Photoshop

Prerequisites: None. 3 credits

This course is designed for the art student to learn techniques for using the Raster program Adobe CS Photoshop. Students will explore the uses of raster applications in design and illustration. Digital photography and digital capture will be taught with an emphasis on digital manipulation and painting.

GArt 133 Illustration

Prerequisites: None. 3 credits

This course is designed for the art student to learn techniques for using the Vector program Adobe CS Illustrator. Students will explore the uses of vector applications in design and illustration. Typography and logo design will be taught as it pertains to promotion and commercial applications.

GArt 223 Graphic Design I

Prerequisites: GArt 123 and GArt 133. 3 credits

This course is designed for the art student to learn the basics of graphic design, composition, logo design, and illustration. Students will demonstrate the use of negative and positive space in graphic design.

GArt 233 Graphic Design II

Prerequisites: GArt 123, GArt 133, GArt 223. 3 credits

This course is designed for the art students to use Adobe InDesign combining both Adobe Photoshop and Adobe Illustrator to synthesize vector and raster elements in prepress application for industrial printing. Skills learned will prepare the student for a career in graphic design.

GArt 283 Graduate Project

Prerequisites: All art classes in degree but can take GArt 233 Graphic Design II and Art 283 Web Design concurrently. 3 credits

This capstone project encompasses all the skills with an electronic portfolio (website) produced for future employment. Students will demonstrate all the skills learned in the final project of their choosing under the guidance of an experienced instructor in that field. Students will express goals and aspirations for a career as an artist.

Geog 213 World Regional Geography

Prerequisite: Engl 103. 3 credits

This regional geography class focuses on globalization or the increasing interconnectedness of the nations of the world. In addition to exploring the basic physical, political, and cultural geography of all of the

world's regions, this course investigates important global issues such as the exploitation of natural resources, global warming, population growth, the economic exploitation of third world nations, and the effect globalization and modernization are having upon local traditional cultures.

Geog 290/390/490 Special Topics in Geography

Prerequisite: Engl 113. Credit may vary from one (1) to three (3) credits

This course examines selected topics in geography. Topics will change each semester and may be repeated for credit.

HISA 203 American History I---to 1865

Prerequisite: Engl 113. 3 credits

This course focuses on United States history up until the Civil War while placing that nation within its international context. It begins with a look at some American Indian groups immediately before European contact and ends with the bloodiest war in U.S. history. This course examines not only traditional history—politics, diplomacy, and wars—but also social, cultural, economic, and demographic patterns, trends, and the everyday life of ordinary people.

HISA 213 American History II – from 1865

Prerequisite: Engl 113. 3 credits

This course focuses on United States history after the Civil War while placing that nation within its international context. It begins with a look at how the people of the United States began to recover from the bloodiest war in U.S. history and ends with an examination of the United States' place within the modern post-Cold War world. This course examines not only traditional history—politics, diplomacy, and wars—but also social, cultural, economic, and demographic patterns, trends, and the everyday life of ordinary people.

HISA 323 American Indian History

Prerequisite: Engl 113 and Junior Status. 3 credits

This course offers an in-depth study of American Indian history from the pre-Columbian era until today, with a focus on indigenous nations within what is now the United States. This complex and fascinating history is approached using a variety of media and sources. The course covers social, cultural, and demographic trends, as well as political and diplomatic relationships.

HISA 373 World History

Prerequisite: Engl 113. 3 credits

This course uses a comparative perspective to explore the most important historical events and developments that have taken place throughout the world from early human history through today, from emergence of social inequalities and growth of early urban developments to the processes of colonization and imperialism to World War II, Cold War and decolonization to life in the 21st century. Particular emphasis is placed on how interpretations of the same events differ.

HISA 290/390/490 Special Topics in History

Prerequisite: Engl 113. Credit may vary from one (1) to three (3) credits

This course examines selected topics in history. Topics will change each semester and may be repeated for credit.

Hum 143 Art Appreciation

Prerequisites: None. 3 credits

This course encourages students to be critical participants in the art discourse. Students will explore many different art-making techniques to gain a better understanding of how art objects are made. This course will provide students with the necessary critical tools for analyzing art. Students will build an awareness of the historical context behind western and non-western aesthetics.

Hum 203 Introduction to Philosophy and Critical Thinking

Prerequisite: Engl 113. 3 credits

This course aims to provide an introduction to philosophical thinking in general rather than a full survey of philosophical disciplines, their methods, doctrines, and leading ideas. The course will provide a preliminary orientation about the notion of philosophical argument, its various forms and the ways arguments can be analyzed.

Hum 213 Music and Culture

Prerequisite: Engl 103. 3 credits

This course focuses on various musical styles and related cultural phenomena in relation to both western and non-western worlds. Emphasis is placed upon composers, musical trends, literature, elements of melody, rhythm, form, and expression.

Hum 290/390/490 Special Topics in the Humanities

Credit may vary from one (1) to three (3) credits

This course examines selected topics in the humanities. Topics will change each semester and may be repeated for credit.

LdCm 233 Research Methods

Prerequisite: Engl 113 and SoSc 103. 3 credits

This course introduces students to research methods as it pertains to leadership and communications. Students learn the basics of data gathering, documentation, ethnographic fieldwork, research design, qualitative and quantitative methods.

LdCm 403 Leadership Communication

Prerequisites: LdCm 233 and SpCm 233. 3 credits

This course is designed to provide students to apply and enhance their existing knowledge and skills for effective verbal and written communication transactions with an emphasis on leadership strategies while reinforcing their critical thinking and information retrieval skills.

LdCm 423 Organizational Leadership and Vision

Prerequisite: Engl 113 and SoSc 103. 3 credits

Organizational Leadership and Vision course is in line with Wolakolkiciyapi, where the youth and elder travelled to Bear Butte, to make plans for the future. Organizational Leadership and Vision courses are developed for students specifically at Oglala Lakota College with both leadership in Tribal government, as well as leadership in Non-Profit and For-Profit organizations, both inside and outside of the Oglala Sioux Tribal Region. Students will gain practical knowledge of the entire structure and synthesis of how to participate, run, and build a Tribal Government and Non-Profit and For-Profit Organization from the grassroots up. Students will demonstrate organizational leadership and communication skills.

LdCm 483 Senior Seminar

Prerequisite: Engl 113, SoSc 103, LdCm 233, and Junior Standing. 3 credits

This course is a continuation of LdCm 233 Research Methods. Students design, conduct, and present an original project using various qualitative and quantitative research methods. It also gives students the

professional-level skills and perspectives necessary to be competent and ethical in government administration, leadership, and research.

Lit 203 Introduction to Literature

Prerequisite: Engl 103. 3 credits

The goal of this course is to introduce students to various literary styles and genres while increasing their overall reading and analytical skills. The literary genres of drama, fiction, and poetry will be studied. This course is a prerequisite for all other literature courses offered by the Humanities and Social Science department.

Lit 243 Minority Literature

Prerequisite Engl 103. 3 credits

The goal of this course is to expand students' knowledge of various literary selections through reading response skills. This survey course explores literary selections from authors from varied ethnic and cultural backgrounds through cultural, historical and social contexts. This course acquaints students primarily with minority authors.

Lit 273 World Literature

Prerequisite: Engl 103. 3 credits

This survey course offers readings in translation from the beginning spoken and written words to contemporary Western and non-Western literary traditions to acquaint students with the world's literary masterpieces, to widen students' cultural background, and to develop an understanding of other cultures.

Lit 343 Literature of Nature and the Environment

Prerequisite: Lit 203. 3 credits

The goal of this course is to reinforce students' knowledge of various literary selections by expanding their reading and analytical skills. This survey course explores an overview of literature focused on the broad spectrum of subjects associated with naturalism and environmentalism over the past four centuries. Prerequisites: Lit 203 Introduction to Literature.

Lit 290/390/490 Special Topics in Literature

Prerequisite: Engl 103. Credit may vary from one (1) to three (3) credits

This course examines selected topics in literature. Topics will change each semester and may be repeated for credit.

Pols 203 American Government

Prerequisite: Engl 103. 3 credits

This course is a survey of the history, structure, and functioning of the United States federal government and its agencies. Attention is focused on formal and informal influences, and on decision making at the national level. Students will be asked to assess the subject matter in relation to their own lives and communities.

Pols 423 Environmental Policy and Politics

Prerequisite: Engl 113 and Junior Status. 3 credits

This course examines how environmental policies are formed and implemented – or not implemented. Students study the basic United States environmental policies and look at how these policies impact land and resources on reservations, nationally, and globally. The emphasis is on providing students who will work in natural resource areas with the practical policy information they need to be successful professionals, particularly in government agencies. Lakota land and resources issues receive special consideration.

Pols 433 Public Policy and Administration

Prerequisite: Engl 113 and Pols 203. 3 credits

Public policy and public administration shape our lives every day, from the foods we eat to the problems faced by tribal governments. In this course, students will learn the basic information needed to shape public policy and influence administration to the betterment of their lives and their communities. Topics covered include sovereignty, policy formation and implementation, tribal policies, and policy evaluation. Case studies provide real-life examples of policy and administrative issues in today's world through the examination of the theories and practice of the implementation of policies by the executive branch of tribal, federal, and state governments. Students will demonstrate organizational leadership and communication skills.

Pols 290/390/490 Special Topics in Political Science

Prerequisite: Engl 113. Credit may vary from one (1) to three (3) credits

This course examines selected topics in political science. Topics will change each semester and may be repeated for credit.

Psy 103 General Psychology

Prerequisite: None. 3 credits

This survey course provides an introduction to the concepts, theories, and research behind the study of human thought, emotion and behavior. Some topics covered in this course are learning, memory, perception, and human influence. This course will also address psychology from multiple perspectives (Western, Cultural, and Lakota).

Psy 223 Social Psychology

Prerequisite: Engl 113. 3 credits

In this course, students learn how our thoughts and behaviors are influenced by others: How does self-concept develop? How do we perceive others? What techniques do salespeople, children, and others use to persuade us to do something that we don't want to do? Why are we so likely to conform and behave the same way as others around us? How does a group influence individual behavior? What are the causes and consequences of stereotypes and prejudice? These are only a few of the questions that will be discussed during this course. Particular emphasis will be placed on everyday life, especially in an intercultural context.

Psy 313 Developmental Psychology

Prerequisites: Engl 113, Psy 103. 3 credits

This course surveys the processes of change throughout the individual human lifespan, from conception to death. Physical, cognitive, social, and emotional development through the course of life will be examined using insight from western psychology as well as views from around the world.

Psy 290/390/490 Special Topics in Psychology

Prerequisite: Engl 113. Credit may vary from one (1) to three (3) credits

This course examines selected topics in psychology. Topics will change each semester and may be repeated for credit.

SoSc 103 Introduction to Social Science

Prerequisite: None. 3 credits

This course introduces students to social science disciplines, including anthropology, sociology, history, psychology, geography, economics, and political science. The curriculum covers the major methods and theories that are used in attempting to explain the world that human beings have created. Topics include family, race, gender, globalization, poverty, and culture. Students are asked to assess the subject matter in relation to their own life and community

SoSc 313 Statistics for Social Science

Prerequisite: Math 103, MIS 113. 3 credits

This course covers basic statistical principles and techniques specifically utilized in the social sciences. Statistics is integral to Lakota communities and daily life. It is imperative to understand the basics of statistics, how to input, run analysis and interpret data. Lakota communities are confronted with statistics daily, whether it is examining health information, public safety data, elections and polling, school data, program management, and human resources as a few examples. BY THE END students will be able to identify the types of quantitative data sets and analyses needed to answer different research questions, design simple research projects, and communicate their results to professional audiences.

SoSc 333 Social Science Theory

Prerequisite: Engl 113, SoSc 103 and Junior Status. 3 credits

This course is an introduction to social theory - ideas and sets of ideas about “how the world works.” It provides an overview of social theory from its infancy in the early works of Karl Marx, Emile Durkheim, and Max Weber to its more recent expression in the diverse contributions of thinkers like Michel Foucault, Cornell West, and Edward Said. All of those thinkers, and those who have come after them, addressed themes that have become central to the social sciences: power, conflict, war, social class, social change, agency, structure, inequality, racism, gender relations, culture, religion, and many others.

*Prerequisites: Engl 113, SoSc 103 and Junior Status
3 credits*

SoSc 353 Race and Ethnicity

Prerequisite: Engl 113, SoSc 103 and Junior Status. 3 credits

Students in this course critically analyze issues of race and ethnicity, a major historical and modern factor in human interaction. Using a culturally relativistic perspective, students investigate theory and research related to the interaction of ethnic and racial groups. Topics covered include power relations and stratification, sources of prejudice and discrimination.

SoSc 363 Program Planning and Evaluation

Prerequisites: Engl 113 and LdCm 233. 3 credits

This course prepares students to design programs and organizations for success. It also prepares students to meet a key requirement of those who provide funding for programs and organizations by proving that goals are being met and showing where improvements may be made. The course provides a critical set of skills for anyone who works or will work in government offices or non-profit groups.

SoSc 413 Internship

Prerequisites: SoSc 103, Junior Status, AND instructor permission. 3 credits

Internships grant students first-hand experience in what it means to be a social scientist. Students who are interested in doing an internship are requested to contact full-time social science faculty. Instructors and student collaborate in organizing an internship in the field-of-interest of the latter. Some possibilities are evaluating intervention programs, conducting surveys, working on campaigns, or conducting archaeological fieldwork.

SoSc 463 Development and Nation Building

Prerequisites: Engl 113, SoSc 103 and Junior Status. 3 credits

This course examines post-colonial societies and governments in a globalizing world, with a focus on the historic, economic, and social forces that are involved when societies make the transition to locally led economic development and nation building activities. The challenges associated with creating social, economic, and political opportunities are explored. While the focus is on nation building by indigenous societies of the Americas, cases are also included from Africa and Asia.

SoSc 290/390/490 Special Topics in the Social Sciences

Prerequisite: Engl 113. Credit may vary from one (1) to three (3) credits

This course examines selected topics in social science. Topics will change each semester and may be repeated for credit.

SpCm 103 Speech Communication

Prerequisite: None. 3 credits

This course is designed to provide students with the public speaking skills they will need to express themselves more effectively in their classes, communities and personal lives while providing opportunities to enhance their self-confidence and listening skills while simultaneously improving their abilities to analyze, organize and make a positive impression on their audiences. This course is part of the institution's general education core requirements and is a prerequisite for all of the other Speech and Communication courses.

SpCm 233 Human Communication

Prerequisite: SpCm 103. 3 credits

This course is designed to provide students with opportunities to explore, acquire and apply the fundamentals inherent to effective verbal and written communication with an emphasis on requisite skills for diplomatic, tactful negotiation including techniques for successfully maintaining composure and appropriate situational etiquette. This course introduces students to the psycholinguistic and sociolinguistic factors affecting transactional communication while reinforcing their critical thinking and information retrieval skills.

SpCm 333 Interpersonal Communication

Prerequisite: SpCm 103. 3 credits

Interpersonal Communication is designed to increase your understanding and implementation of effective interpersonal communication behaviors and skills. Basic verbal and nonverbal concepts affecting the communication process between individuals in various interpersonal contexts will be examined. This course requires you to participate in written and oral activities designed to develop and improve interpersonal skills and the quality of your life.

SpCm 413 Nonverbal Communication

Prerequisite: SpCm 103. 3 credits

This course is designed to increase students' understanding of four contexts for nonverbal sub-codes (culture, gender, home, workplace) and the psychological and sociological perspectives associated with nonverbal communication.

SpCm 290/390/490 Selected Topics in Speech

Prerequisite: SpCm 103. Credit may vary from one (1) to three (3) credits.

This course examines selected topics in speech communications. Topics will change each semester and may be repeated for credit.

LAKOTA STUDIES DEPARTMENT

Alex FireThunder, M. A. Lakota Leadership & Management
 Carolyn New Holy, M.A. Lakota Leadership & Management
 Charles White Buffalo, M.A. Lakota Leadership & Management
 Elaine Yellow Horse, J. D.
 Edward Starr, M.A Lakota Leadership & Management
 Marlene Bear Stops (CRCC), M.Ed. Educational Administration
 Karen White Butterfly, M.A. Lakota Leadership & Management
 Darrell Red Cloud, B.A. Lakota Studies

The Lakota Studies Department offers three degrees and a Lakota Language Certificate. The department also provides the focus for the entire college in maintaining a Lakota perspective. All students are required to take courses offered by the Lakota Studies Department in order to increase their knowledge of Lakota heritage and to prepare themselves for contributing to the continuation of the Lakota Oyate traditions and values. The department provides assistance to other departments, offers community workshops/forums, assists in the maintenance of materials relevant to tribal history and culture, and serves to help maintain the Lakota language.

Courses within the Lakota Studies Department range across disciplines. They are taught according to accepted standards within the disciplines of art, music, language, literature, history, political science, psychology, sociology, science, and religion.

VISION STATEMENT

To protect and promote traditional Lakota cultural knowledge and practices

MISSION STATEMENT

The Lakota Studies Department provides a safe learning environment stimulating students to reach their highest potential through a relevant teaching model reflecting diverse Lakota ideology in language, values, kinship, worldview, and sovereignty for a better understanding of wólakħolkičhiyapi as an ongoing dynamic process.

LAKOTA STUDIES OUTCOMES/GOALS

Goal A: Students will have a clear understanding of the Lakota worldview and philosophy. As a result of taking courses related to this goal, students will:

1. Identify, explain, and apply concepts of Lakota ceremonies.
2. Apply respect for the interrelatedness of all things in this world.
3. Identify, explain, and apply Lakota kinship concepts in everyday situations.
4. Identify and apply concepts of mental and physical wellness.

Goal B: Student will gain an understanding of him/herself. As a result of taking courses related to this goal, students will:

1. Identify and explain his/her being.
2. Identify, explain, and apply his/her place within the thiwáhe (family).
3. Identify, explain, and apply his/her place within the oyáte (nation).
4. Identify, explain, and apply the oyáte (nation's) place within makhásitomniyaŋ (the world).

Goal C: Students will gain knowledge of and communicate effectively in speaking and writing the Lakota language. As a result of taking courses related to this goal, students will:

1. Communicate basic ideas in written and spoken Lakota language.
2. Communicate complex ideas in written and spoken Lakota language.

3. Identify, explain, and apply skills in Lakota language teaching methodology.
4. Identify, explain, and apply knowledge of Lakota language evolution.

Goal D: Students will have an understanding of tribal history and implications of sovereignty. As a result of taking courses related to this goal, students will:

1. Identify and explain Lakota treaties with the United States.
2. Identify and explain the implications of sovereignty and apply to contemporary situations.
3. Identify and explain the concepts of traditional government.
4. Identify and explain the concepts of the IRA government.

Goal E: Students will gain an understanding of Lakota arts, music, dance, literature, and traditional healing. As a result of taking courses related to this goal, students will:

1. Identify and explain the history of Lakota arts.
2. Identify, explain, and apply traditional and contemporary Lakota music and dance.
3. Identify, explain, and apply Lakota oral literature into contemporary situations.
4. Identify, explain, and apply Lakota traditional plants, foods, and herbs for mental and physical wellness.

BACHELOR OF ARTS DEGREE IN LAKOTA STUDIES

The Bachelor of Arts in Lakota Studies offers emphasis areas in Lakota Language, Tribal Law, Lakota Arts, and Tourism/Cultural Interpretation. This degree is designed for the person who would like to become a researcher or teacher in these specialized areas. It is also appropriate for archivists, park interpreters, and lawyers.

Plans of Study

LAKOTA STUDIES COURSE DESCRIPTIONS

LArt 103 Traditional Lakota Art I

3 credits.

This course is designed as an introductory course in the crafts and artwork of the Lakota people. The Lakota cultural crafts and techniques to be included are the designs, history of colors, and basic beading techniques.

LArt 113 Traditional Lakota Art II

Pre-requisite: LArt 103 or Instructor approval. 3 credits.

This course is designed as an advanced course in beading techniques and a variety of Lakota and plains tribes' handicrafts. Course will include quillwork and dyes, utilizing natural paints and dyes in parfleche making, and researching traditional and contemporary costume designs.

LArt 203 Indian Art History

Pre-requisite: Engl 103 and LArt 103. 3 credits.

This course will introduce the student to representative works ranging from traditional tribal art to contemporary art, thus enhancing aesthetic appreciation and deepening understanding.

LArt 213 Plains Indian Design Composition

Pre-requisite: Engl 103 and LArt 113. 3 credits.

This course is designed for the research and study of Plains Indian design and development in two and three dimensional art forms through skills techniques in the use of line, form, color, and intensity. Media use includes tempera and oil.

LArt 313 Lakota Artifact and Regalia Reproduction

Pre-requisite: Core and Professional Requirements. 3 credits.

This is an advanced course of study in the area of Lakota/Dakota artifact and regalia reproduction focusing on the period of 1800 to 1923.

LMus 203 Lakota Dance Styles

Pre-requisite: Engl 103. 3 credits.

This course is specifically designed for the study of Lakota/Dakota dance styles and forms. It covers the evolution of Lakota/Dakota dance from traditional times to contemporary.

LMus 303 Lakota Music Composition

Pre-requisite: Core and Professional Requirements. 3 credits.

This course emphasizes the historical, cultural, and traditional aspects of the music known to the Lakota people. Past and present music composition is included, along with the study of the musical instruments used to accompany Lakota music.

Lak 103 Lakota Language I

3 credits.

This is a continuation of the introduction to the Lakota language. Emphasis will be placed on the Lakota alphabet, kinship terms, numerical system and simple sentence structure. Added emphasis will be on everyday language survival skills – speaking the language. Writing will be minimal. (Students who are proficient in Lakota may challenge this course for credit.)

Lak 233 Lakota Language II

Pre-requisite: Lak 103. 3 credits.

This course is designed to continue teaching correct pronunciation, some fundamentals of Lakota grammar, a mastery and increase of basic vocabulary and idiomatic expressions with additional emphasis on reading

and writing. Students will be expected to compose original short stories and retell. The emphasis will be on verbal skills.

Lak 303 Lakota Grammar

Pre-requisite: Professional Requirements. 3 credits.

This course will examine the use of Lakota speech patterns of formal and informal speaking. The study will focus on the parts of speech and their use in word order and meaning. Other related topics will also be included.

Lak 313 Introduction to Lakota Sociolinguistics

Pre-requisite: Professional Requirements. 3 credits.

This course is designed to study the evolution of variations and differences that have occurred with Lakota language usage since the pre-reservation period to the Present. It will also focus on the socio-cultural factors that have influenced the Lakota speaking styles.

Lak 323 Lakota Language III

Pre-requisites: Lak 233. 3 credits.

This course is designed to teach advanced grammar and Lakota literacy. Added emphasis will be on mastery in the usage of honorifics in everyday situations. Verbal skills will be emphasized through storytelling and literacy through composition.

Lak 413 Lakota Public Speaking

Pre-requisite: Professional Requirements. 3 credits.

This course is an examination of the oratory of past and present notable Native American leaders in America with a focus on the Lakota/Dakota communication styles.

Lak 423 Lakota Language IV

Pre-requisite: Lak 323. 3 credits.

This course is designed to continue teaching advanced grammar and Lakota literacy. The major emphasis will be on the utilization of etiquettes of speech in everyday situations and Lakota literacy through writing a term/research paper using the Lakota language.

LkEd 433 Methods of Teaching the Lakota Language

Pre-requisite: Professional Requirements. 3 credits.

Students will learn various methods for teaching the Lakota language for grades K- College. This course will provide students with experiences using the Silent Way, Total Physical Response, and Immersion. They will also learn elements of effective instruction and Lakota student learning styles. Activities will include the development of lesson plans and the effective presentation of lessons.

Lak 443 Lakota Language Assessment

Pre-requisite: Professional Requirements. 3 credits.

This course is a comprehensive study of the essential principles of assessing second language learning with an emphasis on the development of Lakota language proficiency and literacy assessment tools.

LkEd 453 Methods of Teaching Lakota Studies Across the Curriculum

Pre-requisites: Core and Lakota Professional Core Requirements. 3 credits.

Students will learn the various methods and teaching strategies necessary for integrating the Lakota language, literature, history, and culture into K-12 curriculum. They will also learn elements of effective instruction and Lakota student learning styles. Activities will include the development of lesson plans and effective presentation of lessons.

EdLk 473 Student Teaching Seminar in Lakota Studies

Pre-requisites: Completion of all Core Requirements and Professional Core Requirements. 3 credits.

The seminar is aligned with LkEd 419 Student Teaching/ Practicum in Indian Studies. The seminar provides opportunities to share student teaching experiences with colleagues and college faculty members. Students will receive instruction in integrating technology, resume writing, mock interviews, developing professional portfolios as well as character education.

EdLk 489 Student Teaching/Practicum in Indian Studies

Pre-requisites: Completion of all Core Requirements and Professional Core Requirements. 9 credits.

Students spend five days a week for a full semester in supervised practice in an approved elementary classroom. The student teaching experience will involve 8 weeks in a lower elementary classroom and an additional 8 weeks in an upper elementary classroom (or as arranged) under the guidance of certified supportive teachers. Student teachers will fulfill the requirement of 40 hours per week in their assigned classrooms.

LLit 103 Lakota Oral Literature

3 credits.

This course is an analysis of Lakota oral history and literature, covering such areas as the creation of the universe, the creation of living creatures and the Lakota people.

LLit 213 American Indian Literature

Pre-requisite: Engl 103. 3 credits.

This course is a critical survey on the history of written literature during the 19th and 20th centuries by and about the American Indian from the western perspective.

LLit 313 Contemporary Indian Literature

Pre-requisite: Engl 113. 3 credits.

This course will examine the literature of the short story, novel, poetry, film, and autobiography/ biographies authored by contemporary American Indian writers.

LHist 203 Lakota History I

Pre-requisite: Engl 103. 3 credits.

This course is an introduction to the Lakota historical development as relayed through oral history and tribal beliefs. It is a general study of the social, cultural, political, and economic history of the Lakota people prior to 1878. (This may apply towards the History Degree).

LHist 213 Lakota History II

Pre-requisite: Engl 113. 3 credits.

This course is an in-depth study of the historical events, social life, cultural traditions, political structure, leadership, and economic development of the Lakota nations and people from the beginnings of the reservation period (1876-1878), during the beginning of the IRA period (1935) and continuing to the present. (Also required for the History Degree).

LHist 323 Seminar in Contemporary Indian Issues

Pre-requisite: Core Requirements. 3 credits.

This course is a study of contemporary Native American and Lakota historical development since 1940 with an emphasis on active field research on the social, political, and economic aspects of reservation life. It includes thorough examination of the Indian Reorganization Act, Termination, Civil Rights, Indian Religious Freedom Act, and Self-Determination and their effects on contemporary life.

LHist 353 Lakota-U.S. Military Confrontations

Pre-requisite: Professional Core Requirements. 3 credits.

This course is an in-depth study of the major military confrontations between the Lakota (Sioux) nation and the U.S. military from the 1850's through the 1890. Field work on battle sites will be conducted upon completion of the necessary coursework.

LPol 213 American Indian Political Systems

Pre-requisite: Engl 103. 3 credits.

This course is a study of Am. Indian tribal political systems and tribal organizations for decision making.

LPol 303 Lakota Tribal Law, Treaties, and Government

Pre-requisite: Core Requirements. 3 credits.

The concept of tribal sovereignty involves the relationship of tribal people to federal and state governments through historical development of treaties, congressional acts and court decisions.

LPol 313 Indian Law

Pre-requisite: Core Requirements. 3 credits.

This course will involve an in-depth consideration of the special attributes to federal, state, and tribal laws as they relate to Indian citizens both on and off the reservation.

LLaw 333 Contract Law

Pre-requisite: Core Requirements. 3 credits.

Students will learn the elements of contracts, enforcement of contract law, the formation of a contract, drafting a contract, discharge of legal obligations, assignments, and contract remedies.

LLaw 343 Legal Research and Writing

Pre-requisite: Core Requirements. 3 credits.

Students will learn the basic tools of legal research and writing as used in state, federal and tribal courts. The course includes a study of legal terminology, drafting of civil complaints, answers, pre-trial motions, briefs and legal memoranda. Students will utilize Supreme Court opinions at the Tribal, Federal and State levels in researching legal issues.

LLaw 403 Criminal Law and Procedures

Pre-requisite: Core Requirements. 3 credits.

This course will focus on the criminal code of the Oglala Sioux Tribe and other criminal laws of other jurisdictions. Students will learn the elements of offenses, the role of the tribal prosecutor and defense strategies. Students will study the criminal process from arrest through arraignment, pretrial and post-trial procedures. Tribal, federal, and state criminal jurisdiction issues will be covered.

LLaw 413 Civil Law and Procedures

Pre-requisite: Core Requirements. 3 credits.

This course will include a study of tribal civil jurisdiction, civil causes of action, torts and civil procedures of the tribal court. Students will learn the nature of civil complaints, responsive pleadings, pretrial and post-trial procedures including appellate procedures of the Oglala Sioux Tribal Court.

LLaw 423 Family Law

Pre-requisite: Core Requirements. 3 credits.

This course will examine the various legal and social issues involved in the practice of family law. Students will study the Indian Child Welfare Act and the Juvenile Code of the Oglala Sioux Tribe. Students will receive instruction in client interviewing techniques for drafting of pleadings necessary in the area of divorce, legal separation, adoption and child custody.

LPsy 323 Native American Psychology

Pre-requisite: Core Requirements. 3 credits.

This course is a study of Native American tribes dealing with a focus on human behavior, personality development, individual differences, and reactions to western culture influences and environment.

LSoc 103 Lakota Culture

3 credits.

This course is a study of Lakota cultural development including a general study of customs, beliefs, rituals and social patterns of the Lakota people.

LSoc 223 Lakota Social Systems

Pre-requisite: Engl 103. 3 credits.

This course examines and gives an understanding of Lakota society and social philosophies. The governmental structure and morals are examined with cross-cultural values of contemporary society.

LSoc 303 American Indian Women

Pre-requisite: Core Requirements. 3 credits.

This course is designed to emphasize the qualities, attributes, expectations, and importance of American Indian female etiquette with a focus on the female role. The aspects of nature to be studied in detail are the spiritual, emotional, physical, and intellectual.

LSoc 313 Lakota Thought and Philosophy

Pre-requisite: Core Requirements, LSoc 103. 3 credits.

This course examines the customs, beliefs, and philosophical outlook of the Lakota person in relation to the universe, to the supernatural and to the relationship with all creation.

LSoc 403 The Culture of the American Indian

Pre-requisite: Core Requirements. 3 credits.

This course offers a general study of the past and present survival patterns of the American Indian in North America.

LTh 443 Comparative Studies in Lakota Religion

Pre-requisites: Core Requirements. 3 credits.

This course is a comparative analysis of the contemporary diversity of Lakota religious practices on Lakota reservations, including the early Christian denominations and their effects and tracing the traditional Lakota religious practices from the pre-reservation period to the present.

LSci 203 Traditional Plants, Foods, and Herbs

3 credits.

This course explores over thirty different herbs and plants that were used traditionally by Lakota households for general health and healing purposes. Students will do local field studies and will be required to gather and identify the different plants and learn the importance of them according to cultural beliefs, tradition, and song.

LSci 303 Lakota and the Environment

Pre-requisite: Core Requirements. 3 credits.

This course traces the evolution of the European and Native American cultures and their influence on the ecosystem and their effects on the environment and the transformation of a pre-industrial society into an industrial society. It will examine the colonization efforts of the European culture on the Native American culture and the effects industry has on the environment, land, wildlife, water, and the earth (Unci Maka).

LSocM 303 Lakota Cultural Resource Management

Pre-requisite: Core Requirements. 3 credits.

This is a course designed as an introduction to preserving historical records, and the use of archival resources with an emphasis on the role of the Oglala Lakota College archives. The content of the course will survey the archives theory and methods which archivists use in collecting and processing historical and institutional records. Lectures on archival theory, methods, and archaeological research methods and resources conducted by professionals in the fields of archives and archaeology.

LSocM 313 Introduction to Interpretation

Pre-requisite: Core and Professional Requirements. 3 credits.

This course serves as a foundation course in the development of effective interpretation, communication and education techniques for interpreting natural and cultural resources to the public.

LSocM 323 Travel and Tourism

Pre-requisites: Core and Professional Requirements. 3 credits.

This course is intended to develop the communication skills necessary for success in the travel and tourism industries. Students learn the fundamental expectations of the travel and tourism industry to prepare for future employment within the industry.

LSocM 403 Interpretive Program Design

Pre-requisite: Core and Professional Requirements. 3 credits.

This course serves as the intermediate level focused on taking complex concepts, ideas and history, and creating intellectual and emotional opportunities for connections to natural and cultural resources. Students apply coursework in the planning, designing, and implementation of interpretive programming.

LSocM 413 Advanced Interpretive Techniques

Pre-requisite: Core and Professional Requirements. 3 credits.

This course is designed to serve as the capstone to the Tourism/Cultural Interpretation emphasis. Implementation and evaluation of interpretation artifacts, as well as an interpretive plan for a local site determined by the instructor/class serves as a pivotal aspect of the course.

Lak 283/483 Internship in Lakota Studies

Pre-requisites: Chairperson Approval and in the last semester of the AA or BA in Lakota Studies Degree Program. 3 credits.

This course offers an on-site experience for students on the reservation or with an institution that deals with Lakota knowledge. Students will work with cultural-religious leaders, tribal political leaders, educational leaders, museum/archival persons, or any other persons as approved by the Lakota Studies Chairperson.

Lak 293/493 Special Topics in Lakota Studies

Pre-requisite: Chairperson Approval. Variable Credits.

This course offers a selected number of topics in Lakota Studies including the writing of local Lakota history, Lakota language immersion sessions, and projects in Lakota arts, literature, oral history, and a variety of other topics as requested by the communities.

VISION STATEMENT

To create a dynamic educational ecosystem centered on Lakota values to restore and sustain our living world for future generations by fostering future leaders, collaboratively acting with tribal agencies and research-community partners, and deepening community engagement in STEM. MST graduates will demonstrate mastery of their respective fields using current technologies and best practices.

MISSION STATEMENT

The Math, Science, and Technology learning philosophy emphasizes an experiential learning, hands-on approach, to fulfill science, engineering, and information technology needs to improve the quality of life on the Reservation.

Our mission statement emanates from the Oglala Lakota College mission to empower students with *wolakolkiciyapi* and STEM expertise, equipping them to assume leadership roles within and beyond the Lakota Nation.

In achieving the Mission, the MST department has the following purposes which are aligned with the OLC Strategic Plan:

Tribal: Support and train new and existing Tribal professionals in science, technology engineering, and mathematics through academics and problem solving;

Cultural: Support, encourage, and respect Lakota values in all aspects of our academic, research, and outreach efforts;

Academic: Establish a foundation of academic excellence for our stakeholders in Science, Technology, Engineering, and Mathematics;

Community: Positively influence the perception of science, technology, engineering, and mathematics in Tribal communities through formal and informal learning opportunities with the K-12 education community.

DEGREE PROGRAMS

BACHELOR OF SCIENCE IN NATURAL SCIENCE

The Bachelor of Natural Science degree provides students with a solid foundation in the disciplines of mathematics, physical, and biological sciences needed to collaboratively solve multi-faceted environmental issues in conservation biology, earth science, and natural resources, and skills to succeed in a Master or Ph.D. program in the natural sciences.

Mission

The MST mission is to empower students with *wolakolkiciyapi* and STEM expertise, equipping them to assume leadership roles within and beyond the Lakota Nation.

Conservation Biology Program Learning Outcomes (PLO):

1. Students can express natural phenomena and relationships quantitatively.
2. Students can relate the biosphere and ecosphere through the field and laboratory.
3. Students can characterize ecosystem health based on physical, chemical, and biological factors.
4. Students can manipulate geospatial and remotely sensed data, manage GIS projects, and independently create projects using an ArcInfo GIS platform.
5. Students can describe the flora and fauna of the Black Hills and Badlands in South Dakota
6. Students can conduct an independent research project in conservation biology.

BS Natural Science (Conservation Biology) Suggested Program of Study (5-year plan, 120 credit hours)

Conservation Biology Electives should be selected in consultation with the student's research mentor and support the student's research project in Sci 273, NSci 393, NSci 493.

Earth Science Program Learning Outcomes (PLO)

1. Students can relate the atmosphere, geosphere, and hydrosphere through chemistry.
2. Students can characterize watershed and stream ecosystem structure and health based on physical, chemical, and biological factors, including human and natural impacts on the watershed, such as floods and drought.
3. Students can manipulate geospatial and remotely sensed data, manage GIS projects, and independently create projects utilizing ArcGIS.
4. Students can describe the geological processes and history of the Black Hills and Badlands in South Dakota.
5. Students can conduct an independent research project in earth science.
6. Students demonstrate a fundamental understanding of biology, ecology, mathematics, and physics.

BS Natural Science (Earth Science) Suggested Program of Study (Five-year plan, 120 credit hours)

INFORMATION TECHNOLOGY

Information Technology Vision

Our vision is to provide Pine Ridge and surrounding areas with quality Information Technology professionals with a background with a foundation in operating systems and networking.

Information Technology Mission

Information Technology Department graduates will demonstrate a technical networking mind to fulfill the Information Technology needs of the Oglala Lakota People.

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

Information Technology Program Student Learning Outcomes (PLO)

The student learning outcomes describe the knowledge, skills, and core competencies of Information Technology graduates of Oglala Lakota College. Our goal in Information Technology is to graduate students who demonstrate a technical networking mind as network managers to fulfill the Information Technology needs of the Oglala Lakota People.

At the time of program completion, each Bachelor of Science student will:

PLO1: Project Administration: Communicate effectively with network stakeholders through solid project management.

PLO2: Hardware: Install, maintain, and support computer hardware in a networked and stand-alone environment.

PLO3: Operating Systems: Install, maintain, and support network and client operating systems.

PLO4: Network: Install, maintain, and support a network given a hypothetical or real LAN or WAN situation.

PLO5: Security: Secure devices, networks, and data.

PLO6: National Certifications: Complete selected national certifications in hardware (A+), Network (Network+), and Security Certified Network Professional (SCNP).

Suggested eight-semester program to complete the BS in IT Degree

*If a student is planning to pursue a graduate degree in IT or computer/data science, it is recommended that the student take a statistics class as well as Math 163 and Math 194.

ASSOCIATE OF SCIENCE IN INFORMATION TECHNOLOGY

The **Associate of Science in Information Technology** is a two-year degree that provides its recipients with the knowledge and skills to become a successful IT technician and prepares students for the BS IT program.

At the time of program completion, each Associate of Science student will:

PLO1: Project Management: Demonstrate effective communication with network stakeholders.

PLO2: Hardware: Summarize the process of installing, maintaining, and supporting computer hardware in a networked and stand-alone environment.

PLO3: Operating Systems: Summarize the process of installing, maintaining, and supporting network and client operating systems.

PLO4: Network: Summarize the process of installing, maintaining, and supporting a network given a hypothetical or real LAN or WAN situation.

PLO5: Security: Apply knowledge to secure devices, networks, and data.

PLO6: National Certifications: Apply knowledge learned to complete selected national certifications required for the Associate level courses (A+ Core, A+ Core 2, Network+, LINUX+, and PMP).

Suggested 4 semester program to complete AS in IT.

ASSOCIATE OF ARTS DEGREE IN PRE-ENGINEERING

The purpose of the Pre-Engineering associate degree is to prepare students to transfer into accredited engineering and science baccalaureate programs. A comprehensive articulation agreement was accepted by the South Dakota Board of Regents (SDBOR) to transfer course credit from Oglala Lakota College (OLC) to ABET-accredited science and engineering programs at South Dakota School of Mines and Technology (SDSMT) and South Dakota State University (SDSU).

Mission

The MST mission is to empower students with *wolakolkiciyapi* and STEM expertise, equipping them to assume leadership roles within and beyond the Lakota Nation.

PROGRAM LEARNING OUTCOMES (PLO)

Program Learning Outcomes for Pre-Engineering, which are developed from ABET program learning outcomes, are designed to provide our students with a foundation to excel in baccalaureate programs across engineering and science disciplines.

Students graduating from the Pre-Engineering program will demonstrate the ability to:

- Apply knowledge of mathematics, science, and engineering.
- Design and conduct experiments, as well as analyze and interpret data.
- Use the techniques, skills, and tools necessary for individual success in BS science and engineering programs.

ASSOCIATE OF ARTS DEGREE IN LIFE SCIENCE

Health issues are a major concern on the Pine Ridge Reservation. Students in Life Science are encouraged to explore the connections between health-related issues and the environment and complete Baccalaureate and graduate degrees in the areas of biology, physiology, biochemistry, or medicine. The purpose of the Life Sciences associate degree is to prepare students to transfer into accredited nursing or medical schools as well as Science and Secondary Education Baccalaureate programs at OLC and elsewhere.

Mission

The MST mission is to empower students with *wolakolkiciyapi* and STEM expertise, equipping them to assume leadership roles within and beyond the Lakota Nation.

The **Program Learning Outcomes (PLO)** for the OLC Life Sciences AA degree are congruent with educational goals developed by the OLC Department of Math. Science & Technology for the BS in Natural Science along with OLC's departments of Nursing and Education:

- Demonstrate basic knowledge of mathematics, biology, and chemistry in situations encountered by a Life Science Major.
- Demonstrate good laboratory skills.
- Critically review and communicate scientific data in a qualitative and quantitative manner through oral and written formats.
- Distinguish how alterations to the human body systems can contribute to disease.
- Identify and relate research methods and protocols.

Assessment

The MST department assessment follows the institutional assessment framework as part of a program of continuous improvement. The MST departmental assessment strategy includes: 1) institutional effectiveness plans (IEPs), 2) adoption and improvement of master syllabi through the peer-review process, 3) adjunct and full-time faculty observations, 4) course-level assessment, 5) program-level assessment, and

6) longitudinal student tracking. In addition to academic assessment, the MST department assesses its grants both internally through annual reports to grant funders and externally through evaluators.

MST departmental assessment results and data are on file electronically and in hard copy. Institutional effectiveness plans are filed with the Assessment Director and an electronic copy is maintained by the Department Chair. Course-level assessment forms and instructor syllabi are provided on the MST departmental website. Hard copies of assessments and artifacts are archived at the MST departmental offices at Piya Wiconi, and electronic copies are stored along with a master longitudinal tracking spreadsheet.

Oglala Lakota College Center for Science and Technology (OLCST)

Nicholas Klein, Biogeochemist

Phone: (605) 455-6058; Email: cgriffith@olc.edu

The National Science Foundation has provided OLC with funding to build and equip the laboratories of the Oglala Lakota College Center for Science and Technology. At present, our facilities include analytical chemical laboratories, a water resources laboratory, a microbiology laboratory, a GIS remote sensing laboratory, a necropsy laboratory, and curation facilities. Our analytical laboratories include the following analytical instrumentation: atomic absorption graphite furnace, atomic absorption flame spectrometer, gas chromatograph mass spectrometer, ion chromatograph, benchtop x-ray fluorescence analyzer, and x-ray diffraction analyzer. The GIS remote sensing laboratory has been a center for academic, research, and community outreach programs. The GIS remote sensing laboratory has an extensive collection of geospatial imagery as well as the latest version of ArcGIS. Our necropsy laboratory and curation facilities are available to prepare and house vertebrate and invertebrate specimens, botanical collections, and soil, geological, and paleontological samples from the Pine Ridge reservation. We also have instrumentation available for field use including a GeoProbe®, handheld x-ray fluorescence analyzer, LIDAR camera, portable visible, near-infrared spectrometer, drone, and sondes for continuous water quality measurement.

Our programs of study emphasize hands-on learning through student internship opportunities, classroom-based research, and geospatial understanding. Our degree programs allow our faculty to share their diverse experience in the areas of chemistry, geology, hydrology, biology, ecology, and GIS remote sensing, as well as the flexibility for a student to tailor a degree program to his or her educational needs. Our laboratory instrumentation is used to enhance chemistry, earth science, and conservation biology courses, reservation-based research projects, and research collaboration with other colleges and universities. Math and science students are encouraged to become involved with ongoing research projects as student interns.

MATH, SCIENCE, AND TECHNOLOGY COURSE DESCRIPTIONS

Bio 103 Human Biology

3 credits.

This course provides an introduction to human biology, including the evolution, natural history, and ecology of humans. Emphasis is placed on what biological sciences have to say about maintaining human health. Native American views of health are also discussed.

Bio 113 People and the Environment

3 credits.

This course focuses on the role of people in ecosystems and the global effects of their alterations of those ecosystems. The influence of European and Native American cultures on people's activities in the ecosystem will be discussed. Alternatives for human survival and the well-being and sustainability of the biosphere will be explored.

Bio 153 Biology I

Prerequisites: Student must have tested into college level English, may take concurrently with Engl 103. 3 credits.

This course begins with the basic chemistry of life and proceeds through cell structure and function to animal embryology, plant life cycles, hormonally and environmentally influenced growth processes, and plant and animal anatomy and physiology.

Bio 151 Biology I Lab

Prerequisites: Student must have tested into college level English, may take concurrently with Engl 103. 1 credit.

This laboratory covers the use of microscopes and other elementary laboratory equipment. Students will conduct experiments that demonstrate principles discussed in lectures. Slides of structures and organisms, as well as preserved specimens, will be used to illustrate comparative morphology and function in plants and animals.

Bio 163 Biology II

Prerequisites: Student must have tested into college level English, may take concurrently with Engl 103. 3 credits.

This course emphasizes ecological and evolutionary concepts, including classification, natural history, genetics, plant and animal diversity, and behavioral ecology.

Bio 161 Biology II Lab

Prerequisites: Student must have tested into college level English, may take concurrently with Engl 103. 1 credit.

This laboratory allows students to conduct experiments that demonstrate principles covered in lecture. Dissections of representative invertebrate and vertebrate organisms will be used to illustrate the comparative anatomy within the animal kingdom.

Bio 204 Basic Microbiology

Prerequisites: Student must have tested into college level English, may take concurrently with Engl 103. (3,2) 4 credits.

A survey course of bacteriology and immunology for allied health students. Emphasis is on bacterial anatomy, physiology and genetics, immune response and medical applications. The laboratory demonstrates common clinical procedures involved in the isolation and identification of bacteria. (3hrs lecture, 2hrs lab)

Bio 223 Ecology

Prerequisite: Bio 153 and Bio 151. 3 credits.

The study of the interrelationship of living organisms and the environment. Topics include interactions at the population, community, and ecosystem levels, the study of energy flow and nutrient cycling within these systems. Included also is the study of the geologic, hydrologic, and atmospheric processes involved in the maintenance of life on earth, with emphasis on the importance of human actions to promote sustainability and health of natural processes.

Bio 224 Human Anatomy

Prerequisite: Student must have tested into college-level English, may take concurrently with Engl 103. 4 credits.

Systematic study of gross anatomy and normal homeostasis functions of the human body. Systems studies include the skeletal, muscular, and nervous systems. The laboratory is used to demonstrate these concepts through dissection and physiological experiments and demonstrations. (3hrs lecture, 2hrs lab)

Bio 234 Human Physiology

Prerequisite: Chem 114 or Chem 233. Can be taken concurrently with Chem 114 or Chem 233. 4 credits.

A continuation of Bio 224. Systems studied will include cardiovascular, respiratory, digestive, urinary, reproductive and endocrine systems. (3hrs lecture, 2hrs lab)

Bio 303 Field Ecology

Prerequisite: Bio 223. 3 credits.

This is a field course surveying the basic research methods used in sampling and describing characteristics of plant and animal populations and communities. Emphasis will be placed on grassland, forest, wetland, and riparian systems in Southwest South Dakota.

Bio 413 Mammalogy

Prerequisite: Bio 223. 3 credits.

This course includes study of the classification, evolution, distribution, identification, life histories, and morphological, ecological, and behavioral adaptations of mammals. Emphasis is placed on species of the Great Plains ecosystem.

Bio 443 Range Ecology (Co-listed as Rang 443)

Prerequisite: Bio 303 or permission of instructor. 3 credits. A study of the dynamics and structure of range plants and animals upon each other, and the area on which they are living including the effects of human-related activities. Special emphasis is given to the role of herbivores on species composition and distribution of plant communities.

Bio 463 Conservation Biology

Prerequisite: Bio 223. 3 credits.

A study of the principles and practices associated with the maintenance of maximum biodiversity and stability of ecosystems throughout the world. The importance of retaining genetic variability in wild populations is examined.

Biol 413 Animal Behavior

Prerequisites: Bio 223. 3 credits.

This course will present a biological perspective on the behavior of organisms from invertebrates through humans. Environmental and innate components of behavior will be discussed. Emphasis will be placed on social systems and the understanding of human behavior through comparative analysis with related social vertebrate species.

Biol 453 Advanced Ecology

Prerequisites: Bio 223, Bio 303, Math 123, or permission of the instructor. 3 credits.

This course will build on information presented in general ecology, focusing on the ecology of South Dakota, with discussion of status and threats to those ecosystems. A research project will be undertaken in which the student designs a study investigating some aspects of wildlife or ecosystem interactions. Research may involve studying a local plant or animal population to better understand its ecological requirements or the investigation of a habitat and the interactions of plant and animal populations in that ecosystem.

Biol 463 Evolution

Prerequisites: Bio 223 or permission of the instructor. 3 credits.

This course will present the history of the development of the theory of natural selection and evolution as first elucidated by Charles Darwin and Alfred Wallace. The concurrent work of Mendel will be discussed as well as more modern developments in genetics, molecular biology, sociobiology, paleontology, and anthropology.

Chem 103 Survey of General Chemistry

Prerequisite: Math 134. 3 credits.

An introduction to inorganic chemistry stressing basic concepts and the language of chemistry.

Chem 114 Chemistry for the Health Sciences

Prerequisites: Math 103. 4 credits.

Introduces the basic concepts of general and organic chemistry helpful for nursing students. Lecture topics will include, but not be limited to Scientific Measurements, Chemical (Inorganic and Organic) Nomenclature, Molar and Percentage Mathematics, Reactions, and a study of Solutions (including pH) as well as discussions of aliphatic and aromatic organic compounds. The instructional approach of Chem 114 will emphasize how these differing chemical concepts affect the human body. Chem 114 does not satisfy the requirements for Chem 233.

Chem 111 Chemistry for Health Sciences I Laboratory

Prerequisites: Concurrent registration in Chem 114. 1 credit.

Reinforces, in a practical format, the concepts and ideas introduced in Chem 114. Topics will include, but not be limited to, scientific concepts of weights and measures, gas law equations and calculations, solution calculations (including molarities and pH), percentage mathematics, and thermodynamic predictions and calculations.

Chem 233 General Chemistry I

Prerequisite: Math 134. 3 credits.

An in-depth survey of inorganic chemistry. This course stresses the concepts and language of chemistry, including periodic properties, reactions, mathematics and algebraic manipulation of existing formulas, physical chemistry, and environmental issues dealing with the topic of atmospheric gases and surface groundwater. Chem 231 must be taken concurrently.

Chem 231 Experimental General Chemistry Lab I

Prerequisite: Must be taken concurrently with Chem 233. 1 credit.

The fundamentals of chemical laboratory techniques and practice, the behavior of chemical compounds and quantitative measurements illustrating the laws of chemical combinations.

Chem 243 General Chemistry II

Prerequisite: Chem 233. 3 credits.

An advanced study of inorganic chemistry. Topics include in-depth mathematical formulas of chemistry and their manipulation, acid-base chemistry, complex reactions and their prediction, thermodynamics,

nuclear chem., metallurgy, and an introduction to organic chemistry. Chem 241 must be taken concurrently.

Chem 241 Experimental General Chemistry Lab II

Prerequisites: Must be taken concurrently with Chem 243, or permission of instructor. 1 credit.

Laboratory work will complement the topics covered in Chem 243.

Chem 253 Organic Chemistry I

Prerequisites: Chem 233 and Chem 231. 3 credits.

This is an introduction to organic chemistry. Topics will include nomenclature of aliphatic and basic aromatic compounds and their derivatives, reaction predictions with industrial and environmental applications, chemical properties and synthesis and an introduction to biochemistry. Chem 251 must be taken concurrently.

Chem 251 Organic Chemistry Lab I

Prerequisite: Must be taken concurrently with Chem 253. 1 credit.

Laboratory work will complement the topics covered in Chem 253.

Chem 263 Organic Chemistry II

Prerequisite: Chem 253 and Chem 251. 3 credits. Designed to be sequential with Chem 253, topics will include: chemistry of carbon compounds, isomerism, an introduction to nucleophilic substitution and elimination reactions, and a further examination of certain biochemistry principles such as the study of carbohydrates, lipids and proteins, including their role in metabolic reactions. Chem 261 must be taken concurrently.

Chem 261 Experimental Organic Chemistry Lab II

Prerequisite: Must be taken concurrently with Chem 263. 1 credit.

Laboratory work will complement the topics covered in Chem 263.

Chem 323 Environmental Chemistry

Prerequisite: Chem 243. 3 credits.

A study of the chemical nature of air, water and earth. Some of the specific topics will include ozone layer, greenhouse effect, radioactivity, acid rain, nutrient cycles, and ecosystems.

Chem 351 Organic Chemistry for Educators Lab I

Prerequisite: Must be taken concurrently with Chem 353. 1 credit.

Laboratory work will complement the topics covered in Chem 353. A methodology component is included.

Chem 353 Organic Chemistry for Educators I

Prerequisites: Chem 233 and Chem 231. 3 credits.

This is an introduction to organic chemistry. Topics will include nomenclature of aliphatic and basic aromatic compounds and their derivatives, reaction predictions with industrial and environmental applications, chemical properties and synthesis, and an introduction to biochemistry. Chem 351 must be taken concurrently. A methodology component is included.

Chem 361 Organic Chemistry for Educators Lab II

Prerequisite: Must be taken concurrently with Chem 363. 1 credit.

Laboratory work will complement the topics covered in Chem 263. A methodology component is included.

Chem 363 Organic Chemistry for Educators II

Prerequisite: Chem 353 and Chem 351. 3 credits.

Designed to be sequential with Chem 353, topics will include: chemistry of carbon compounds, isomerism,

an introduction to nucleophilic substitution and elimination reactions, and a further examination of certain biochemistry principles such as the study of carbohydrates, lipids and proteins, including their role in metabolic reactions. Chem 361 must be taken concurrently. A methodology component is included.

Chem 423 Laboratory Equipment

Prerequisites: Chem 243, Chem 241. 3 credits.

This course gives students exposure to analytical laboratory equipment used in the environmental sciences. Students will have opportunities to analyze soil, and water samples for contaminants using analytical instrumentation at the Lakota Center for Science and Technology, which may include mass-spectrometer with gas chromatograph (GC-MS), ion chromatograph (IC), x-ray diffraction (XRD), x-ray fluorescence (XRF), atomic absorption (AA) flame and/or furnace.

Engr 101 Introduction to Engineering I

Prerequisite: Math 103. 1 credit.

Students are introduced to the concept of being professional and the ethics required of a professional person through hands-on service-learning projects to meet community needs, as well as reflection through journaling.

Engr 111 Introduction to Engineering II

Prerequisites: Math 103. 1 credit.

This course is designed to give students the opportunity to learn how to solve engineering analysis and design problems through community focused service learning. Students will develop computational skills, sharpen communication skills, and be exposed to professional development in the form of team building, technology tools, and project management. In addition, students will have the opportunity to learn from professional engineers, scientists, and stakeholders through project-based interaction.

Engr 133 Introduction to CADD

Prerequisite: Math 103. 3 credits.

Students will learn to construct drawing documents using computational software packages to model analytical and survey data in 3D and incorporate advanced manufacturing with their products using a “hands-on” approach.

Engr 202 Construction Materials

Prerequisites: Chem 233. 2 credits.

Principles that govern physical and mechanical properties of ferrous and nonferrous metals, plastics, bituminous materials, portland cement, aggregates, concrete, and timber. Laboratory exercises to demonstrate basic principles and standard laboratory tests (ASTM Standards) of structural materials. Computer-aided graphics and word processing are required for lab reports.

Engr 201 Construction Materials Lab

Corequisites: Engr 202 Prerequisite: Chem 231. 1 credit.

Basic structure of materials and their effects on material properties. Laboratory tests on materials (ASTM Standards) to demonstrate basic principles of structural materials.

Engr 213 Elementary Surveying

Corequisite course: Engr 201. Pre-requisites: Math 163. 3 credits.

Care and operation of instruments, concepts of horizontal and vertical control; measurement of horizontal distances, vertical angles and elevation differences, basic surveying computations and field practice. Coverage includes the definition and analysis of errors of measurement. Additional topics include horizontal curves, traverse work and construction surveying. The course includes an introduction to the concepts and applications of GPS and GIS to surveying practice.

Engr 211 Elementary Surveying Lab

Corequisite course: Engr 213. Pre-requisites: Math 163. 1 credit.

Laboratory portion of Engr 213. Care and operation of instruments, concepts of horizontal and vertical control; measurement of horizontal distances, vertical angles and elevation differences, basic surveying computations and field practice. Coverage includes the definition and analysis of errors of measurement. Additional topics include horizontal curves, traverse work and construction surveying. The course includes an introduction to the concepts and applications of GPS and GIS to surveying practice.

Engr 223 Principles of Environmental Science

Prerequisites: Chem 243. 3 credits.

Introduction to the basic principles of environmental management, environmental science and engineering. The course will teach the fundamental physical, biological, and chemical principles of environmental processes. The course will also explore the impact of humans and human activity on ecosystems in the environment. This course is co-listed with NSci 323.

Engr 244 Statics

Prerequisites: Math 194. 4 credits.

The study of the effects of external forces acting on stationary rigid bodies in equilibrium. Vector algebra is used to study two and three-dimensional systems of forces. Trusses, frames and machines, shear and moment in beams, friction, centroids, moments of inertia, and mass moments of inertia are discussed.

Engr 253 Mechanics of Materials

Prerequisites: Engr 244. 3 credits.

Basic concepts of stress and strain that result from axial, transverse, and torsional loads on bodies loaded within the elastic range, shear and moment equations and diagrams, combined stresses, Mohr's circle; beam deflections; and column action and equations.

Geol 143 Physical Geology

Prerequisites: Engl 103 and Math 103. 3 credits.

Rock-forming processes and identification, mass waste, groundwater, streams, and appropriate geological engineering technologies through project-based and hands-on learning. Emphasis is given to the engineering significance of processes and their resulting deposits in the study of geological processes acting on the Earth's surface.

Geol 141 Physical Geology Lab

Suggested co-requisite Geol 143. Prerequisite: Engl 103 and Math 103. 1 credit.

Application of basic concepts in the study of the earth emphasizing geological processes acting on the earth's surface. Topics include an introduction to topographic and geologic maps, rock identification, mass waste, groundwater, streams, glaciers, and earthquakes with an emphasis on the engineering significance of processes and their resulting deposits.

Geol 153 Historical Geology

Prerequisites: Math 103. 3 credits.

This course involves a survey of the geological history of planet Earth with special emphasis on the northern Great Plains. Topics will include the rock cycle, stratigraphy, plate tectonics, evolution, and fossil and archeological records. Typically includes at least one field trip.

Geol 213 Soils I

3 credits.

Introductory course in which students learn the basic structure, formation, and classification of soils, physical and biological properties, management aspects including water, fertility, and erosion, and the role

of soils in the environment.

Geol 303 Soils II

Prerequisites: Geol 213. 3 credits.

This course focuses on the description, classification, and mapping of soils in western South Dakota and the Pine Ridge Reservation. Includes field description and identification of soils and paleosols from the Cenozoic rock record.

GIS 213 Introduction to GIS

Prerequisites: Math 134 and MIS 113. 3 credits.

Geographic Information Systems (GIS) are essential to the solution of many types of management, planning, environmental, and applied research problems. This course is designed to provide dedicated students, instructors/tribal members, or teachers with a basic understanding of current mapping technology by introducing students to principles and the application of geographic information systems, with emphasis on GIS analysis techniques.

GIS 313/513 Applications of GIS

Prerequisites: GIS 213. 3 credits.

Geographic Information Systems (GIS) are essential to the solution of many types of management, planning, environmental, and applied research problems. This course is designed to provide dedicated students, instructors/tribal members, or teachers with a basic understanding of raster manipulation, editing, and geodatabases using ArcGIS.

GIS 323 Remote Sensing

Prerequisites: GIS 213. 3 credits.

This challenging course rewards the student with an insight on classification methods of multi-spectral data. Students will study current remote sensing systems, focusing on the digital image processing techniques utilized to analyze data collected by these systems. This course summarizes the physical background of earth's radiation interaction and provides detailed step-by-step instructions for using satellites in earth resources applications. Lectures will review the specific airborne and spaceborne systems, while lab assignments will cover the digital manipulation and analysis techniques employed by today's remote sensing technicians.

IT 113 Technical Writing and Communications

Prerequisite: Engl 103. 3 credits.

This class will cover the essentials of writing clear, concise proposals, reports, technical manuals, letters, memos, bid specifications, websites and other Information Technology documents. The student will also learn how to conduct a professional presentation. (This course DOES NOT satisfy the Engl 113 requirement.)

IT 133 A+ Core 1 Hardware

3 credits.

CompTIA A+ certified professionals are proven problem solvers. They support today's core technologies and prepare students for the CompTIA A+ Core 1 national certification exam that focuses on hardware, hardware and network troubleshooting, networking, mobile devices, virtualization, and cloud computing.

IT 143 A+ Core 2 Software, Cybersecurity, & Operational Procedures

3 credits.

CompTIA A+ certified professionals are proven problem solvers. They support today's core technologies and prepare students for the CompTIA A+ Core 2 national certification exam that focuses on software, operating systems, software troubleshooting, cybersecurity, and operational procedures.

IT 153 Survey of Operating Systems

3 credits.

You will explore the differences between popular operating systems offered in today's marketplace. Operating Systems include but not limited to Windows and UNIX/Linux.

IT 203 Programming

Prerequisites: Math 154. 3 credits.

You will be exposed to the fundamental concepts of problem-solving and developing program logic using tools and techniques of programming. Topics include algorithm development, diagramming, and programming documentation, and incorporating a programming language for hands-on application of programming concepts.

IT 243 Introduction to Networking

3 credits.

This course will prepare you to pass the Network+ certification exam. Physical and logical network topologies; transmission media and network access will be examined. Hardware and software network configurations, operations and requirements will be discussed. Topics include communication codes, transmission media encoding methods, the OSI model, network standards and protocols. This course will prepare you to pass the Network + national certification exam.

IT 273 IT Project Management

Prerequisite: SCI 113 or Engl 103, Sophomore Status. 3 credits.

A study of the Systems Development Life Cycle including problem investigation, determination of systems requirements, selection of solutions, feasibility studies, cost projections and proposal writing for existing or new systems. This course will prepare you to pass the PMP national certification exam.

IT 303 Introduction to UNIX/Linux

3 credits.

An introduction to UNIX/Linux operating system with specific reference to UNIX/Linux commands, the UNIX/Linux file structure, editors, and shell programming. Includes an introduction to system administration and security. This course will prepare you to pass the Linux + national certification exam.

IT 313 UNIX Shell Programming

Prerequisite: IT 303. 3 credits.

UNIX is a versatile multi-user, multitasking operating system. UNIX has a structural software tool design philosophy that is essential for producing reliable, maintainable, and portable programs. You will cover the essential aspects of UNIX Shell programming such as the Bourne shell and shell scripts. In this class, you will learn to manage UNIX files and directories using the UNIX shell commands, work with shell variables, metacharacters and regular expressions, use shell commands to redirect input, output and error messages, and archive files in the background and write different types of shell scripts.

IT 323 Command Line Interface

Prerequisite: IT 153. 3 credits.

Command line concepts and syntax to perform directory hierarchy maintenance, I/O redirection, pipes, and device and system maintenance using variables and switches are topics of the command line interface course. The Disk Operating System (DOS) and UNIX/Linux dialects will be studied.

IT 333 Network Administration

Prerequisite: IT 243. 3 credits.

This course will acquaint you with a network environment and provide basic entry-level skills in network administration. Hands-on exercises will allow you to become familiar with popular network operating

system's management utilities including printing services, storage devices and setup of networking protocols.

IT 343 Application Software TnT

3 credits.

This course will help you to develop problem-solving tactics to help end users overcome difficulties with their application program. Training aspects and how you can take a proactive approach for training end users on application programs will be investigated. A comprehensive course in managing and maintaining computer hardware and software.

IT 353 Internet Technologies

3 credits.

This course is aimed at giving you a comprehensive overview of Internet technologies. You will learn about the history of the Internet, how to use a wide array of Internet technologies, Internet trends and current issues relating to the Internet. Students will also learn the key skills required to create attractive, well-designed, secure WEB sites that meet the goals of a business organization.

IT 363 Implementing & Admin. Web Servers

Prerequisite: IT 323. 3 credits

In this course you will learn the fundamentals of designing, installing, configuring, maintaining and upgrading your web site. Protocols presented include HTTP, HTTPS, FTP and SSH. Concepts covered include the use of indexed pages, directory hierarchy, SSL Certificates, SSI designs (ASP, CGI, JSP, PHP) and Streaming Media. Management of server logs, users and groups as they pertain to Web Servers will also be covered.

IT 373 Web Design Fundamentals

3 credits.

This course will explore aspects of the design and creation of websites including the initial planning, design, implementation, and publishing. Students will design and publish a personal web page as part of the course.

IT 383 Current Topics in Information Technology

Prerequisite: Junior Status. 3 credits.

Current Topics in Technology is designed to elevate technology courses, encouraging learners to develop a higher level of social, legal, and ethical awareness in the study of technology. Learners are guided through a wealth of topics that provide insight into the crucial role that technology plays both personally and professionally.

IT 393 Implementing & Admin. Mail Servers

Prerequisite IT 243 and IT 323. 3 credits

In this course you will learn the fundamentals of designing, installing, configuring, maintaining and upgrading your email site. Protocols that will be covered include SMTP, ESMTP, IMAP and POP3. Concepts covered include the communications dialogs between MUA, MSA, MTA, MRA and MDA, the design of the MX priority, antivirus and spam prevention techniques, email relays and mail encryption. Management of server logs, users and groups as they pertain to Email Servers will also be covered.

IT 403 Network Protocols

Prerequisite: IT 243. 3 credits.

Focuses on TCP/IP using Microsoft Windows NT and UNIX/Linux. Topics include UNIX/Linux and Microsoft TCP/IP addressing, subnet addressing, implementing IP routing, dynamic host configuration protocol, IP, IPX/SPX, ATM address resolution, Net BIOS name resolution, Windows Internet name service, host name resolution, connectivity, and troubleshooting.

IT 413 Wireless Communications

Prerequisite: IT 243. 3 credits.

This course offers an introduction of the fundamental theory of IEEE 802.11 and mobile computing technologies as they apply to WLAN administration. This course will provide an introduction and history of cellular communication systems that have changed our lives during the recent four decades and will become an essential and inseparable part of human life. The principles of wireless communication theory are covered with emphasis on the essential concept delivery to non-major learners in the easiest way. Then, it will cover how such principles are realized and how multimedia services can be delivered in practical LTE cellular systems by which learners are connected and enjoy together in their lives. This course will prepare you to pass CWNA the national certification exam.

IT 423 Network Operating Systems and Virtualization

Prerequisite: IT 333. 3 credits.

Advanced network commands and utilities will be demonstrated to you to further supplement the skills required by a network administrator. Directory structures, security, printing and network administration will be covered. Troubleshooting methods and procedures will be discussed for workstations, servers and related hardware, and printing systems. Hardware and software to aid with problem identification and resolution will be discussed and demonstrated where possible. Network optimization and disaster recovery will be covered as well as copyright issues and ethics involved with computer operations.

IT 443 Advanced UNIX/Linux

Prerequisite: IT 303. 3 credits

This course is for users interested in becoming UNIX/Linux administration. This course will identify the hardware requirements for a UNIX/Linux system, the features of job control, the guidelines for managing disk space usage, the benefits of networking, the features of Transmission Control Protocol/Internet Protocol (TCP/IP), the requirements for remote access, the features of Network Information Services (NIS) and the features of Lightweight Directory Access Protocol (LDAP).

IT 453 Network Security (SCNP Certification)

3 credits.

Provides you with the essential concepts and methods for network security. Topics covered include physical/logical security and different methods of implementation, data encryption/decryption. There will be discussions of commercial and open-source products for firewalls, proxy, cache and NAT. This course will prepare you to pass the Network Security national certification exam.

IT 473 Network Analysis

Prerequisite: IT 323 and IT 403, May be taken concurrently with IT 403. 3 credits.

Provides you with the theory and methodologies for designing and analyzing network systems. Topics that you will cover include techniques used by computer professionals to determine, document, and analyze the network requirements, assessing the hardware/software needs of an organization. Emphasis will be on problem-solving and cost-analysis in a networking environment. This course will prepare you to pass the Wireshark Certified Network Analyst national certification exam.

IT 493a Senior Project I

Prerequisites: IT 273 Senior standing. 3 credits.

The course will focus on the process of project design and culminate with an Information Technology project approved by the IT faculty. Topics include the development of a product mission statement, identification of customer and consumer needs, development of targeted specifications, the consideration of alternative designs using a decision matrix, project management techniques, legal and ethical issues. Also included are the use of probability and statistics for design, interpretation and component selection. Project schematics and parts lists will be introduced for IT 493b.

IT 493b Senior Project II

Prerequisite: IT 493a. 3 credits.

This course is a sequel to IT 493a Senior Project I. Seniors will build and test the design project in a simulated environment incorporating information technology standards and constraints. Requirements include a laboratory notebook, progress reports, a final oral presentation and written report.

Math 103 Elementary Algebra

Prerequisite: an acceptable score on the OLC math placement exam or a passing grade in Math 093. 3 credits. This course does not transfer.

This course prepares students for Intermediate Algebra. The topics covered include algebra rules, simplifying algebraic expressions and solving single variable equations, as well as problem solving involving percent, ratios, proportions, unit analysis, inequalities and geometry. Students will also learn to recognize, explain and work with basic functions (domain, range, making a table, and graphing them), graphs of linear equations and real-life linear models.

Math 123 Introduction to Statistics

Prerequisite: Math 103. 3 credits.

Topics include samples and populations, distributions, descriptive statistics, probability and statistical inference, experimental design, correlation and linear regression, and questionnaire methods. A lab portion of the course will introduce students to the use of computer-based statistical programs to solve problems in elementary statistics.

Math 134 Intermediate Algebra

Prerequisite: Math 103 with a grade of C or higher, or an acceptable score on the departmental test-out exam. 4 credits. This course does not transfer.

This course prepares students for College Algebra. It is a continuation of Math 103. Topics covered include slope and graphs of linear equations, order, linear functions, domain and range, integer and rational exponents, radical expressions, mathematical operations involving polynomials, solving polynomial equations by factoring, simplifying and solving rational expressions and equations, applying algebra to real life situations and being able to explain results.

Math 154 College Algebra

Prerequisite: Math 134 with a grade of C or better, or an acceptable score on the departmental test-out exam. 4 credits.

This course is a continuation of Math 134. It prepares students for upper-level analytical courses and fields of study. Topics include operations on radical expressions, use of the distance, midpoint, and quadratic formulas, graphical analysis and algebraic solutions of more advanced functions and relations, transformations of and operations on functions including exponential and logarithmic functions, inverse functions, domain and range of functions, systems of equations & real-life applications of the above topics.

Math 163 Trigonometry

Prerequisite: Math 154 with a grade of C or better, or an acceptable score on the departmental test-out. 3 credits.

This course prepares students for upper-level analytical courses and fields of study. Topics include angular and linear velocity, arc length of a circle and sector area, understanding and ability to convert between degree (DMS and decimal form) and radian measure, use of trigonometric functions to solve problems involving triangles, the unit circle, graphs, inverse functions, and real-life applications of these skills; proofs of trigonometric identities, the use of identities to help solve trigonometric equations, domain and intervals, navigation, Law of Sines, Law of Cosines, and vector operations and graphs.

Math 194 Calculus I

Prerequisite: Math 163 with a grade of C or better, or an acceptable score on the departmental test-out. May be taken concurrently with Math 163 with permission. 4 credits.

This course prepares students for upper-level math and science courses. Topics covered include evaluating limits; determining the continuity of early transcendental, algebraic, trigonometric, logarithmic and exponential functions; using the differentiation rules to find, use and explain the derivatives of functions; determining and explaining the meaning of the slope and the equation of a tangent line for a point on the graph of a function or relation; using implicit differentiation; using first and second derivatives, function extrema, limit evaluations, and continuity tests to sketch and analyze graphs of functions; using related rates to solve real-world problems in many fields of study; solving variable optimization problems; evaluating definite and indefinite integrals using basic integration techniques.

Math 214 Calculus II

Prerequisites: Math 194 completed with a grade of "C" or better, or an acceptable score on the calculus qualifying examination. 4 credits.

Continuation of Math 194 for transcendental functions, integration techniques, infinite series and sequences, indeterminate forms, improper integrals, parametric equations, and polar coordinates.

Math 224 Calculus III

Prerequisite: Math 214, with a grade of "C" or better. 4 credits.

A continuation of Math 214. The study includes polar coordinates, parametric equations, vector-valued functions, functions of multiple variables, multiple integrals and line and surface integrals. Topics also covered are level curves, gradients, cylindrical and spherical coordinates.

Math 234 Mathematics for Elementary Teachers I

Prerequisites: Math 103 with a grade of "C" or Better. 4 credits.

This course utilizes an inquiry-based approach to gaining understanding of mathematical concepts at concrete, representational and abstract levels. Topics include problem solving, sets, algebraic thinking, the study of numeration systems, fundamental operations of arithmetic (properties and algorithms), the extended number system and proportional reasoning. The processes of problem solving (representation, reasoning, making connections, and communication of ideas) are emphasized throughout the course.

Direct connections are made between course content and the State Standards for Mathematics.

Math 244 Mathematics for Elementary Teachers II

Prerequisite: Math 103 completed with a grade of "C" or better. 4 credits.

This course utilizes an inquiry-based approach to gain understanding of mathematical concepts at concrete, representational and abstract levels. Topics include data and chance, geometric shapes, geometry as measurement and transformational geometry. Problem-solving, representation, reasoning, making connections, and communication of ideas are emphasized throughout the course. Direct connections are made between course content and the State Standards for Mathematics.

Math 263 Discrete Structures

Prerequisite: Math 154 completed with a grade of "C" or better. 3 credits.

This course covers fundamental topics in data structures and discrete mathematics. The topics are presented in an integrated manner that provides the discrete math foundations for data structures and computing applications of discrete mathematics concepts. Topics covered include stacks, queues, linked lists, trees, algorithms for searching and sorting, finite state automata, and concepts of computability and decidability. Topics from discrete math include sets and various types of relations (functions, graphs, trees, lattices), recursion and inductive proofs, Boolean logic, relational algebra, predicate calculus, series and limits, and asymptotic behavior of searching and sorting algorithms. Programming exercises are assigned throughout the course.

Math 324 Geometry for Educators

Prerequisite: Math 163 completed with a grade of "C" or better. 4 credits.

A formal approach to Euclidean Geometry involving points, lines, planes, basic constructions, polygons, circles and three-dimensional figures. Logic, reasoning, direct and indirect proofs in two-column and paragraph form will be integrated where appropriate. A methodology component is included.

Math 343 Matrix Theory and Linear Algebra

Prerequisite: Math 214 with a grade of "C" or better. 3 credits.

This course covers matrix algebra, systems of linear equations, determinants, vector algebra and geometry in Euclidean 3-space, eigenvalues, eigenvectors, vector spaces, subspaces, bases and dimension, linear transformations, representation by matrices, nullity, rank, and isomorphism.

Math 353 Applied Probability and Statistics

Prerequisites: Math 123 with a grade of "C" or better. 3 credits.

Applications in basic probability theory, discrete and continuous distributions, sampling distributions and the central limit theorem. General principles for statistical inference and applications of random sampling to hypothesis testing, confidence limits, correlation, and regression, visualizing and presenting data using the open-source R statistical programming language.

Math 483 Multivariate Statistics (replaces Advanced Statistics)

Prerequisite: Math 123 with a grade of "C" or better. 3 credits.

This computer-assisted course explores the theory and application of multivariate statistical techniques including but not limited to discriminate analysis, principal components analysis, cluster analysis, and multivariate analysis of variance. It is helpful but not required to be engaged in research that has yielded data requiring statistical analysis.

Math 290/490 Special Topics in Math

1-3 credits.

A study in selected topics in mathematics. Topics may change each semester and may be repeated for credit. When taken at the 200 level, it is expected that the student will do sophomore level work. A 400 level implies a senior level course with extensive work expected.

MIS 113 Applied Information Processing

3 credits.

An applied course designed to meet the needs of today's college students across the disciplines. Topics include but are not limited to: computer-based training techniques and on-line testing, E-mails and attachments, on-line conferences, delimited web-based research techniques, software applications, e-slides and web page presentation/publishing tools, and report writing documentation.

MIS 413 Systems Analysis and Design

Prerequisite: IT 273. 3 credits

This course will provide the students with acceptable approaches to system analysis, design and implementation. Students will begin with systems analysis, determining system requirements, evaluating systems and designing and implementing a system.

NaRs 113 Watershed Principles

3 credits.

This course covers watershed processes, characteristics and measurements, land use practices for proper watershed management, and analysis techniques. Hydroponic cycle and components, ownership and value of water, organizations of water managers, water quality and quantity concepts relating to range, forests,

agriculture, mining and other land uses, data sources and analysis for decision making, conservation methods, careers.

NaRs 323 Natural Resource Measurements

Prerequisites: Math 123. 3 credits.

Basic vocabulary, concepts, tools, procedures and report forms for measuring natural resources. Emphasis is on concepts of sampling, degree of accuracy and on interpretation of data collected.

NSci 253 Hydrology

Prerequisites: MIS 113, Math 134. 3 credits.

This course introduces the hydrologic cycle and focuses on precipitation and surface flow. The following topics will be covered, and quantitative techniques applied to: precipitation, including causes, duration and measurement; infiltration and soil-water processes; evapotranspiration; surface runoff; and flow systems, including rivers, channels and impoundments. Basic concepts in fluid mechanics such as pressure, friction and pressure head will also be addressed.

NSci 303 Integrated Environmental Science

Prerequisites: Bio 153. 3 credits.

This course will cover an interdisciplinary approach to the study of environmental sciences. The Western science of ecology and earth sciences, traditional Lakota and other indigenous knowledge and perspectives are examined. These topics are presented with consideration of the social, economic and political aspects of environmental issues.

NSci 323 Principles of Environmental Science

Prerequisites: Chem 243. 3 credits.

Introduction to the basic principles of environmental management, environmental science and engineering. The course will teach the fundamental physical, biological, and chemical principles of environmental processes. The course will also explore the impact of humans and human activity on ecosystems in the environment. This course is co-listed with Engr 223.

NSci 363 Fluvial Morphology

Prerequisites: NSci 253. 3 credits.

Fluvial processes incorporate information about river mechanics, geomorphology, hydraulics, and sedimentation into a classification system that is based on the morphological characteristics of rivers. Classification of river systems gives insights into sustainable watershed use and channel stability. The Rosgen Stream Classification System is a widely used method to evaluate stream potential, and to identify departures from stream potential. Through monitoring the potential of a stream, environmental scientists can sustainably manage watersheds, evaluate the effectiveness of river improvement projects, and assess changes in river conditions.

NSci 373 Watershed Assessment Techniques

Prerequisites: NSci 253, Chem 233, Bio 223 or permission of instructor. 3 credits.

Running water habitats are rich and complex environments for biological study. Understanding how these lotic ecosystems function requires an interdisciplinary approach, incorporating hydrology, water chemistry, environmental engineering, and biology. This course will discuss habitat, life in running waters, energy and nutrients, community patterns, and biodiversity. The focus of the class will be on fieldwork to apply these concepts through recording and analyzing field data from reservation streams.

NSci 393 Research Methods

Prerequisites: Sci 273 or with permission of instructor. 3 credits.

This course introduces students to the fundamental practices of research, including the scientific method, research design, sampling, data analysis and interpretation, manuscript preparation, and professional presentation. Participation in a closely mentored research project is preferred: may be taken concurrently with NSci 493.

NSci 413 Air Pollution

Prerequisite: Chem 233. 3 credits.

This course explores the causes of natural and anthropogenic causes of air pollution. Topics covered will include the chemistry of air pollution, the dispersion of pollutants in the atmosphere, and the effects of air pollution on biota and the environment. An overview of laws and the regulations used to regulate emissions from stationary as well as mobile sources will be presented. Indoor air pollution and noise pollution will be discussed. Finally, the course will address the effects of pollution on the atmosphere itself.

NSci 433 Waste Management

Prerequisites: Chem 233. 3 credits.

Waste management discusses the proper treatment and/or storage of solid waste, industrial and municipal wastewater, and water quality issues in rivers and lakes. Students will use mass balance approaches and other analytical techniques to find steady-state solutions to contamination, solid waste, and wastewater problems.

NSci 443 Paleontology

3 credits.

In this course students will study the history and evolution of life on Earth as preserved in the fossil records of invertebrates, vertebrates, and plants. Students will also be introduced to aspects of systematic anatomical description, paleoecology, paleoclimatology, and taphonomy. Special emphasis will be placed on Cenozoic fossil floras and faunas of western South Dakota and the Pine Ridge Reservation.

NSci 463 Groundwater

Prerequisites: NSci 253 and Chem 233 or permission of instructor. 3 credits.

This course involves a study of subsurface water quality and water flow. Topics will include migration of water through the vadose zone, soil moisture, groundwater recharge, flow through aquifers, methods of measuring flow direction and velocity. Chemical interaction between the groundwater aquifer and groundwater will be discussed, along with the factors affecting the rate of contaminant migration in groundwater and soils. A laboratory portion of the class may include the use of the Geoprobe® to drill and complete monitoring wells.

NSci 473 Wetlands

Prerequisites: Bio 223 and Chem 233, or permission of the instructor. Maybe taken concurrently with Bio 223 or Chem 233. 3 credits.

This course covers the fundamental processes contributing to the unique nature of wetland ecosystems; as well as the various functions and values associated with wetlands. This class focuses on the hydrologic, geochemical, microbial processes, and the delineation of wetlands.

NSci 483 Renewable Energy Technologies

Pre-requisites: Completion of Math 134 and Phys 113, or permission of the instructor. 3 credits.

This course will provide an introduction to renewable energy technologies, primarily solar photovoltaic, wind power generation, efficient building design and materials, and passive solar heating. Renewable energy system design and installation will be covered, including load analysis, system sizing and location, and installation and monitoring. Stand-alone and grid- systems will be covered.

NSci 493 Research

Pre-requisites: NSci 393, or permission of the instructor. 3 credits. This course consists of supervised research with a faculty mentor. Course requirements will vary depending on the nature and stage of completion of the research. Research may consist of part of the faculty mentor's research, or an independent project. This course requires students to be internally motivated to succeed.

Phys 113 Survey of Physics

Pre-requisites: Math 134. 3 credits.

This course is designed to cover broad topics such as mechanics, state of matter, wave motion, electricity, and magnetism. Focus will be given to the development of students' critical thinking skills. Students will be challenged to apply these skills to conceptual-type situations as well as problems that require a fundamental knowledge of college-level algebra.

Phys 214 Physics I

Pre-requisites: Phys 113 or an acceptable score on a Physics I qualifying examination and prior/concurrent registration in Math 194. 4 credits.

The basic physics principles of Newton's laws of motion and the conservation laws concerning momentum, energy, and angular momentum are applied to the linear and curvilinear motion of particles, simple harmonic motion, and the rotation of rigid bodies. An introduction to relativity and quantum concepts will also be included. (3hrs lecture, 2hrs lab)

Phys 223 Physics II

Prerequisite: Phys 214. 3 credits.

This is a continuation of the basic physical principles covered in Physics I, which extends to magnetic fields, and electric fields. Charged particles and electrical current are covered as well as basic DC and AC circuits. Gaussian surfaces, resistance, capacitance, and magnetic induction are studied. Extensive calculus is used.

Phys 221 Physics II Laboratory

Pre-requisites: Phys 223 is to be taken concurrently. 1 credit.

A hands-on introduction to physical phenomena. Experiments will be performed in kinematics, force, freefall, projectile motion, friction, rotational motion, electrostatics and magnetic fields, simple AC/DC circuits, and optics. The experiments supplement the work in Phys 214, and Phys 223.

Phys 253 Astronomy

Prerequisite: Phys 113. 3 credits.

Covers topics in contemporary astronomy that explores the nature, methods, and limitations of scientific inquiry to understand the structure and evolution of the Universe. This includes the history of astronomy, motions of the night sky, the solar system, stellar evolution, galaxies, and cosmology.

Physics 434 Modern Physics

Prerequisite: Phys 224. 4 credits.

Covers topics in thermodynamics (such as temperature, heat, laws of thermodynamics, and the kinetic theory of gases) and modern physics (such as relativity; models of the atom; quantum mechanics; and atomic, molecular, solid state, nuclear, and particle physics).

Phys 324 Physics II for Educators

Prerequisite: Phys 214, and at least concurrent registration in Math 224, or permission of instructor. 4 credits.

This is a continuation of the basic physical principles covered in Physics I, which extends to magnetic fields, electric fields, light and optics. A methodology component is included. Extensive calculus is used.

Phys 321 Physics II for Educators Lab

Pre-requisites: Physics 324 is to be taken concurrently. 1 credit.

A hands-on introduction to physical phenomena. Experiments will be performed in kinematics, force, freefall, projectile motion, friction, rotational motion, electrostatics and magnetic fields, simple ac/dc circuits, and optics. The experiments supplement the work in Phys 214 and Phys 323.

Rang 103 Botany of the Northern Plains

3 credits.

Systematic study of plants, including their anatomy, classification, and nomenclature, with special emphasis on species native to the northern Great Plains and the Pine Ridge Reservation.

Range 113 Range Principles

Prerequisite: Range 103. 3 credits

Application of range science principles to management of rangelands. Emphasizes range history, ecology and physiology of range productivity and utilization; range inventory and analysis; systems of grazing management and range improvement.

Rang 443 Range Ecology (co-listed as Bio 443)

3 credits.

Description of the range ecosystems of the U.S. with a discussion of the major uses of each, with a focus on the Pine Ridge reservation. Discussion of management problems on private ranches and public lands. The major range plants and animals of each region will be studied along with the ecology, forage value and grazing responses of important range plant species.

Sci 204 Integrated Science for the Elementary Teacher I

Prerequisite: Math 103 and a core science class. 4 credits.

A course designed to acquaint the pre-service elementary teacher with the scientific method and basic processes and concepts of the physical sciences using published articles in addition to the text. The latest scientific discoveries and current thinking in science education will be discussed. A writing component will consist of reacting to the assigned articles. A complete science fair project and lesson plan is required.

Sci 214 Integrated Science for the Elementary Teacher II

Prerequisite: Math 103 completed with a grade of "C" or better. 4 credits.

This course is a continuation of Sci 204 and will further stress the scientific method and basic processes of science through the study of specific concepts of physical and biological sciences. A writing component will consist of reacting to recent scientific and science education articles followed by class discussion. A complete science fair project and lesson plan is required.

Sci 273 Scientific Literature and Writing

Prerequisite: Engl 113 and MIS 113. 3 credits.

This course will have two topics: 1) reading and interpreting current scientific literature selected from a cross-section of mainstream journals, and (2) presentation, written and orally, of research results in accepted scientific style. Research data will be either original student work or supplied by the instructor. Students will write one technical manuscript suitable for submission to a refereed journal.

Sci 393 Special Topics in Science

Pre-requisites: Permission of instructor. 3 credits.

This course consists of a seminar on selected topics in science. Topics vary from semester to semester to take advantage of the special expertise of a visiting scientist, or as an opportunity to train students to meet special or pressing needs of the reservation community. This course may be taken twice as Sci 393 and Sci 493. The 300-level prefix indicates junior-level work is expected.

Sci 493 Special Topics in Science

Pre-requisites: Permission of instructor. 3 credits.

This course consists of a seminar on selected topics in science. Topics vary from semester to semester to take advantage of the special expertise of a visiting scientist, or as an opportunity to train students to meet special or pressing needs of the reservation community. This course may be taken twice as Sci 393 and Sci 493. The 400-level prefix indicates senior-level work is expected.

NURSING DEPARTMENT

Robin White, MSN, RN, Chairperson
Amy Hindman, ND, RN Faculty
Tonya Moschell, MSN, RN Faculty
Andrea Jimmerson, MSN, RN Faculty
Nicole Herman, Administrative Assistant

Since 1986, the Department of Nursing, Oglala Lakota College, has served residents of the Pine Ridge and Rosebud Reservations and rural border communities in South Dakota and Nebraska. The program's curriculum is congruent with traditional Lakota values which focus on the individual and families in promoting, maintaining and restoring balance and well-being, and is accomplished within the Lakota cultural framework of *Woksape*-wisdom, *Woohitika*-courage, *Wowahola*-respect and *Wacatognaka*-generosity.

Graduates of the Nursing program receive an Associate of Arts (AA) degree in Nursing and are eligible to take the National Council of Licensing Examination (NCLEX). Passing the exam will result in licensure as a registered nurse (RN).

Nursing courses are currently offered in Pine Ridge, where the department has a state-of-the-art facility with classrooms, offices, library, computer lab and a nursing skills laboratory. The program also has a dormitory building with accommodation for 12 students. Many of the pre-nursing courses required for entry into the program can be taken at the student's district college center. Basic skills courses are offered which enable students to improve reading, math, English and science skills before applying to the Nursing Program. Clinical practice sites may include Pine Ridge I.H.S. Hospital units and outlying clinics, Fall River Hospital, Hot Springs, South Dakota, Bennett County Hospital and Nursing Home in Martin, South Dakota, Oglala Sioux Lakota Nursing Home, Whiteclay, Nebraska, Chadron Community Hospital, Chadron, NE, and Oyate Health Center, both in Rapid City, South Dakota, and Monument Health Hospitals within the area.

Students who declare nursing as their major must submit an application and be accepted as a pre-nursing candidate by March 1st, to begin their prerequisite courses in the Nursing track. Students cannot enroll in nursing core courses until they have been declared a Nursing Candidate. Nursing faculty will closely advise Nursing majors to ensure proper admission and courses are taken. Admissions and acceptance into the nursing program is competitive. Students are admitted once a year, and begin the nursing core courses each Fall semester, once prerequisite and program requirements have been met.

Requirements for graduation with an Associate of Arts Degree in Nursing must be completed within four years of being accepted into the Nursing Program. A cumulative grade point average (GPA) of 2.0 is required for *successful completion* of the nursing program.

General Application Information

Interested students, including incoming freshmen, OLC students who wish to declare Nursing as their major, and/or transfer students may apply to the Nursing program.

- All students must complete the general OLC admissions process
 - Incoming Freshman students will take the Accuplacer (must test into the 100 level Math and English or higher, OLC policy 70-300)
 - Students who have taken classes at OLC previously, but have stopped out for more than two semesters and have not taken Engl 103 or Math103, must complete the college readiness assessment, and must test into the 100 level Math and English or higher (OLC policy 70-300)
 - Transfer students must provide official transcripts to the Registrar's office from all other institutions (Anatomy and Physiology transfer courses must have been taken within four years; transfer courses are assessed and approved by Registrar office)
- **Apply to the Nursing Program by March 1st (deadline)** *located on the OLC website>Current Students>Areas of Study>Nursing*

Admission: Prerequisite Courses

Nursing Candidates must have completed the following courses, (or their equivalent) with a C or better and have an overall GPA of 3.0 or higher:

Engl 103	Composition I
Psy 103	General Psychology
Math 134	Intermediate Algebra
Chem 231	Experimental General Chemistry Lab I
Chem 233	General Chemistry
NURS 224	Anatomy and Physiology for Nursing (must be completed within four years of starting the nursing program)
NURS 102	Medical Terminology for Nursing

The required science courses (Chem 231/233, Bio 204) will utilize the nursing department's grading system (passing=80% or C)

The following Lakota courses must be completed before graduation:

Lak 103	Lakota Language I - OR LSoc 103	Lakota Culture
---------	---------------------------------	----------------

PRIOR TO starting the Nursing Core Courses students must complete:

1. Comprehensive background clearance and drug testing
2. Completed physical and eye exam
3. Current immunizations and PPD results
4. Current copy of Healthcare Provider CPR (BLS) course completion

Qualification Criteria

Students who have completed all prerequisites will be selected according to the following criteria as seats allow:

1. *G. P. A. of 3.0 or better
2. Tribal Enrollment priority as follows:
 - Enrolled members of the Oglala Sioux Tribe who are veterans
 - Enrolled members of the Oglala Sioux Tribe
 - Enrolled members of other Lakota Tribes who are veterans
 - Enrolled members of other Lakota Tribes (Rosebud and Cheyenne River priority)
 - Other enrolled tribal members
3. **Entrance Exam:** Students must take and pass the Kaplan Entrance exam (\$100 fee) meeting the required benchmark score of 55
4. **Available resources:** The number of students selected for the fall semester will not exceed available faculty, classroom space, and/or clinical resources.
5. **Selection and notification:** Selection and notification of students for the fall semester will be made by June 1st. All returning students and students with provisional acceptance are required to attend the mandatory orientation prior to the start of classes.
6. **Drug screening:** Drug screens are administered at the Nursing building prior to the start of classes. *Failure to undergo a drug screen, a positive drug screen, or a sample that has evidence of tampering will result in barred admission.* If the drug screen is positive and a medical prescription exists (the student is under current treatment of a licensed medical professional who verifies this prescription will not interfere with clinical judgment), the test will be deemed negative.
7. **Comprehensive background clearance:** If issues of concern appear on the completed background check, the concerns may be reviewed by nursing department personnel, the SD Board of Nursing and clinical sites. This review may result in barred admission and/or dismissal from the program. (See OLC policy: **Comprehensive Background Clearance and Drug Testing Policy**)
Purpose:
The Comprehensive Background Clearance and Drug Policy are implemented to:
 - Protect public/client safety
 - Meet the requirements of contracted clinical agencies
 - Comply with eligibility for licensure

All nursing students submit to a drug test prior to beginning classes in the fall semester. Random drug testing may be conducted throughout the school year. Student(s) may be required to submit to a urine drug screen if there is a reasonable suspicion of intoxication with substances or possession of substances or related paraphernalia: Refer to Policy 62-120 Substance Abuse Drug Free Work Environment Policy. Any student testing positive will be referred to the OLC SAP (Student Assistance Program). The student will be denied clinical rotation until evaluated and cleared by subsequent drug testing within two weeks and also subjected to unscheduled drug screening. Students who test positive with subsequent testing will be dismissed from the program that current semester.

Students are responsible for the cost of Comprehensive Background Clearance and the drug screen.

Vision Statement:

The Nursing Department will empower students to become engaged leaders within their communities to promote *Wolakolkiciyapi*. To equip entry level nurses to provide holistic care to individuals and families in diverse cultural settings.

Mission Statement:

To provide academic excellence that will prepare an associate degree (AD) nurse to respond with relevant knowledge and skills to meet health care needs of individuals and families as an entry level registered nurse.

Philosophy:

Nursing, as a caring profession, has the primary responsibility to address holistic health care, and health promotion/disease prevention needs of individuals and families in the community. The nurse is a responsible and accountable member of society who is committed to lifelong service, learning and education to respond to the needs of society.

Nursing Department Terminal Program Outcomes:

Upon graduation the student will be able to:

1. Apply knowledge of the nursing process and critical thinking as a framework for clinical decision making.
2. Demonstrate cultural competency and caring behaviors for the purpose of providing culturally appropriate nursing care to diverse populations.
3. Incorporate professional/legal/ethical accountability into practice, embracing the values of the profession and assuming the various nursing roles of life-long learner, teacher, client advocate, leader/manager, and care provider.
4. Utilize evidence-based practice and technology to provide safe competent, holistic nursing care to clients across the lifespan.
5. Communicate and collaborate with clients, family, healthcare and interdisciplinary teams to provide holistic health care and promote disease prevention.

Grading ScaleAll Nursing and required Science Courses:

A= 94-100 = 4 grade points
B= 87-93 = 3 grade points
C= 80-86 = 2 grade points
D= 73-79 = 1 grade points

Other OLC Courses:

A= 90-100 = 4 grade points
B= 80-89 = 3 grade points
C= 70-79 = 2 grade points
D= 60-69 = 1 grade points

Graduation Requirements

A grade point average of 2.0 is required for graduation from the nursing program. *Requirements for graduation with an Associate of Arts Degree in the nursing curriculum must be completed within four years after initial acceptance into the nursing program.* All students must complete program requirements as lined out in the Nursing Student Handbook prior to graduation.

NCLEX-RN

To practice as an RN, the graduating student must pass the National Council of Licensing Exam (NCLEX-RN), a national examination for nurses completing an RN program.

NURSING DEPARTMENT

Associate of Arts in Nursing

All courses must be passed with a C or better

(Note that Science and Nursing Courses follow a higher Grading Scale)

NURSING COURSE DESCRIPTIONS

Nursing 102 Medical Terminology for Nursing

Prerequisites: none

Course Description (Waunspe Oyakapi): Students will achieve learning primarily by applying the principles of medical word building, content reinforcement, and achievement of basic competencies. Online learning tools enable students to evaluate their understanding of medical terminology, based on the requirements of this course. The course materials and content emphasize the meaning of basic medical terms and demonstrate how these terms are used in the healthcare environment.

Spring Semester placement, 2 credits

Nursing 224 Anatomy and Physiology for Nursing

Prerequisites: Engl 113. Chem 231 / Chem 233 at least concurrently

Course Description (Waunspe Oyakapi): The N224 Anatomy and Physiology for Nursing course will systematically study gross anatomy, homeostasis, and physiological functions within the human body. Systems explored include cellular, respiratory, cardiovascular, neuromuscular, digestive, urinary, reproductive, and endocrine/metabolic structures and functions. The laboratory is sometimes used to demonstrate these concepts through dissection and physiological experiments and demonstrations.

Spring Semester placement, 4 credits

Nursing 216 Foundations of Holistic Nursing

Prerequisites: Requires formal admission to the nursing program

Co-requisites: NURS 212

This course will introduce the student to concepts basic to the nursing profession and to the roles of the associate degree nurse. Sub-concepts of critical thought, therapeutic communication, pharmacology, medication administration and nutrition will be introduced. Lakota values of knowledge, respect, generosity, and courage will be integrated into the course. Progression within the nursing program also contingent on successful completion of NURS 212.

Fall Semester Placement, 6 credits

Nursing 212 Foundations of Holistic Nursing Clinical

Prerequisites: Requires formal admission to the nursing program

Co-requisites: NURS 216

The student will begin to utilize the nursing process as the means of providing basic nursing care to meet the bio-psycho-cultural needs of the individual with emphasis on the healthy elderly. Health promotion techniques as well as basic skills of health assessment and nursing care will be emphasized. Sub-concepts of therapeutic communication, pharmacology, and medication administration will be introduced. Lakota values of knowledge, respect, generosity, and courage will be integrated into clinical expectations. Clinical experiences may be provided through the I.H.S. outpatient clinic and Acute Care Unit, Gordon Memorial Hospital in Gordon, Nebraska, Bennett County Hospital and Nursing Home in Martin, South Dakota and the Oglala Sioux Lakota Nursing Home in Whiteclay, Nebraska. Progression within the nursing program also contingent on successful completion on NURS 216.

Fall Semester Placement, 2 clinical credits (3:1 ratio for 90 total clinical hours)

Nursing 222 Pharmacology for Nursing I

Prerequisites: nursing program admissions

This course will be an introduction to drug therapy with the study of specific drug classifications using the nursing process, with a focus on the general principles of pharmacology, therapeutic uses, toxicity, and mechanisms of action for each class of drugs. Fall Semester placement, 2 theory credit hours

Nursing 202 Pharmacology for Nursing I Lab

Co-requisite: NURS 222

Course Description (Waunspe Oyakapi): This first semester lab course will be an introduction to drug therapy focusing on applying skills of medication administration in a lab setting. Concepts of therapeutic uses, appropriate and safe administration, and side and adverse effects will be emphasized. The course is designed to correlate with the NURS 222 Pharmacology for Nursing I theory course, taken concurrently. Fall Semester placement, 2 theory credit hours.

Nursing 232 Pharmacology for Nursing II

Prerequisites: NURS 216, NURS 212, NURS 222, NURS 202

This course is a continuation of NURS 222 and continues to present knowledge of specific drug classifications using the nursing process, with a focus on general principles of pharmacology, therapeutic uses, and mechanisms of action for each class of drugs. This course is designed to closely follow the body systems and corresponding health disorders covered in the NURS 246 theory course offered in the spring semester. Spring Semester placement, 2 theory credit hours

Nursing 246 Holistic Adult Health Nursing I

Prerequisites: NURS 216, NURS 212, NURS 222, NURS 202

Co-requisites: NURS 241

This course will focus on nursing care and the application of the nursing process in the care of adults experiencing selected pathophysiological processes affecting body regulatory mechanisms. This course builds upon basic nursing knowledge and skills established during the first year of the program. Opportunities to apply theoretical concepts specific to adult clients are provided.

Progression within the nursing program is contingent on successful completion of NURS 241.

Spring Semester Placement, 6 credits

Nursing 241 Holistic Adult Health Nursing I Clinical

Prerequisites: NURS 216, NURS 212, NURS 222, NURS 202

Co-requisites: NURS 246

This course will focus on providing nursing care of adults experiencing pathophysiological processes affecting body regulatory mechanisms. Opportunities to apply theoretical concepts from NURS 246 and perform nursing skills specific to adult clients will be provided through faculty guided learning experiences in acute health care settings. Clinical experiences may include Chadron Community Hospital in Chadron, Nebraska, Monument Health in Rapid City, South Dakota, Bennett County Hospital, in Martin, South Dakota, Fall River Health Services, Hot Springs, South Dakota, I.H.S. Hospital, Pine Ridge, South Dakota, and Black Hills Dialysis in Pine Ridge, South Dakota

Progression within the nursing program is contingent on successful completion of NURS 246.

Spring Semester Placement, 1 clinical credit

Nursing 313 Professional and Transcultural Nursing with Lakota Emphasis

Prerequisites: NURS 232, NURS 246, NURS 241, Bio 204

This course will introduce the student to expanded transcultural nursing concepts, assessments, and the role of culture in understanding and caring for clients of diverse backgrounds in health care settings. Various cultures will be examined for their concepts of health and illness. Students will gain further self-awareness of their racial, ethnic, and cultural backgrounds as a prerequisite for eliciting and responding to client needs. Cross-cultural communication will be addressed to provide the student with skills to negotiate differences between clients and providers concerning health and illness issues.

This course will also address acclimation to the role of professional nurse, to include the concepts of leadership, delegation, and collaboration; there will be special emphasis on the culture of professional nursing, institutional norms, behaviors, and communication patterns that are critical to the student's successful transition into the healthcare workplace. Fall Semester Placement, 3 theory credit hours.

Nursing 332 Pharmacology for Nursing III

Prerequisites: NURS 232, NURS 246, NURS 241, Bio 204

This course is a continuation of NURS 232 Pharmacology for Nursing II and presents knowledge of specific drug classifications using the nursing process, with a focus on principles of pharmacology, therapeutic uses, and mechanisms of action for each class of drugs used in treating complex, acutely ill and critically ill individuals. This course is designed to closely follow the body systems and corresponding health disorders covered in the NURS 336 Holistic Adult Health Nursing II theory course offered concurrently. Fall Semester placement, 2 theory credit hours.

Nursing 336 Holistic Adult Health Nursing II

Prerequisites: NURS 232, NURS 246, NURS 241, Bio 204

Co-requisites: NURS 331

This course is a continuation of NURS 246 and will continue to emphasize nurse care and application of the nurse process in the care of the adult experiencing selected pathophysiological processes affecting body regulatory systems. Students will expand their use of critical thinking and the nursing process. The student may be expected to explore current literature and research utilized for health promotion and protection, health restoration, maintenance and support.

Progression of the nursing program is contingent on successful completion of NURS 331.

Fall Semester Placement, 6 credits

Nursing 331 Holistic Adult Health Nursing II Clinical

Prerequisites: NURS 232, NURS 246, NURS 241, Bio 204

Co-requisites: NURS 336

This clinical course will focus on providing nursing care of adults experiencing pathophysiological processes affecting body regulatory mechanisms. Opportunities to apply theoretical concepts from NURS 336 and perform nursing skills specific to adult clients will be provided through faculty guided learning experiences in acute health care settings. Clinical experiences may include Chadron Community Hospital in Chadron, Nebraska, Monument Health in Rapid City, South Dakota, Bennett County Hospital, in Martin, South Dakota, Fall River Health Services, Hot Springs, South Dakota, I.H.S. Hospital, Pine Ridge, South Dakota, and Black Hills Dialysis in Pine Ridge, South Dakota

Progression within the nursing program is contingent on successful completion of NURS 336.

Spring Semester Placement, 1 clinical credit

Nursing 354 Transition into Practice

Prerequisites: NURS 332, NURS 313, NURS 336, NURS 331

This course focuses on effective utilization of clinical reasoning and critical thinking necessary for professional nursing practice. The student is expected to participate in discussions and strategies for NCLEX-RN testing success as well as NCLEX preparation. Through diagnostic and frequent testing, students will assess their individual strengths and weaknesses in nursing knowledge and remediate identified areas of improvement. Students will be guided on NCLEX preparation as well as applying for national examination through the state board of nursing. Spring Semester Placement, 4 credits

Nursing 363 Holistic Mental Health Nursing

Prerequisites: NURS 332, NURS 313, NURS 336, NURS 331

This course focuses on the health restorative aspects of common mental health problems. The student will continue to expand this knowledge as it is integrated into pediatric and maternal-child clinical experiences and use the nursing process for individuals experiencing difficulty with behaviors and/or relationships. The student will further develop therapeutic communication techniques and develop psychosocial assessment techniques through classroom case studies, and in previously mentioned clinical settings.

Spring Semester Placement, 3 credits (3 theory credit hours)

Nursing 364 Holistic Maternal-Child Nursing

Prerequisites: NURS 332, NURS 313, NURS 336, NURS 331

Co-requisites: NURS 362

This course will introduce the student to the psycho-social-cultural health of the individual from conception through adolescence. Included are concepts of pregnancy, labor and delivery, post-partum, newborn, child growth and development, health maintenance, and prevention from infancy through last adolescence within the context of the family as a whole. Common childhood illnesses and health imbalances will be introduced. Sub-concepts include nutrition, communication, and pharmacology in these populations. The maternal/child unit is viewed as a member of the tiwahe/tiospaye (family) as well as member of the tribe/community. Lakota values of respect, courage, wisdom and generosity are integrated into this course. Progression within the nursing program is contingent on successful completion of NURS 362.

Spring Semester Placement, 4 credits

Nursing 362 Holistic Maternal-Child Nursing Clinical

Prerequisites: NURS 332, NURS 313, NURS 336, NURS 331

Co-requisites: NURS 364

The student will develop health assessment and nurse care skills for the female/maternity/fetal/newborn and pediatric client. Common childhood illnesses and health imbalances will be the focus of the clinic rotations. The student will expand skills in the use of the nursing process and critical thinking in meeting maternal/child health care needs within the family system, well child and acute care settings. The maternal/child unit is viewed as a member of the tiwahe/tiospaye (family) as well as member of the tribe/community. Lakota values of respect, courage, wisdom and generosity are integrated into this course. Clinical facilities may include I.H.S. Hospital Women's Clinic, Maternity Unit, Well Child Clinic, Monument Health Hospital Units, Rapid City, South Dakota, and Head Start facilities on the Pine Ridge Reservation.

Progression within the nursing program is also contingent on successful completion of NURS 364

Spring Semester Placement, 2 clinical credits (3:1 ratio for 90 total clinical hours)

DEPARTMENT OF SOCIAL WORK

Jeremy Vu, DSW, MSW, Chair/Program Director/Field Coordinator

Braylan Benoist, MSW Faculty

Devona Lone Wolf, MA, Faculty

Vacant, Faculty

VISION STATEMENT

In line with the OLC vision, the Department of Social Work seeks to educate students to be part of social change processes that more equitably distribute scarce economic and social resources as part of making life better for the Lakota People, and any other marginalized or oppressed groups.

MISSION STATEMENT

The Oglala Lakota College Department of Social Work's mission is to empower students in the development of both social work and Lakota ethics, skills, and knowledge to be prepared for leadership roles within tribal, state, federal, and global communities. Using the strengths-based perspective, students will be educated in both social work and Lakota research, theory, values, policy, and practices to address social, economic, and environmental justice.

BSW Program Competencies

Graduates of the BSW program are expected to learn and demonstrate the following Council on Social Work Education (CSWE) 2022 competencies:

Competency 1: Demonstrate Ethical and Professional Behavior

Competency 2: Advance Human Rights and Social, Racial, Economic, and Environmental Justice

Competency 3: Engage Anti-Racism, Diversity, Equity, and Inclusion (ADEI) in Practice

Competency 4: Engage in Practice-Informed Research and Research-Informed Practice

Competency 5: Engage in Policy Practice

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

APPLICATION PROCEDURE - BSW

Tracking and Advanced Majors

Initially, students who declare social work as a major are designated as *tracking majors*. In the weeks prior to completing the Introduction to Social Work (Sowk 203) and Professional Writing (Sowk 213) courses during the spring semester of a student's sophomore year, the student must apply for admission and be accepted into *advanced major* in order to continue taking social work courses.

Application for Advanced Major

Students must meet the following criteria to be admitted as advanced majors:

1. Students must earn a minimum grade point average (GPA) of 2.50 on all OLC course work.
2. Students must have most of their non-social work core courses (general core and Lakota Studies core) completed prior to being admitted to the advanced major.
3. Students must have all professional study required courses completed prior to being admitted to the advanced major.
4. Students must have earned a C or better in all required coursework.
5. Students must agree to adhere to the NASW *Code of Ethics*.
6. Students must have no documented instances of academic dishonesty on their records.
7. Background check findings may result in a student's inability to complete the program. Students whose criminal conviction history will preclude completion of the degree requirements will be so advised and will not be admitted into the advanced major.

The Social Work Department Chair will disseminate applications in April of each year. Qualified students must submit the application for advanced major to the BSW Department Chair by the submission date on the application. Students should submit the application during the spring semester in the SOWK203 course and have taken SOWK 213 prior to applying.

1. Application procedure
 - a) Applications are submitted electronically to the social work chair.
 - b) The full faculty reviews each application to determine whether acceptance or not into the major.
 - c) Students are notified by email by the department chair as to the faculty decision. A notification will state the reasons for said decision if a student is not accepted.
 - d) A student may appeal the decision per section, "Grievance Regarding Advanced Major."

The social work major is offered as a sequence of courses that take two years to complete. A full-time student takes a methods course in each of the four semesters of the junior and senior year. SOWK 333 Human Behavior in the Social Environment (HBSE) I is taken in the fall and SOWK 343 Human Behavior in the Social Environment (HBSE) II is taken in the spring of junior year. The social work elective is taken in the spring of the junior year. Social welfare and social work history is taken in the spring of the junior year. Introduction to Research is taken during the fall of the senior year. The Research Project is conducted in the spring of the senior year. The practicum is taken in both fall and spring semesters of the senior year; alternatively, the practicum may be taken after all the Methods courses are completed.

Part-time programs of study can easily be constructed. Contact the Department Chair for the particulars of part-time completion of the BSW.

DEPARTMENT OF SOCIAL WORK

Bachelor of Social Work (BSW)

120 Credits required for graduation (All courses passed with C or better)

A. Core (27Credits)	When taken	Grade
SpCm 103 Speech Communications	3	_____
Engl 103 Freshman English I	3	_____
Engl 113* Freshman English II	3	_____
Math 103 Elementary Algebra (or higher)	3	_____

SOCIAL WORK COURSE DESCRIPTIONS

SOWK 203 Foundations of Social Work

This course provides an overview of the profession of social work, including discussion of the various roles social workers perform. The course also explores professional and values and ethics. The course is designed for sophomores considering this major. Particular emphasis is placed on asking what the practice of social work would look like within the context of Lakota values, traditions and history. A core theme running through all content concerns the role of values and ethics, both personal and professional.

Pre-requisites: Engl 113, 3 credits. Highly recommend SOWK 213 completed prior to class or taken concurrently.

SOWK 213 Professional Writing

This writing intensive course is designed for students intending to pursue a professional career in social work. Using a writing-to-learn approach, students will write in response to written, audio, and video works with an emphasis on deepening understanding, exercising critical thinking, and enhancing clarity and specificity of written communication. Students will learn to maintain clarity about the boundaries between personal and professional writing. They will learn to enhance observational skills; describe in writing what is observed completely, accurately, and professionally; and distinguish between reaction, opinion, and argument. Written works will include literary prose and poetry as well as writings from professional discipline (peer-reviewed journal articles). All readings and exercises will reflect professional social work values and concerns.

Prerequisite: Engl 113, 3 credits

SOWK 303 Social Welfare & Social Work History

This course seeks to add to generalist social work orientation by focusing on the connection between the history of social work practice and social welfare policy and the issues that lead to policy formation. Social workers need to possess knowledge and understanding of the development of social welfare policies in response to social issues from the local tribal level to the federal level. To this end a major focus of the course is social welfare history from the Poor Laws forward. A particular focus is health and social welfare policies affecting the Lakota people.

Macro-level social welfare policies have existed as long as people have collaborated to meet their social needs. Social workers must grapple continually with the policy questions of "Who should get What? How? When? Where? On what Basis and Why?" The role of professional values and ethics in policy formation is explored in relation to all course content.

By the end of the course, students should understand that policies define the context within which social work is practiced and affect all aspects of social work intervention from the smallest client system (micro practice) to the largest (macro practice). Policies, for example, define who becomes clients, and how services are to be delivered including when, where, why and how many. It is essential that social workers be knowledgeable about this larger context for the practice of social work in order to become proficient in assisting those clients who seek social work services. Students are asked to understand policy from the generalist perspective of social work practice.

Pre-requisites: SOWK 203, SOWK 213, OLC Core, 3 credits

SOWK 313 Methods I

SOWK 313, the first of the four methods courses, is an introduction to the common core of essential concepts, skills, values, tasks, and activities important to generalist social work practice with individuals and families. The course will introduce students to the generalist perspective of social work practice including the relationship-building/problem-solving process within an ecosystem (person-in-environment) framework. Special emphasis will be placed on assessment of biological, psychological, and

socioeconomic factors (e.g., class, race, gender, and sexual orientation) and how they interact with elements of the environment, and influence intervention. This course also contains content stemming from Lakota values, beliefs and practices. This course contributes to the foundation on which the BSW curriculum builds from the generalist perspective of social work practice. The sequence emphasizes the strengths perspective which promotes empowerment and social justice for marginalized individuals, groups and communities.

Pre-requisites: SOWK 203, SOWK 213, OLC Core; 3 credits

SOWK 323 Methods II

This course is the second in a practice sequence that provides a conceptual framework for generalist social work practice and introduces students to the knowledge, values and skills needed to work with task & treatment groups. The sequence emphasizes the strengths perspective which empowers and promotes social justice for marginalized individuals, groups, and communities.

SOWK 323 is designed to teach students the theory and skills necessary to effectively design, implement, and evaluate task & treatment groups within the context of Lakota culture. This course frames task & treatment group work within the generalist perspective of social work practice. While specific class activities and learning objectives do not mention the emphasis on Lakota culture and its understandings of group process, this perspective is infused throughout the curriculum. The question, “How would this work with different populations on the reservation?” is an always present question.

Pre-requisites: SOWK 313, 3 credits

SOWK 333 Human Behavior in the Social Environment (HBSE) I & SOWK 343 Human Behavior in the Social Environment (HBSE) II – 3 Credits each

SOWK 333 is the first course in a two-course sequence, SOWK 343 is the second course that covers theories and knowledge of human bio-psycho-social development, with a focus on individuals and families. The Human Behavior and the Social Environment sequence provides content about theories and knowledge of human bio-psycho-social development and the range of social systems in which individuals live (families, groups, organizations, communities, and institutions). Particular focus is given to the Lakota worldview and its understanding of human development and social systems.

The sequence teaches students to evaluate theory and examine its application to client situations by identifying what we, as humans, all have in common. Bio-psycho-social theories are critically examined using social work values and ethics as examined through foundational relationships. Students consider interactions between and among human biological, social, psychological, economic and cultural systems as they affect and are affected by human behavior and the ways in which systems promote or deter people in maintaining or achieving optimal health and well-being by experiencing his or her vision of Wo’Lakota (balance, peace and harmony). The sequence addresses different people’s experiences, needs and beliefs, particularly as they relate to race, ethnicity, culture, class, gender, gender identity, sexual orientation, religion, physical and mental ability, age, and national origin.

Pre-requisites: SOWK 333 - OLC core, SOWK 203, SOWK 213, 3 credits

Pre-requisites: SOWK 343 - OLC core, SOWK 203, SOWK 213, SOWK 333, 3 credits

SOWK 403 Introduction to Research

This course provides the student with the foundations of social work research, preparing the student to become an informed consumer of research. Emphasis is placed upon application: preparing the student to be a consumer and producer of practice-based research, especially evaluation research. Students will learn the design and planning of research, methodologies, and their applications. Both qualitative and quantitative research methodologies will be examined. Ethics of research and cultural competence of research will be emphasized. How tribal values relate to research, especially within the Lakota cultural

framework, will be explored.

Pre-requisites: SOWK 323, SOWK 333 & SOWK 343; Sosc 313, 3 credits

SOWK 413 Methods III

This course is the third in a practice sequence that provides a conceptual framework for generalist social work practice and introduces students to the knowledge, values and skills needed to work with community groups, organizations, communities, and the Lakota tribe. Introduction to the roles, tasks and functions of the social welfare practitioner as well as theories and methods of assessment, intervention, and evaluation are provided.

The challenges facing the macro-practitioner in generalist practice are explored. Practice skills presented in this course build on the content presented in HBSE I and II. Issues regarding social and economic justice, the value of diversity, and populations-at-risk unique to this region and the role of professional ethics are integrated throughout the course. The student will learn the skills and knowledge necessary to enter beginning practice in the role of change agent.

Pre-requisites: SOWK 323, 3 credits

SOWK 423 Methods IV

This course is the fourth and last in a practice sequence that provides a conceptual framework for generalist social work practice and introduces students to the knowledge, values and skills needed to work with tribal and other governments. Introduction to the roles, tasks and functions of the social welfare practitioner as well as theories and methods of assessment, intervention, and evaluation are provided. The sequence emphasizes strengths and empowerment perspectives.

Methods IV is a policy-practice course in which students learn how to engage in legislative advocacy, grant writing, and to analyze government and tribal policies relevant to the health and welfare of the Lakota people.

Pre-requisite: SOWK 303, SOWK 413; 3 credits

SOWK 433 Elective

The social work elective can change depending on the interests of students and instructors.

Pre-requisites: SOWK 203 & SOWK 213, or instructor permission for non-social work majors, 3 credits

SOWK 443 Research Project

This is the second course in the two course research sequence and is offered in the spring semester of the senior year. It provides students with the opportunity to work on a research project. The research project is a group project arranged by the course instructor with an agency on the reservation or in Rapid City and involves conducting research (generally needs assessment or program evaluation) on a topic of interest to the agency. Each student will assume leadership for one phase/segment of the research project; all students will participate in all phases and activities. Student input into population to be studied will be obtained during the spring semester of the preceding year; actual population/agency will be dependent upon agency availability and interest.

Pre-requisite: SOWK 403; 3 credits

SOWK 406 & 416 Practicum I & II – 6 Credits each

This course represents the culmination of preparation for entry-level generalist social work practice. The course consists of supervised practice of the social work knowledge, values and skills learned in the classroom. Grading is Pass/Fail only.

The generalist practitioner operates within the ethical guidelines prescribed by the NASW Code of Ethics and utilizes the six-step, relationship building/problem-solving process and person-in-environment framework that make up the generalist perspective of social work practice.

During supervised field experience, students are expected to have opportunities to further integrate all educational facets, as articulated in the objectives, for a beginning level of generalist social work practice, with an emphasis on working with the Lakota people in systems of all sizes to promote, maintain and/or restore well-being. This course also emphasizes the professional attributes of the individual in professional practice, e.g. self-awareness, oral and written skills, accuracy and precision, empathy and genuineness, and organization and planning.

Students also participate in six hours per semester of seminar, which helps to integrate the field practicum experience with the BSW classroom knowledge, and which allows the exploration of additional knowledge. In the field seminar, students will learn the principles of the logic model and its application to the field setting. There are three papers associated with the two-semester field seminar.

Pre-requisites: SOWK 406 – SOWK 323, SOWK 343, Concurrent with, or after SOWK 413; 6 credits
SOWK 416 - SOWK 406 and concurrent with, or after SOWK 423; 6 credits

CD COURSE DESCRIPTIONS

CD 103 Introduction to Alcoholism

This course introduces the study of alcoholism and the wide range of current approaches to treating and preventing it. It surveys the symptoms and effects of alcohol and abuse and addiction and introduces leading theoretical models of alcohol addiction. It affords students the opportunity to assess their learning in relation to the phenomena of alcohol abuse and addiction in their communities. Prerequisites: Engl 103, 3 credits

CD 113 Introduction to Drug Abuse

The material in this course will introduce you to the fascinating study of a wide range of mood-altering chemicals, both legal and illegal. You will learn about the symptoms that drugs produce, and about their effects on individuals. You will also explore various approaches to treating and preventing drug abuse and will consider their applicability to the Lakota community. Prerequisites: Engl 103, 3 credits.

CD 203 Family Counseling and Chemical Dependency

This course will engage you in the study of the effects of alcoholism and drug abuse on families. You will consider the special needs of individual family members that alcoholism and drug abuse give rise to and you will learn about methods for addressing those needs. You will learn about self-help techniques for family members, about methods of family intervention, and about methods for helping the active alcohol or drug abusers.

Prerequisites: PSY 103 and either CD 103 or CD 113 or instructor permission, 3 credits

CD 223 Native American Substance Abuse

This course surveys the extent and the consequences of alcohol abuse among American Indians. The causes of origins of the alcohol disease will be explored as well as the different theories of addictions. In addition to the reservation experience, the urban setting will be discussed. The prevention, treatment and recovery for American Indian Alcoholics will be addressed. Prerequisite: CD 103 or CD 113 or instructor permission. 3 credits.

CD 233 Foundations of Individual Counseling.

This course is designed to cover the skills, concepts, and issues of chemical dependency counseling of individuals. The content provides students with knowledge of the counseling relationship, factors involved in chemical dependency, the process of diagnosis, assessment and treatment plans. In addition to examining traits of an effective counselor, the student will work to develop and practice using a theory of counseling.

Prerequisites: CD 103, CD 113. 3 credits

CD 313 Ethical and Legal Issues for Chemical Dependency Professionals

This course will explore the ethical and legal issues as they apply to Chemical Dependency Counseling. These issues include confidentiality, dual relationships, competency and referral, counselor values and conflicts, legality and ethics, client welfare, establishing appropriate limits and boundaries in the client relationship, informed consent, and other issues identified. Students will review the professional codes of ethics; values underlying code of ethics and will focus on the process of ethical decision making. Students will have the opportunity to identify and discuss the ethical and legal issues frequently encountered by prevention and treatment professionals.

Prerequisites: CD 103, CD 113, 3 credits

CD 343 Methods of Group Counseling

This course covers group leadership skills and various therapeutic techniques of group counseling through lecture and practical application. It focuses particularly on learning about the dynamics of group therapy as a helping and healing process. It covers theories that apply to groups and to addictions work. It introduces related topics of research, ethics, planning, leadership styles, multicultural considerations, and relevant Lakota practices.

Prerequisites: CD 103, CD 113, CD 233, 3 credits

CD 403 Continuum of Care

This course will cover the relationship between intake, case management, discharge planning and clinical record keeping. Students will learn how to implement plans used in addictions counseling, and about screening, assessment and evaluation procedures. Students will develop an understanding of relapse, including its relationship to the recovery process and the role of the counselor in relapse prevention. The course will cover treatment services provided to Native Americans and to the Lakota in particular.

Prerequisites: CD 103, CD 113, CD 233, CD 313, CD 343, 3 credits

The social work major is offered as a sequence of courses that take two years to complete. A full-time student takes a methods course in each of the four semesters of the junior and senior year. SOWK 333 Human Behavior in the Social Environment (HBSE) I is taken in the fall and SOWK 343 Human Behavior in the Social Environment (HBSE)II is taken in the spring of the junior year. The social work elective is taken in the spring of the junior year. Social welfare and social work history is taken in the spring of the junior year. Introduction to Research and Evaluation is taken during the fall of the senior year. The Research Project is conducted in the spring of the senior year. The practicum is taken in both fall and spring semesters of the senior year; alternatively, the practicum may be taken after all the Methods courses are completed.

Part-time programs of study can easily be constructed. Contact the Department Chair for the particulars of part-time completion of the BSW.

VOCATIONAL EDUCATION DEPARTMENT

Ivan Sorbel, Program Director/Department Chair
 Sydnee Twiss, Administrative Assistant
 Dean Brewer, Automotive Technology Instructor
 Gloria Eastman, Office Technology Instructor
 Marlon Fineran, General Construction Instructor
 Jiamie No Neck, Electrical Technology Instructor

VOCATIONAL EDUCATION DEPARTMENT MISSION

To continuously improve all programs to provide all students with competitive human, technical, and conceptual skills to participate in the improvement of their communities and quality of life.

The Vocational Education Department offers the following degrees and programs: Associate of Applied Science (AAS)

The Associate of Applied Science degree is a technical education and career-training program designed to provide students with hands-on experience in a variety of tasks and duties found in the world of business and government. These programs are not designed to facilitate the complete transfer of credits earned toward a higher academic degree.

AAS degree programs are offered only if and when vocational funding is available. Please contact the Vocational Education Department to see if the particular program of interest is currently funded. Vocational degree programs are subject to change without notice, depending on community need and the availability of funding, but active students will be given the opportunity to complete discontinued degree programs once they have been started.

AAS degrees offered:

- Automotive Technology
- General Construction
- Electrical Technology
- Office Technology

PRE-PROGRAM ENTRANCE REQUIREMENTS

The above AAS degree programs require that entering students take the Accuplacer placement test offered by the OLC Foundational Studies Department. **Any required Developmental Math and English courses must be completed before you enter On-Site Construction I or Auto 101, OMath 113 or TMath 123.** Please see the Foundational Studies Registration Flowchart for courses you may take while you complete the program entrance requirements. Also see the **Suggested Educational Plan** for each degree area.

VOCATIONAL EDUCATION COURSE LEARNING OUTCOMES

When completing the program, the student will be able to: Automotive Program

- Demonstrate professionalism and related soft skills.
- Apply theory of vehicle operating systems.
- Diagnose vehicle operating systems.
- Repair vehicle operating systems.
- Interpret service information.
- Exhibit safety practices and procedures.
- Prepare for ASE testing.

Electrical Program

- Exhibit proper safety techniques and procedures.
- Classify the use of common Electrical materials.
- Analyze blueprints and isometric drawings.
- Demonstrate proper techniques and procedures for installation of Electrical systems.
- Perform skillfully the installation of light fixtures, outlets, and household equipment.
- Apply knowledge of model Electrical code rules and regulations.
- Prepare for SD apprenticeship card and knowledge.

General Construction Program

- Exhibit problem solving, creativity, and resourcefulness.
- Exhibit safety practices and procedures.
- Demonstrate framing skills.
- Apply interior finish techniques.
- Perform exterior finish applications.
- Perform estimating/print reading functions.
- Prepare for industry or union credentials & knowledge.

Office Technology Program

- Demonstrate professional business communication.
- Utilize computer and other technology for general office applications.
- Exhibit ethical behavior in the office setting.
- Apply bookkeeping and record keeping procedures.
- Perform administrative responsibilities to the customer and employer.
- Explain social behaviors and interactions between individuals, groups and institutions.
- Demonstrate organizational skills.

VOCATIONAL EDUCATION COURSE DESCRIPTIONS

Auto 101 Electrical Systems

12 credits.

The first of four semesters begins with the student getting an overall picture of the program. The topics include Safety, Communications, Basic Shop Procedures, Service Information, Tools and Equipment, and Basic Vehicle Maintenance. Using state of the art computer-based instruction modules, students will begin learning automotive Electronics. The areas of study include Introduction to Electronics, Semi-Conductors, Transistors, Circuits and Troubleshooting.

Auto 102* Brake Systems

Pre-requisite: Auto 101. 12 credits.

Students will be able to use a drum/disc brake trainer, which will be a two-wheel model. This trainer will be part of a brake system program to present live operation and study hydraulic brake systems. A Delco/Bosh ABS/TCS system trainer will be used to present “real world” operation and study of antilock brake/traction control systems.

Auto 201* Engine Performance, Emission & Ignitions

Pre-requisite: Auto 102. 12 credits.

Student will learn how to use training boards to perform troubleshooting and engine control fundamentals, engine control diagnostic fundamentals, engine control system troubleshooting, and injector/ fuel pump systems.

Auto 202* Steering & Suspensions

Pre-requisite: Auto 201. 12 credits.

In this course students will study and gain knowledge of the following: Steering, Suspension Service and Repair including steering system design, steering gear and linkage (manual and power), rack-and-pinion, steering columns, front and rear suspension designs, Electrical suspension control systems, wheel bearing and spindle design, wheel and tire assembly service, wheel alignment diagnosis and adjustment. Students will have hands on training and testing.

CAR 103 Basic Carpentry Theory I

3 credits.

This course deals with the study of the various tools and materials including “green construction” materials used in construction and proceeds into the study of foundation systems and materials, floor systems, wall systems, and roof systems used in any type of residential construction. This course focuses on the rough in stage of residential construction.

CAR 203 Carpentry Theory II

Pre-requisite: CAR 103. 3 credits.

This course completes the study of residential construction. It concentrates on the finishing of the interior, exterior, and attachments to the home.

CAR 113 Basic Drafting

Pre-requisite: TMath 123. 3 credits.

Students will gain experience in transferring abstract ideas to workable drawings. Simple block drawing exercises will advance to residential home, and multi-plan drawings.

CAR 114 On-Site Construction I

Pre-requisite: TMath 123; Trds 103. 4 credits.

Continued construction of the residential home started with CAR 114. Emphasis for each student will be toward their specific degree program through hands-on activities. Electrical students will primarily do the wiring; plumbing students will install piping and plumbing fixtures and the general construction students will do primarily the framing, etc. (All students will work in all phases of the general construction for additional experience.)

CAR 124* On-Site Construction II

Pre-requisite: CAR 114; TMath 123. 4 credits.

Continued construction of the residential home started with CAR 114. Emphasis for each student will be toward their specific degree program through hands-on activities. Electrical students will primarily do the wiring; plumbing students will install piping and plumbing fixtures and the general construction students will do primarily the framing, etc. (All students will work in all phases of the general construction for additional experience.)

CAR 214* On-Site Construction III

Pre-requisite: CAR 124. 4 credits.

Continued construction of the residential home started with CAR 114. Emphasis for each student will be toward their specific degree program through hands-on activities. Electrical students will primarily do the wiring; plumbing students will install piping and plumbing fixtures and the general construction students will do the framing, etc. (All students will work in all phases of the general construction for additional experience.)

CAR 224* On-Site Construction IV

Pre-requisite: CAR 214. 4 credits.

Continued construction of the residential home started with CAR 114. Emphasis for each student will be toward their specific degree program through hands-on activities. Electrical students will primarily do the wiring; plumbing students will install piping and plumbing fixtures and the general construction students will do primarily the framing, etc. (All students will work in all phases of the general construction for additional experience.) 4 credits

CAR 233 Light Commercial & Residential Building Codes

Pre-requisite: TMath 123. 3 credits.

This course provides authoritative requirements and recommendations compiled from the nation's leading professional associations, industry publications, and building code organizations. Coverage includes standards for concrete, masonry, framing, finish carpentry and cabinetry, insulation, roofing, windows and doors, drywall and ceramic tile, floor covering, plumbing, Electrical, HVAC, and more.

CS 103 Ethics in the Workplace

3 credits.

This course is designed to help students to become aware of ethical issues in everyday life and in the workplace. Students will be encouraged to think critically when a difficult ethical issue arises and to make a mature and logical decision. This course also provides an introduction to personal financial responsibility.

Elec 103 Electrical Fundamentals

Pre-requisite: TMath 123. 3 credits.

This is an introduction to basic wiring of switches, outlets, lights, and appliances in residential applications. This course introduces the students to AC/DC Electron theory, Electron flow resistance, voltage, ohms law, magnetism, inductance, and capacitance.

Elec 113 Electrical Blue Prints

Pre-requisites: TMath 123. 3 credits.

Students will develop efficient and accurate print reading skills in the areas of Electrical construction and maintenance. Concepts of drawing, sketching, views, plans, schedules, and specifications will be studied and then reinforced by actual print reading exercises that offer practice in the interpretation and analysis of various prints in the residential, commercial and industrial fields. Students will benefit from exposure to Electrical, mechanical, hydraulic, and specialized communication symbology that will improve recognition and understanding of other craft symbols likely to be encountered on the job.

Elec 123 NEC® Codes

Pre-requisites: TMath 123. 3 credits.

Print reading Based on 2008 National Electrical Code® is designed to enable the student to learn Electrical print reading and become familiar with applicable sections of the NEC®. Complete references to the book are presented throughout the text. Trade Competency Tests are included at the end of each chapter to help students check their understanding of the text material and the NEC®.

Elec 133* Motors

Pre-requisite: TMath 123. 3 credits.

This course introduces motors from a magnet spinning in a magnetic field to three-phase adjustable speed types and the basic methods of wiring and controlling them.

Elec 213 Electrical Fundamentals II

Pre-requisite: Elec 103. 3 credits.

This is a continuation of the basic wiring- Fundamentals I (Elec 103) course with wiring of switches, outlets, lights, and appliances in residential applications. This course introduces the student to AC/DC electron theory, electron flow resistance, voltage, ohms law, magnetism, inductance, and capacitance. Students will study the methods used to safely install, maintain and troubleshoot the wiring systems of a house.

Elec 233 Advanced Electrical Theory

Pre-requisite: Elec 123. 3 credits.

This course includes the study of transformers, generators, and power lines, and other advanced electrical topics. Students will be able to understand the power distribution industry from the standpoint of the Vocational Education Electrical Program.

HV 103 Introduction to HVACR

Pre-requisite: TMath 123. 3 credits.

This course is designed to guide apprentices, entry-level technicians, and first-year students through their first experiences in the HVACR Trade. It provides a solid and thorough introduction to the field. It is the culmination of the efforts of industry leaders like the Air Conditioning Contractors of America (ACCA), Plumbing-Heating-Cooling Contractors Association (PHCC), and Refrigeration Service Engineers Society (RSES). It provides simple concepts that provide an overview of the world of HVACR and its main systems and components. Coverage then progresses to increasingly complex procedures, such as maintenance and inspection, installation and repair, and customer service and sales.

MIS 143 Introduction to Spreadsheets

Pre-requisite: OEd 103 or test out. 3 credits.

This is a continuation of the study of spreadsheets emphasizing the advanced features of functions, macros and business graphics.

MIS 243 Data-Based Applications and Design

3 credits.

A continuation of the study of database emphasizing database concepts, design & management techniques.

OEd 103 Computer Basics

3 credits.

This course provides a working knowledge of the basics of computer use. Students will be introduced to the basic workings of the computer, common software applications, basic internet usage including sending and receiving e-mail, sending attachments, and they will learn the keyboard.

OEd 123* Word Processing I

Pre-requisites: OEd 103 or test out. 3 credits.

This course provides opportunities for skill development in the electronic procedures of producing quality business documents. Word Processing Software is used to develop the competencies of creating, formatting, editing/revising and the printing of documents such as memos, letters, reports, tables, labels, envelopes, and etc. Competencies in the areas of composing and proofreading documents and producing effective communication skills are the objectives of this course.

OEd 133 Records Management

3 credits.

This course will apply alphabetic, geographic, numeric and subject filing procedures according to the rules established by ARMA (American Records Management Association). Storage systems, file maintenance, records control, and Electronic filing are included in this course. Records Management is a part of all offices nationwide.

OEd 143 Concepts of Database Management

Pre-requisite: OEd 103 or test out. 3 credits.

An introduction to Data Base Management Systems (DBMS). Topics include, but are not limited to relational models, keys, function, queries, reports and management of database systems.

OEd 153 Professional Development

3 credits.

This course is designed to provide students with professional job skills and professional job seeking skills. A "Professional Portfolio" will be compiled during this class. Items, to be included but not limited to, are resume, transcript, graded school assignments, achievements/honors, volunteer work certificates or projects, scholarship letters, recommendation letters, and any other documents that will help the student become successfully employed.

OEd 173* Dictation/Transcription

Pre-requisite: OEd 123. 3 credits.

This course provides fundamental instruction in the use of dictating/transcribing equipment in preparing office letters, correspondence and meeting minutes. The course includes a review of spelling, rules of dictation, rules of transcription and the mechanics of producing error-free documentation at employable production rates.

OEd 243* Office Management, Security & Safety

Pre-requisites: CS 103, Engl 103, OEd 103, OEd 153 or with approval of Department Director. 3 credits.

This course features modern practices and problems in the business office. Office safety, office/document security, work ethics, problem-solving and decision-making tools, social responsibilities, organizational structures, supervising, staffing, training, and office control through a systems analysis process are areas to be studied.

OEd 253* Word Processing II (General)

Pre-requisite: OEd 123, OEd 143 and MIS 143. 3 credits.

This course develops the advanced application competencies of document composition. Improved productivity in the most efficient, timesaving way of producing office documents using electronic equipment and templates, proofreading/editing documents will be a major objective of this course. This course has an exit requirement of 40 words-per-minute without error.

OEd 283 Keeping Financial Records

3 credits.

This course will give the student a thorough background in the basic record keeping skills used in business. The skills presented will also serve as a sound background for employment in office jobs. Students will be working with budgets, credit records, cash receipts, checking account records, petty cash records, retail charge sales, accounts receivable and payable, payroll records, and etc. 3 credits

OEd 293* Record Keeping Application Software

3 credits.

Accounting software for small businesses and entrepreneurship will be introduced for business recordkeeping and management. An example of this would be "Quick Books". An introduction to a word processing program and a spreadsheet program will be provided so that the student will be able to learn how to integrate financial documents into letters or reports and how to import data from an existing spreadsheet to a bookkeeping management program.

OMath 113 Occupational Math

Pre-requisite: Math 093 or test out. 3 credits.

This one-semester course helps students develop mathematical skills needed in the occupation that they are seeking. It provides comprehensive coverage of the basic computational skills and their applications. The course is developed to meet not only the needs of the traditional post-secondary student, but also the needs of the mature student whose mathematical proficiency may have declined during years away from formal schooling.

OTech 273* Office Technology Internship

Pre-requisite: Final semester of Program or department approval. 3 credits.

Students will work as supervised office assistant in an office on or off the reservation in a tribal, government, or private entity for ninety hours. A daily log of hours, activities performed, an overall report of the internship experience, plus the normal signed documents required to take the internship work experience will be required.

PLMB 103 Plumbing Fundamentals I

Pre-requisites: Math 093, R&W 093- Developmental math and reading & writing, or test-out. 3 credits.

Students will be taught the history of plumbing and value in creating a healthy society. Will learn plumbing definitions as spelled out in Uniform Plumbing Code. Will be exposed to basic concepts of DWV systems and basic water distribution.

TMath 123 Construction Trade Math

Pre-requisite: Math 093 or test out. 3 credits.

Trade Math will demonstrate the applications of math principles to the construction industry in the area of actual building, estimating, and drafting. Some of the principles addressed are surface areas, volumes, properties of spheres and circles, fractions and decimals, weight, and measures. The context will be based on realistic carpentry problems, including modern construction materials and practices.

Trds 103 Occupational Safety

3 credits.

The students will learn about theories and concepts (causes and costs of accidents, ethics and safety, Workers' Compensation and OSHA Compliance); OSHA's Construction Standard and Safety Practices; applications on the job (program and policies, safety and hazard analysis, accident investigation, reporting and record keeping, & emergency response plan); preventing violence in the workplace, stress, etc. The students will have the opportunity to receive CPR Training and Certification.

Trds 133 Residential Print Reading

Pre-requisite: TMath 123. 3 credits.

Print reading will address the need to accurately interpret technical drawings and transform them into actual projects. Students will study the principles of architectural and structural details and measurements.

Trds 163 Concrete Fundamentals

Pre-requisite: CAR 103 Carpentry Theory I. 3 credits.

This class provides basic knowledge of concrete construction. Contents include organizing quality, concrete mixture designs, specifications, foundations, formwork, reinforcement and embedment's in structures, joints and reinforcement for slabs-on-ground, preparing for concreting, concrete placing and finishing, common field problems, and safety.

Trds 213 Residential Estimating

Pre-requisite: TMath 123. 3 credits.

This is an introduction course to residential estimating processes and to the steps involved in accurately preparing a cost estimate. Students will learn how to price excavation and site work, concrete, carpentry, masonry, plumbing, heating, and Electrical work, as well as the general expenses and sub-trade work. Specifics on how to prepare a bill of materials from takeoff, how to summarize and prepare a bid for a custom home, assessing markup on an estimate, and how to review a bid before it is submitted to the client as well as information on preparing estimates for remodeling jobs.

GRADUATE STUDIES DEPARTMENT

The Graduate Studies Department issues degrees in Lakota Leadership and Management and Lakota Leadership and Management, Education Administration, the following is the framework for both programs.

GRADUATE PROGRAM AUTHORIZATION

The Oglala Lakota College was founded in 1970 by tribal leaders who determined an educated Lakota Oyate was necessary to assist the tribe in realizing the operation of its own affairs. The elders, who served as advisors, envisioned that a tribal college was paradoxically the way to preserve the Lakota language and culture. Therefore, the Oglala Sioux Tribe chartered Oglala Lakota College in March 1971, as part of its operation, Oglala Lakota College designed and developed a graduate program entitled Managers as Warriors from 1990-1992 and implemented the program in 1993. The Board of Trustees (BOT) created the Graduate Studies Department on April 1995 meeting the increased demand for graduate courses and degrees, thereby sustaining the current Graduate Department and the Master of Arts degree in Lakota Leadership and Management. In 1998, North Central Accreditation Association approved the Education Administration component of the degree.

DEGREES AUTHORIZED

Oglala Lakota College is authorized to grant the following degrees: Associate of Arts (1983), Bachelor of Arts (1983), and Master of Arts (1993). The South Dakota State Department of Education and Cultural Affairs approved teacher education program(s) (Oglala Lakota College, Self-Study Report, Higher Learning Commission, March 16-18, 1998) and the Educational Administration emphasis Master of Arts level (South Dakota State Board of Education, March 20, 2000).

ACCREDITATION AND AFFILIATIONS

Education Administration is an approved principal program under the authority of the State of South Dakota. The Education Administration program has adopted the Educational Leadership Constituent Council (ELCC) professional standards. The teacher education program is a member of the Teacher Education Accreditation Council and the South Dakota Association of Colleges of Teacher Education. The South Dakota State Board of Nursing approved the nursing program. Affiliations of the nursing programs include the University of South Dakota Nursing Program, Salish Kootenai, Sisseton-Wahpeton Nursing Program, Indian Health Service Pine Ridge and Rosebud, Rapid City Regional Hospital, Gordon Memorial Hospital, Veterans Administration Hospital, and Chadron Community Hospital.

GOVERNANCE

The policy-making body of the graduate program is the Graduate Policy and Review Committee. Graduate Policy and Review Committee is chaired by the Director/Chair of the Graduate Studies Department and is further composed of the Vice President for Instructional Affairs, academic department chairpersons, faculty with earned doctorates, and members of the graduate faculty. A recommendation for degree requirements and curriculum originates within each department and is reviewed by the Graduate Advisory Boards, then moves to the Graduate Policy and Review Committee. Finally, it is subject to review by the Graduate Faculty and Vice President for Instructional Affairs, then requires action by the President of Oglala Lakota College, and the Board of Trustees.

MASTER OF ARTS DEGREE IN LAKOTA LEADERSHIP AND MANAGEMENT AND LAKOTA LEADERSHIP AND MANAGEMENT: EDUCATION ADMINISTRATION

Philosophy

The belief of the degree program (s) is dedicated to the reality that Lakota leaders and managers must have a foundation in Lakota beliefs, values, thought, and philosophy. Specifically, the curriculum is guided by the principle that traditional Lakota beliefs recognize a leader as someone who works for, with, and among the people, rather than above them, someone who lives for the people and takes action that is for the people rather than for personal and material gain.

Vision

The vision of the Graduate Studies Programs is *Wolakota* within professionals as they continue their training to become leaders and managers; Lakota leaders who will live, preserve, and continue the Lakota way of life for coming generations.

Mission Statement

The Graduate Programs are committed to the belief that the leaders and managers, who will take Lakota into the 22nd century, must have a foundation in; Lakota language, spirituality, belief, values, thought, and philosophy. Delivery of the curriculum is guided by the principle that *Lakota leaders work for, with, and among the people, rather than for personal or material gain*. The rigor of the program will be a source of pride for dedicated professionals. Our graduate candidates strive to demonstrate Wolakota excellence and confidence as they translate theory into quality practice.

Purpose

The purpose of the Graduate Program (s) of the Oglala Lakota College is to develop individual management and leadership skills that are harmonious with Lakota values. Further, the knowledge base of the Graduate Program(s) is designed to produce candidates with expanded intellectual application, independence in reading and research, using critical thinking skills in decision-making, and the ability to design and implement change through strategic planning.

Program Goal

To graduate leaders who are sage managers/leaders in the Lakota community.

GRADUATE PROGRAM(S) BROAD OBJECTIVE: OVERVIEW

Oglala Lakota College's graduate programs of study are designed to expand understanding of contemporary society through a full application of the Lakota culture and its world relationships; to increase knowledge

in a particular area; to challenge values and philosophy; to encourage independent research and implementation through dissemination; to develop and refine communication skills; to foster reflective thinking processes; to provide intellectual stimulation and a foundation for continued study and life-long learning.

Learning Outcomes of Graduate Studies Programs

Program Learning Outcomes	Course Alignment
1. Candidates will integrate their knowledge and development of qualities necessary for Wolakota leadership.	LAKM 613, 623, 633, 643, 653, 663, 673, 683, 693, 703, 706 LMEA 713, 723, 743 796
2. Candidates will specify and implement how Lakota values, belief systems, and lifestyles of leaders and managers impact peoples and societies.	LAKM 613, 623, 633, 693 LMEA 703, 713, 723, 733, 753, 796
3. Candidates will recognize and practice listening, Lakota oratory skills, and other appropriate methods in the expression of Lakota	LAKM 613, 633, 643, 703, 706 LMEA 703, 713, 743, 796
4. Candidates will assess how historical processes of colonization affected Lakota culture and the social organization of indigenous peoples. Use the assessment to develop a plan of action for change.	LAKM 633, 653, 703, 706 LMEA 733, 796
5. Candidates will practice concepts of organizing communities and constructing change.	LAKM 663, 643, 653 LMEA 713, 733, 753, 796
6. Candidates will examine and evaluate financial management systems and recommend strategies for monitoring these systems.	LAKM 673 LMEA 743, 796
7. Candidates will identify, synthesize and interpret forces that underlie environmental issues using the Lakota worldview of Mitakuye Oyasin. Determine how people and nature influence and affect the environment, community, and curriculum.	LAKM 683 LMEA 733, 796
8. Candidates will analyze and apply the development and implementation process of exercising tribal rights.	LAKM 693 LMEA 723, 603, 796
9. Candidates will comprehend, interpret, and demonstrate the nature and significance of research, and provide them opportunities for application and implementation of research	LAKM 706, 603 LMEA 763, 773, 796
10. Candidates will design, implement and evaluate existing community development circumstances from a Wolakota	LAKM 703A I, LAKM 703B II
11. Candidates will demonstrate an understanding of the larger political, economic, and legal context within policies benefiting the diverse learner needs and school community.	LMEA 723, 753, 603

South Dakota State Competencies (SDSC) and the Educational Leadership Constituent Council (ELCC)

The above learning outcomes of the Graduate Studies Department Lakota Leadership and Management: Education Administration degree program (LMEA) are designed to meet the following state and specialized professional accreditation, and to reinforce the Lakota standards of Lakota Leadership and Management emphasized in the Four Directional Model of Bear Shield et. al (2000).

Lakota Standards (see Graduate Studies Four Directional Model listed below).

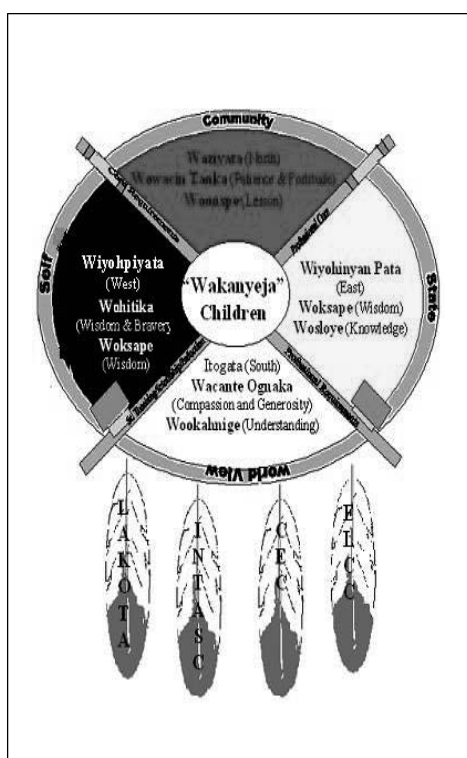

South Dakota State Administrative Rule § 24:53:08:01 inclusive. South Dakota State Competencies §24:53:04, §24:53:05, and §24:53:06 inclusive.

ELCC Standards see Educational Leadership Constituents Council, National Policy Board for Educational Administration (2002) *Standards for advanced programs in educational leadership for principals, superintendents, curriculum directors, and supervisors.*

FOUR DIRECTIONAL CONCEPTUAL FRAMEWORK MODEL

The Oglala Lakota College Graduate Studies Department incorporated Lakota values and concepts to maintain and strengthen the Lakota culture within individuals and communities. The four directional conceptual framework model evolved by integrating the concepts and symbols of the Lakota Mental Health Model (Bear Shield, et al, 2000), the medicine wheel, and the Oglala Lakota College Logo. The Four Directional Model is the framework for all program(s) within the Graduate Studies Department.

Wounspe na oitanca un wolakolkiciyapi, meaning learning Lakota ways of life in community through education and leadership, is the philosophy for the Four Directional Conceptual Framework Model incorporating *Oyate IkceTatuye Topakiya Wocicala Hena Wopasi*, meaning measuring knowledge of the four directions, to capture the capstone experiences for the program. The Four Directional Conceptual Framework model demonstrates the unique organization of the overall institutional structure of shared leadership and shared vision of Oglala Lakota College in correlation with the programs.

The Four Direction Model, also known as the Lakota Mental Health Model was developed from Bear Shield et al. (2000) who utilized cultural indicators to measure human development. These indicators assist in determining the disposition of the candidate and their capabilities of acquiring content knowledge, pedagogical and professional knowledge, skills, decision-making, and the importance of stewardship within organizations as the candidate moves towards completion of the degree. The four dimensions of measurement include 1) *Wiyohpeyata* (West) 2) *Waziyata* (North) 3) *Wiyohinyanpata* (East) 4) *Itokagata* (South). All four directions correspond equally to the four stages of growth, which include spiritual, physical, intellectual, and emotional components of development. These stages balance an individual. Therefore, the Four Directional Conceptual Framework Model is grounded in the Lakota worldview and cannot be separate from the intellectual component of human development. This worldview is utilized in this Four Directional Conceptual Framework Model which demonstrates educational excellence and high standards within the program.

WYOHPIYATA (West) - Admission/Entrance Requirements

Wiyohpiyata, meaning the cardinal direction of west, is represented by the color black. The cycle begins in the west and continues clockwise. This direction is also known as the *Wakinyan Oyate* meaning Thunder Nation who teaches us that we must be courageous to overcome obstacles and difficulties in life (Bear Shield, et al, 2000). Graduate students are required to demonstrate *Wowacin Tanka* meaning fortitude, *Whitika* meaning courage and bravery, as well as *Woksape* meaning wisdom. Entering graduate students must endure and balance the day-to-day obstacles of a family, geographical location, financial, and personal responsibilities. The completion of the necessary core requirements for the Graduate Studies Program(s) requires fortitude, courage, and wisdom. Therefore, this is the starting point and the first stage of the entering graduate students' educational journey toward becoming a "master's Candidate" and program completion.

ADMISSION/ENTRANCE REQUIREMENTS

The Oglala Lakota College Graduate Studies Department accepts applications from new entering students once per year for fall entry. Applications are due the last Friday of April. **Applications must be complete.** All late applications will be reviewed for entry into the next semester year. Incomplete applications will not be accepted and will be returned as incomplete.

*All new entering students **must meet the admission requirements** listed below to be accepted into one of the degree programs. Accepted students are **required to attend the Annual Graduate Studies Orientation**, before registering for courses. The Graduate Studies Orientation is held in August of each year. All LMEA students **must attend portfolio orientation**. All graduate students **must attend seminars as scheduled**.*

Admission process - Lakota Leadership and Management (LAKM) and Lakota Leadership and Management: Education Administration (LMEA)

Entering students must apply for acceptance into one of the degree programs by completing and submitting the following:

- 1) Graduate application
- 2) OLC admissions application, on-line
- 3) \$15.00 application fee
- 4) Submit all official transcripts specifying the date the degree was conferred
- 5) Submit degree of Indian blood or lineage form
- 6) Submit your current resume
- 7) Complete and submit a technology assessment accessed through the Graduate Office
- 8) Submit a copy of your current and valid teaching certificate in elementary or secondary education (**for LMEA degree only**)
- 9) Submit three (3) reference letters from employers, community members, colleagues, etc. Reference letters cannot be from immediate family members

Reference letter criteria:

Lakota Leadership and Management (LAKM) reference criteria:

- a. Reference letters must explain why the student is an excellent candidate for the Master of Arts degree in Lakota Leadership and Management
- b. Distinguish the students' Lakota Leadership professional and personal disposition
- c. Explain student professional and personal ethics
- d. Elaborate on the students' civic engagement within the workplace and/or the community

Lakota Leadership and Management: Education Administration (LMEA) reference criteria:

- a. Reference letters must explain why the student is an excellent candidate for the Master of Arts degree in Lakota Leadership and Management: Education Administration
 - b. Distinguish the students' Lakota Leadership professional and personal disposition
 - c. Explain student professional and personal ethics
 - d. Elaborate on the student's civic engagement within schools and the community
 - e. Verify the student's three (3) years of teaching experience on a valid certificate in an accredited K-8, 9-12, or K-12 school
 - f. Verify additional educational experiences within an education system
- 10) Submit and receive a rating of 15 (proficient) or higher on each writing sample: Autobiography and Philosophy of Leadership. (Note, the Autobiography and the Philosophy must follow American Psychological Association (APA) professional writing style. For assistance follow this link: <https://owl.english.purdue.edu/owl/resource/560/1/> or refer to the APA manual. Writing sample criteria must be in APA style writing

Lakota Leadership and Management (LAKM) writing sample criteria:

- a. **Autobiography** highlighting family, life experience, and disposition that emphasize key points to describe why you would be an excellent candidate for the Lakota Leader in Lakota Leadership and Management program. **Question:** What distinguishes you as an excellent candidate for the Lakota Leadership and Management program? (see rubric)
- b. **Philosophy and Vision of Leadership** emphasizing current issues in native communities serving native populations or underrepresented groups. Discuss your steps and explain how you plan on using the Lakota Leadership and Management degree within your work, personal life, and/or community to achieve your Philosophy and vision. **Question:** What is your philosophy and vision of leadership and how does this tie into addressing current issues in native communities or communities serving native populations? (see rubric)

Lakota Leadership and Management: Education Administration (LMEA) writing sample criteria:

- a. **Autobiography** highlighting family, life experience, and disposition that emphasize key points to describe why you would be an excellent candidate for the Lakota Leader in Lakota Leadership and Management Education Administration program. **Question:** What distinguishes you as an excellent candidate for the Lakota Leadership and Management Education Administration program? (see rubric)
- b. **Philosophy and Vision of Education** emphasizing current issues in native communities serving native populations or underrepresented groups. Discuss your steps and explain how you plan on using the Education Administration degree within your work, personal life, and/or community to achieve your philosophy and vision. Discuss how your philosophy and vision align with the purpose of the Graduate Studies program. **Question:** What is your philosophy and vision of educational leadership regarding Educational Administration, curriculum, communication, instruction, and community within native communities or communities serving native populations? (see rubric)

Students must have a baccalaureate degree from an accredited institution matching the admission requirements for the degree to which they are applying. A complete application with official documents must be mailed directly to the Graduate Studies Department: Attention Graduate Studies Admissions, P.O. Box 490, Kyle, SD 57752. Applicants must meet the entrance requirements listed above before being accepted as pre-candidate status.

Lakota Leadership and Management (LAKM) entrance requirements:

1. Must have a bachelor's degree from a regionally accredited institution
2. Must have a 2.50 cumulative GPA
3. Must have a 3.00 GPA in an undergraduate major field in 300 or higher-level coursework
4. Must have a 3.00 GPA in all undergraduate Language Arts coursework
5. Receive a score of 15 (proficient) or higher on each writing sample: Autobiography and Philosophy of Leadership. Must have at least 2 years of experience working with for-profit or nonprofit organizations, and/or community organizations, and/or grassroots community

Lakota Leadership and Management: Education Administration (LMEA) Entrance Requirements:

1. Must have a bachelor's from a regionally accredited institution
2. Must have received an undergraduate educational bachelor's degree from an accredited Institution (for Education Administration students)
3. Three years of verified classroom teaching experience at the elementary level and/or secondary level on a valid elementary and/or secondary teachers' certification or another endorsement which includes elementary and/or secondary grades
4. Must have a current and valid teaching certificate in elementary or secondary education
5. Must have a 2.50 cumulative GPA

6. Must have a 3.00 GPA in an undergraduate major field in 300 or higher level coursework
7. Must have a 3.00 GPA in all undergraduate Language Arts coursework
8. Receive a score of 15 (proficient) or higher on each writing sample: Autobiography and Philosophy and Vision of Leadership

Students must meet all graduate entrance requirements to gain full admission to the program. Students may be placed on conditional status dependent on writing sample scores, cumulative GPA, Language Arts GPA, and Upper Division course GPA. Students who are placed on conditional status are required to attend the Introduction to Graduate School Seminar. Students who did not meet graduate entrance requirements are welcome to reapply. Students will not be considered for enrollment into any of the courses as a degree-seek student until they have met entrance requirements and have been officially accepted into the program. Students may enroll in graduate core courses LAKM 603, LAKM 613, LAKM 633 after acceptance. Coursework is to be taken sequentially.

LAKOTA LEADERSHIP/MANAGEMENT CORE COURSE DESCRIPTIONS:

Students must successfully complete the core courses: LAKM 613, LAKM 633, and LAKM 603 with a B or better for each course. Students must complete the core and then apply for candidacy in the degree program they are seeking, to become a “Master Candidate”. Successful completion is needed to enter into *Waziyata*, the direction of the North.

LAKM 603 *Wowapi Woecun Na Wounspe Wankatuyahci Glustanpi Kte Kin Hena* (Research, Writing, and Statistics for Graduate Work)

This course is designed for new graduate students. The purpose of the course is to provide students with an introduction to graduate studies developing specific writing skills and a knowledge base needed to be successful in the graduate program, i.e. Formulating the question, developing hypothesis, developing a project model, reviewing literature, data collection, technical writing using APA style, and adapting research to appropriate audiences. This course will emphasize Lakota values of honesty, courage, and fortitude. Lakota language will be spoken as much as possible during class hours. 3 graduate credits

LAKM 613 *Lakota Woitancan Na Wokicanye Kin Un Oegleyapikte* (Lakota Foundations for Leadership/Management)

This course is the introductory course to the graduate program. Students will explore Lakota philosophy and theology, the foundation of Lakota leadership/management. Students will examine Lakota Leadership and management strategies by studying contemporary and historical Lakota leaders and managers’ strategies, thereby developing their management strategies to address the unique environment of the reservation. The Lakota values emphasized in this course: respect, generosity, and humility. Lakota language will be spoken as much as possible during class hours. 3 graduate credits

LAKM 633 *Tiospaye* (Lakota Social Organization)

This course is an in-depth analysis of Lakota political, economic, and religious systems with a strong emphasis on interpreting the relationships between various aspects of Lakota social organization and Lakota leadership and management practices. This course will emphasize the Lakota values of respect and humility. Lakota language will be spoken as much as possible during class hours. 3 graduate credits

WAZIYATA (North) – Candidacy/Professional Core Requirements

Waziyata, the cardinal direction of the North is represented by the color red. This direction is also known as the *Tatanka Oyate* meaning Buffalo Nation who brings us the laws, beliefs, and teachings. These teachings provide the basis for Lakota identity and the importance of living a good, productive life (Bear Shield, et al, 2000). Within the profession, students need a solid theoretical base for understanding laws, beliefs, and teaching to transition as a *Master Candidate*. These skills are needed to become proficient within their field of study. Candidates are required to demonstrate *Wowacin Tanka* meaning patience and fortitude as well as *Woonspe* meaning lessons, during this stage. Graduate students must complete and submit a candidacy application 30 days following the successful completion of the core courses: LAKM 603, 613, and 633, to be considered a *Master Candidate* in their chosen degree area. When students become a *Master Candidate*, they can proceed toward completion of their professional requirements. Candidates must maintain candidacy status throughout their program.

Candidacy requirements of Lakota Leadership and Management (LAKM) Degree:

The following documents are needed to apply for candidacy to receive *Master Candidate* status within the Lakota Leadership and Management program:

1. Submit the candidacy application form, attach documents, and receive validation of meeting candidacy:

- a. Submit OLC IRB-approved training certificate (National Institute on Health <http://phrp.nihtraining.com/users/login.php>)
- b. Successfully complete the core courses LAKM 613, 633, & 603 with a B (3.00) or better in each course
2. Maintain Candidacy status:
 - a. Have and maintain a 3.00 GPA or higher for a program of graduate study
 - b. Successful completion of professional requirements with a B (3.00) or better in each course
 - c. Complete program requirements within six (6) years of acceptance
 - d. Complete Capstone Option 1: LAKM 706 within three years of completing 30 credit hours of the required course work, or, Option 2: LAKM 703A and LAKM 703B within six (6) years of entrance
 - e. Attend and participate in all applicable graduate seminars as scheduled
 - f. Must meet or exceed LAKM graduate expectations before they can graduate
 - g. Uphold academic honesty and personal responsibility toward completion of degree

Candidacy Requirements of Lakota Leadership and Management: Educational Administration (LMEA) degree:

The following documents are needed to apply for candidacy and maintain *Master Candidate* status within the Education Administration program plan of study:

1. Submit the candidacy application form, attach documents, and receive validation of meeting candidacy
 - a. Submit OLC IRB-approved training certificate (National Institute on Health <http://phrp.nihtraining.com/users/login.php>)
 - b. Successfully complete the core courses LAKM 613, 633, & 603 with a B or better (3.00) or higher in each course
 - c. Complete and meet expectations of appropriate portfolio indicators for LakM 603, 613, & 633
 - d. Maintain current and valid teaching certification.
 - e. Meet program requirements for the elementary principal and/or secondary principal certification:
 - i. Elementary Principal**
 1. A bachelor's or master's educational degree from a college or university approved for teacher education as defined in §24:53:04 inclusive
 2. Three years of verified teaching experience at the elementary level, on a valid elementary teacher's certification or another endorsement, which includes elementary grades
 3. Program required internship hours specific to principal responsibilities of elementary schools
 - ii. Secondary Principal**
 1. A bachelor's or master's educational degree from a college or university approved for teacher education as defined in §24:53:04 inclusive
 2. Three years of verified teaching experience at the secondary level, on a valid secondary teacher certificate or another endorsement, which includes secondary grades
 3. The completion of an approved program for secondary principals at an accredited college or university
 4. Program required internship hours specific to principal responsibilities of secondary schools
2. Maintain Candidacy status:
 - a. Have and maintain a 3.00 GPA or higher for a program of graduate study
 - b. Successful completion of professional course requirements with a B (3.00) or higher in each course
 - c. Complete portfolio indicators and upload artifacts upon completion of each professional course
 - d. Complete LMEA 796 within three (3) years of completing 30 credit hours of required coursework
 - e. Attend and participate in all applicable graduate seminars as scheduled
 - f. Complete all program requirements within six (6) years of entrance
 - g. Must meet or exceed LMEA graduate expectations before they can graduate
 - h. Uphold academic honesty and personal responsibility toward completion of degree

WIYOHINYANPATA (East) - Professional Requirements

Wiyohinyanpata, the cardinal direction East, is represented by the color yellow. This direction is also known as the *Hehaka Oyate*, or Elk Nation who possess *Woksape* meaning wisdom encompassing survival skills, a sense of destiny, and a vision for the future. These teachings are to be modeled by *Ikce Wicasa* meaning the common man (Bear Shield, et al, 2000). This is the third stage of fulfilling the professional requirements as a *Master Candidate*. Candidates depend upon survival skills, which include the constructs of appropriate vision for self, the educational community of learners, and the community; then begin to demonstrate professional wisdom within their profession.

LAKOTA LEADERSHIP AND MANAGEMENT (LAKM) PROFESSIONAL COURSE DESCRIPTIONS:

LAKM 623 *Lakota Woitanacan Na Wowasi Icicakagapikte* (Lakota Leadership and Professional Development)

This course is designed for candidates to examine Lakota values, belief systems, and lifestyles to gain an understanding of and to determine their leadership style. Candidates will analyze leadership to determine the impact it has on society. Finally, Candidates will study leadership styles and develop a strategic plan(s) for professional development. The course will emphasize Lakota values: respect, courage, humility, and generosity. The Lakota language will be spoken as much as possible during class hours.

Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate credits

LAKM 643 *Lakota Woitanacan Un Woglaka Unspe Iciciyapikte* (Lakota Leadership Communication Skills)

This course is designed to furnish candidates with an awareness of, knowledge of, and practice listening skills, Lakota oratory, and appropriate methods of expression of Lakota values. It will examine and explore non-defensive and non-offensive speaking styles, oral advocacy, and working within conflict situations. Further, an in-depth study of skills in decision-making, self-expression, consensus-building techniques, and strategies of negotiation. Finally, comparison and contrast of combative communication styles of communication with the Lakota style of communication. This course will emphasize the Lakota value of respect. The Lakota language will be spoken as much as possible during class hours.

Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate credits

LAKM 653 *Wowasake Na Tiospaye Wounspe* (Power and Community)

The principle objectives of this course are to assess how historical processes associated with European expansion and colonization have affected the culture and social organization of indigenous peoples and to discuss ways of using assessment to form action for change. Further, study into the effects of the market system, missionizing, integration into the capitalist world system, and colonization, on community life. Final study will include an examination of past and ongoing resistance and struggle of indigenous and oppressed people in North and South America to protect their communities, preserve their cultures, and achieve self-determination. The course will emphasize the Lakota values of respect, humility, and courage. The Lakota language will be spoken as much as possible during class hours.

Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate credits

LAKM 663 *Tiyospaye Okolakiciye Wounspe* (Community Organizing)

Course content is a critical examination of the process of organizing communities and achieving community change. The course emphasizes Lakota values: respect and courage. The Lakota language will be spoken as much as possible during class hours. Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate credits

**LAKM 673 *Maza Ska Okicanye Wounspe*
(Financial Management)**

A course designed to develop the understanding of and the ability to monitor financial management systems. Focus will be on: Budgets and business management accounting for nonprofit and profit organizations, audit analysis and spreadsheets, and Indian School Equalization Program (ISEP). The course will emphasize Lakota values of respect and honesty. The Lakota language will be spoken as much as possible during class hours. Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate cr.

**LAKM 683 *Lakota Tamakoce Un Wokicanye Na Woanwanyanke Wounspe*
(Lakota Environment Management and Protection)**

This course is designed for candidates to examine global, political economic, and ideological forces that underlie the environmental crises. It is further designed for candidates to compare the Lakota view of the relationship of human beings to nature with those of other cultures. Finally, strategies and tactics that can be implemented to protect the environment will be explored. This course emphasizes Lakota values of respect and courage. The Lakota language will be spoken as much as possible during class hours. Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate credits

**LAKM 693 *Lakota Kin Iyecinka Igloayapi Kta Un Hecel Eglepli kte Wounspe*
(Establishing Lakota Sovereignty)**

This course is designed for candidates to examine the constraints and the possibilities permitted under the current Federal-Indian relationship. They will learn the development and implementation process of asserting and exercising tribal rights to make decisions as a society with the full attributes of a sovereign nation including recognition by other governments. The course will include a review of past and current activities of tribal involvement at the international level. This course emphasizes Lakota values of respect and courage. Lakota language will be spoken as much as possible during class hours. Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate credits

Lakota Leadership and Management: Educational Administration (LMEA) professional course descriptions: The courses LAKM 613, 633, and 603 are core requirements for Educational Administration emphasis. Coursework is to be taken sequentially.

**LMEA 703 *Wowapi Wounspe Itancan*
(Instructional Supervision)**

This course is designed for candidates to examine values, belief systems, and lifestyles to gain an understanding of and determine their leadership style. Candidates will study and understand the role of administrators in the general supervision of educational programs within the K-12 school system. Candidates will examine leadership styles and develop strategic plans emphasizing professional development. This course will emphasize the Lakota values of wisdom, courage, respect, generosity, fortitude, and humility. The Lakota language will be spoken as much as possible during class hours. Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate credits

**LMEA 713 *Wayawapi Itancan – (School Administration)*
713 (E) Kucila (Elementary); 713 (M) Eyokogna (Middle); 713(S) Wakatuya (Secondary)**

Candidates will examine and explore non-defensive and non-offensive speaking styles, oral advocacy, and working within conflict situations. An in-depth study of skills in decision-making, self-expression, consensus building, strategies of negotiation, and a comparison and contrast of combative communication styles will be presented and practiced. A study of problems and practices in organizing and administering school programs encompassing the K-12 systems will be covered in this course. This course will emphasize the Lakota values of wisdom, courage, respect, generosity, fortitude, and humility. The Lakota language will be spoken as much as possible during class hours. Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate credits

**LMEA 723 *Woksape*
(Counseling Theories and Socio-culture Foundations)**

Candidates will examine how historical processes associated with European expansion and colonization affected the culture and social organization of indigenous peoples. Particularly, the focus will be placed on the effects of the market system, missionizing, integration into the capitalist world system, and colonization. Candidates will explore current counseling theories, emphasizing relationships and intervention strategies that focus on counseling methods for K-12 schools and agencies. This course will emphasize the Lakota values of patience, fortitude, and wisdom. The Lakota language will be spoken as much as possible during class hours. Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate credits

**LMEA 733 *Oyate Wicoun*
(Fundamentals of Curriculum Development)**

This course is designed to focus on school curriculum through an examination of principles and practices essential to developing and administering curricular programs, including knowledge and understanding of measurability, scope and sequence taxonomy, program designs, and fit between a planned program and an implemented one. This course will emphasize the Lakota values of wisdom, courage, respect, generosity, fortitude, and humility. The Lakota language will be spoken as much as possible during class hours. Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate credits

**LMEA 743 *Mazaska Wounspe Okicanye*
(School Finance)**

A course designed to develop an understanding and the ability to monitor financial management systems. Focus will include budgets and business management accounting for nonprofits, audit analysis, and spreadsheets, Indian School Equalization Program (ISEP), K-12 public school finance, management of plant, equipment, insurance, transportation, and food services. This course will emphasize the Lakota values of honesty, fortitude, and wisdom. The Lakota language will be spoken as much as possible during class hours. Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate credits

**LAKOTA LEADERSHIP AND MANAGEMENT: EDUCATION ADMINISTRATION (LMEA)
ELECTIVES (6HRS.):**

**LAKM 683 *Lakota Tamakoce Un Wokicanye Na Woawanyanke Wounspe*
(Lakota Environment Management and Protection)**

This course is designed for candidates to examine, global, political, economic, and ideological forces that underlie the environmental crises. It is further designed for candidates to compare the Lakota view of the relationship of human beings to nature with those of other cultures. Finally, strategies and tactics that can be implemented to protect the environment will be explored. This course emphasizes Lakota values of respect and courage. The Lakota language will be spoken as much as possible during class hours. Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate credits

**LAKM 693 *Lakota Kin Iyecinka Igloayapi Kta Un Hecel Eglepli kte Wounspe*
(Establishing Lakota Sovereignty)**

This course is designed for candidates to examine the constraints and the possibilities permitted under the current Federal-Indian relationship. They will learn the development and implementation process of asserting and exercising tribal rights to make decisions as a society with the full attributes of a sovereign nation including recognition by other governments. The course will include a review of past and current activities of tribal involvement at the international level. This course emphasizes Lakota values of respect and courage. The Lakota language will be spoken as much as possible during class hours. Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate credits

**LMEA 603 *Owayawa Ta Woupe*
(School Law)**

This course is designed to understand the principles of law applicable to practical problems of school organization and administration. Study of organizational structure and administrative procedures at the federal, state, and local government level used in education/special education service delivery systems. This course will emphasize the Lakota values of wisdom and honesty. The Lakota language will be spoken as much as possible during class hours. Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate credits

**LMEA 753 *Nagi Wounspe Wakatuya*
(Advanced Educational Psychology)**

This course is a learning process with special emphasis on human abilities, early and contemporary learning theories with applications to selected developments in teaching, and persistent problems and issues in education. The course will emphasize Lakota values. The Lakota language will be spoken as much as possible during class hours. Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate credits

**LMEA 763 *Wopasi Wounspe*
(Statistics)**

This course is an introductory, yet comprehensive, survey of elementary statistical analysis in educational research and will be computer-oriented. This course will emphasize Lakota values of honesty courage and fortitude. The Lakota language will be spoken as much as possible during class hours. Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate credits

**LMEA 773 *Wopasi Woecun*
(Survey Design)**

A course designed to prepare graduate candidates in the social context of question-asking and designing questionnaires from start to finish. This course will emphasize the Lakota values of honesty, fortitude, and courage. The Lakota language will be spoken as much as possible during class hours. Prerequisite: LAKM 603, LAKM 613, LAKM 633. 3 graduate credits

***ITOKAGATA* (South) Capstone experience
Community Action Project (CAP) and School Community Action
Project/Internship (SCAP) and Induction**

Itokagata, the cardinal direction for South, is represented by the color white. This direction is also known as the *Wamakaskan Sitomni* or the Animal Nation. The Animal Nation teaches us how to live and work together living in harmony with *Unci Maka* (Grandmother Earth). These teachings strengthen our understanding of the world and create a solid foundation in preparing candidates for their educational journey. Candidates recognize their origins and demonstrate their appreciation (Bear Shield, et al., 2000). This is the fourth stage of the educational journey. The candidate will begin their first year putting to practice pedagogical knowledge and skills as well as working within the profession. Candidates are required to demonstrate *Wacante Ognaka* meaning compassion and generosity. Effective Lakota leaders demonstrate compassion and generosity through the delivery and giving of their knowledge, skills, and ability to the educational and local communities.

Lakota Leadership and Management (LAKM) Capstone experience

The Lakota Leadership and Management degree has two options within the capstone experience. Candidates must select an option when applying for candidacy in one of the degree programs. Options are listed below:

Option one: Community Action Project (CAP)

Option 1 is the Community Action Project (CAP). This is a year-long six (6) credit hour course. Preparation for this course begins one semester prior to enrollment, usually held in April. Candidates must attend the CAP seminar and meet all deadlines prior to enrollment. Candidates can refer to the Graduate Studies Handbook for full CAP requirements and processes.

**LAKM 706 Tiospaye Ecel Waecunpi Kta Wounspe
(Community Action Project)**

Community Action Project is original research designed collaboratively by the candidate and faculty advisor. The results of the research are presented and adhere to the process of scholarly research and writing. The Process: Topic selection, proposal submission, project development, project documentation (technical paper), and APA writing style. Note: only those candidates who have completed 30 hours of the program may register for this course. Prerequisite: All core and professional core requirements have 30 credit hours. 6 graduate credits

**Option two: 703: A & B *Woichage Na Kihelaka*
(Community Development and Sustainability I & II)**

The Graduate Studies Department created a non-thesis option as an alternative to the Community Action Project within the Lakota Leadership and Management Degree. Option two is a capstone educational experience in applied management for the Master of Arts in Lakota Leadership and Management degree. Graduate Candidates will apply the selected Leadership and Management skills in the public and private sectors in, tribal and non-tribal governmental and social structures, social or enterprise operations in the development, management, and ongoing evaluation of programs. These two courses are designed to provide an opportunity for the Graduate Candidate to demonstrate Lakota Leadership and Management skills and concepts through a *Wolakota* perspective. This course is an immersive leadership experience, encouraging the Graduate Candidate to use discretion/decision-making, analysis, and evaluation beyond the exercise of routine tasks with the mentorship of faculty and community leaders.

**LAKM 703A *Woichage Na Kihelaka, Wanji*
(Community Development and Sustainability I)**

This course is designed for Lakota Leadership and Management Candidates from a tribal treaty context focusing on community development and sustainability. This course offers lectures, student collaboration, and inquiry-based learning from a *Wolakota* perspective. Master Candidates will gain a comprehensive understanding of public and private programs, strategies, administrative tools, and data analysis methodologies. Master Candidates will develop a conceptual framework for a tribal or community private/public program or enterprise such as a human service program or community development organization. Candidates are required to demonstrate *Woksape* meaning Wisdom and *Wacante Ognaka* meaning holding people in their hearts through compassion and generosity when developing their conceptual framework. Prerequisite: 24 credit hours of the Lakota Leadership and Management required courses: LAKM 603, LAKM 633, LAKM 613 Professional Core LAKM 623, LAKM 653, LAKM 663, LAKM 673, LAKM 693 LAKM 683, LAKM 643. 3 graduate credits

**LAKM 703 B *Woichage Na Kihelaka, Nupa*
(Community Development and Sustainability II)**

This course is designed for Lakota Leadership and Management Candidates from a tribal treaty context focusing on community development and sustainability. This course is for candidates who have completed a conceptual framework in community development and sustainability I. Candidates will identify similar programs and best practices, to evaluate and critique from a *Wolakota* perspective. Candidates will be required to demonstrate Lakota Leadership through the presentation and implementation of findings. Candidates are required to demonstrate *Wacante Ognaka* meaning holding people in their hearts through compassion and generosity. Effective Lakota Leaders demonstrate compassion and generosity through the

delivery and giving of their knowledge, skills, and ability to the educational and local communities. Prerequisite: LAKM 613 A Community Development and Sustainability I. 3 graduate credits

Lakota Leadership and Management: Education Administration (LMEA) Capstone Experience: School Community Action Project (SCAP)/Internship and Induction

The School Community Action Project (SCAP) is a year-long six (6) credit hour course. Preparation for this course begins one semester prior to enrollment, usually held in April. Candidates must attend the SCAP seminar and meet all deadlines prior to enrollment. Candidates also prepare for the 120-hour internship completed in conjunction with the written paper. Candidates can refer to the Graduate Studies Handbook for full SCAP requirements and process

LMEA 796 *Wayawa Tiyoospaye Woecun Wicokan* (School Community Action Project/Internship)

School Community Action Project (SCAP) is original research designed collaboratively by the candidate and faculty advisor. The results of the research are presentation and implementation of the project. The process: Topic selection, proposal submission, project development, project documentation (technical paper), and a semester of internship that culminates an implementation of the School Community Action Project (SCAP). The internship is on-the-job experience while implementing SCAP, under the supervision of Graduate program staff. The internship is part of the School Community Action Project (SCAP) course. The internship is designed to take place over a period of two (2) semesters serving under a licensed principal at an elementary, middle, or secondary level. Candidates are required to have completed thirty (30) hours of their program before applying for an Internship. Candidates can be placed in any accredited South Dakota school and schools in other states having reciprocity with South Dakota. The Chair for Graduate Studies and faculty of LMEA 796 will supervise Candidates serving an internship. Note: only those Candidates who have completed 30 hours of the program may register for this course. Prerequisite: All core and professional core requirements 30 credit hours. 6 graduate credits

Internship

Education Administration Candidates are required to complete 120 hours of principal internship over a period of two (2) consecutive semesters serving under a licensed principal at the elementary, middle, or secondary level. Candidates must meet or exceed internship requirements. Internship placement, mentor, and calendar must be approved by the Director of Graduate Studies and the LMEA796 Instructor before beginning an internship. Experiences and artifacts must meet ELCC standards. See the graduate handbook for the internship process and assessment.

Exit Requirements/Induction

All graduate candidates are expected to meet or exceed graduate expectations upon exiting the program as defined in the Graduate Studies Handbook. All graduate students must complete a satisfaction survey. LMEA candidates within the graduate program will be provided induction services for their first year as a school leader. Induction services may include mentoring, coaching, and periodic assessment. See the Graduate Studies handbook for induction procedures, requirements, and assessment. All supervisors of 1st year and 3rd-year principals will be asked to participate in an employee performance survey.

Lakota Leadership and Management Ideal Program of Study

The following is an ideal program of study to earn a Lakota Leadership and Management degree with Option one: LAKM 706 Community Action Project or Option two: LAKM 703A & LAKM 703B Community Development and Sustainability I & II.

Option one: LAKM 706 Community Action Project

Year 1		Year 2		Year 3		Year 4	
fall	spring	fall	spring	fall	spring	fall	spring
LAKM 603	LAKM 633	LAKM 643	LAKM 693	LAKM 653	Cap prep seminar	LAKM 706	
LAKM 613	LAKM 623	LAKM 673	LAKM 683	LAKM 663			

Option two: LAKM 703A & LAKM 703B Community Development and Sustainability I&II.

Year 1		Year 2		Year 3	
fall	spring	fall	spring	fall	spring
LAKM 603	LAKM 633	LAKM 643	LAKM 693	LAKM 703A	LAKM 703B
LAKM 613	LAKM 623	LAKM 673	LAKM 683	LAKM 663	LAKM 653

Lakota Leadership and Management: Education Administration Ideal Program of Study

The following is an ideal program of study to earn a Lakota Leadership and Management: Education Administration degree. Candidates can choose two out of six electives identified on the Education Administration status sheet.

Year 1		Year 2		Year 3		Year 4	
fall	spring	fall	spring	fall	spring	fall	spring
LAKM 603	LAKM 633	LMEA 713	Elective 1	LMEA 743	SCAP internship preparation	LMEA 796 SCAP and Internship	
LAKM 613	LMEA 703	LMEA 723	LMEA 733	Elective 2	Final Portfolio Review	60 hrs. Internship	60 hrs. Internship

New entering students are required to attend the Graduate Studies Orientation held in August of each year. All students are encouraged to participate in any scheduled seminars.

For more information, please contact: Graduate Studies Director/Chair, P.O. Box 490, Kyle, SD 57770 (605) 455-6007, fax (605) 455-6131. See Graduate Program Handbook and Graduate Policy for more information. The revised Graduate Policies have been approved by BOT, on May 29, 2002, and amended June 2012. Information is available at www.olc.edu for general OLC information and http://www.olc.edu/departments/graduate_studies.htm for Graduate Studies specific information.

OGLALA LAKOTA COLLEGE

incorporating Lakota values and symbols in its efforts to maintain and strengthen Lakota culture, has adopted a symbol that could be called the Education Shield of the Oglala Division of the Teton Nation. The shield incorporates the traditional Lakota values and symbols with contemporary goals, objectives, and philosophy of the Oglala Lakota College.

The peripheral feathers represent the districts of the Pine Ridge Reservation. The four pipe feathers represent the sacred concept of the four winds and the four virtues of bravery, generosity, fortitude, and wisdom. Finally, and certainly not the least, is the crossed sacred pipes in the center, used for healing and as an instrument for peace.

Edwin Fills the Pipe
